Undergraduate Research Program (www.cshl.edu/URP)

The Undergraduate Research Program is a 10-week summer research experience that engages students in a first-rate research project as they become part of Cold Spring Harbor Laboratory’s exceptional scientific community. Students take part in a short summer curriculum encompassing a range of topics, from Python programming to career planning.

Current sophomores and juniors are eligible to apply.

The application deadline is January 15. All applications and supporting documents must be submitted online.

Watson School of Biological Sciences Ph.D. Program (www.cshl.edu/gradschool)

The Ph.D. program at Cold Spring Harbor Laboratory takes advantage of the unique environment and extensive resources of the Lab and our faculty’s broad research expertise, which includes genetics and genomics, molecular biology and cancer, neuroscience, plant biology, and quantitative biology. Students in the Program are expected to graduate in four to five years. To this end, they receive extensive mentoring throughout, with an academic as well as a research mentor, and they complete their core course work, rotations and qualifying exam within the first year.

All students are fully funded by the School - stipends, tuition and research costs - giving them the freedom to join any lab, irrespective of that lab’s external funding. Students receive subsidized housing and food and full health benefits.

The application deadline is December 1. All applications and supporting documents must be submitted online.
