**General Chemistry**
- General Chemistry 1
- General Chemistry 1 lab
- General Chemistry 2
- General Chemistry 2 lab

**Organic Chemistry**
- Organic Chemistry 1
- Organic Chemistry 2
- Organic Chemistry lab

**Calculus, Statistics and Physics**

* The Classical Physics A, B, C sequence requires 3 semesters of physics lecture.

Advanced Course Requirements for the Specialization in Interdisciplinary Biology
The list of Advanced BIO Courses and Accepted Electives for the Biology Major can be found on the back of this page. All courses must be passed with a letter grade of C or higher. The Specialization in Interdisciplinary Biology requires:

1. At least five advanced lecture courses; one lecture course in each of the four Areas from the list of Advanced BIO Courses and Accepted Electives, plus a second lecture course in the Area of your choice.
2. Two advanced laboratory courses, or combined lecture/laboratory courses, chosen from two of the four Areas. Note, one advanced laboratory course can be replaced by two semesters of independent research for a total of at least 4 credits in a BIO research course.
3. Additional advanced lecture, laboratory, reading, or independent research courses, as needed, for a minimum of 20 credits of advanced biology coursework.

Upper-Division Writing Requirement
The advanced writing component of the major in Biology requires registration in the 0-credit BIO 459 and approval of either a term paper or a laboratory report written for an advanced course in the biological sciences at Stony Brook.

Transfer students must take at least 15 credits of required core and advanced biology at Stony Brook in courses for majors at the 200 level or higher. Both of the two advanced laboratory experiences must be taken at Stony Brook.
