

Dear Student/Colleague

Eko Tracks offers several exciting study abroad programs in veterinary science and wildlife conservation, internship in wildlife conservation and park management, volunteer opportunities in wildlife rehabilitation, a field expedition and eco tours in southern Africa. These are specifically designed for students, nature and outdoor lovers, adventurers and other interest groups.

The **veterinary study abroad program** in South Africa is designed for students in veterinary science, vet tech or pre-vet with a focus on wildlife veterinary science, wildlife diseases and medicine, participation in capture and care of wild animals, breeding of rare species, wildlife rehabilitation, ecosystems and biodiversity conservation. The adventure-filled **wildlife conservation program** in South Africa focuses on field techniques, sustainable resource utilization, ecosystem and biodiversity conservation, game reserve and resort management, and game capture operations. The above programs are offered through lectures, field work and interactions with field vets, biologists and conservationists. These programs are endorsed by the University of Pretoria (South Africa) and the International Council for Game and Wildlife Conservation.

The **wildlife internship** is offered in a large biosphere reserve in South Africa where you will acquire knowledge in monitoring, population surveys including lions and elephants, habitat management, biodiversity and park management.

We also offer two **volunteer programs** in Namibia where volunteers work at a wildlife sanctuary with African wildlife including cheetahs, wild dogs, lions, baboons etc. The second volunteer project is on a nature reserve focusing on big cat conservation and habitat restoration.

A unique **field expedition**, led by a wildlife ecologist explores the landscapes, ecosystems, diversity of wildlife, conservation challenges and parks of Namibia. You will experience behind the scenes activities and discover considerably more than on a typical African safari.

Read more about these exciting educational programs (itinerary, dates, prices etc.) on our website <http://www.ekotracks.com> and on Facebook ekotracks.

Sincerely

Werner Dörgeloh
