The Regeneron Science Talent Search (Regeneron STS), a program of Society for Science & the Public, is the nation’s most prestigious pre-college science competition. Alumni of STS have made extraordinary contributions to science and hold more than 100 of the world’s most distinguished science and math honors, including the Nobel Prize and the National Medal of Science. Each year, 300 Regeneron STS scholars and their schools are recognized. From that select pool of scholars, 40 student finalists are invited to Washington, DC in March to participate in final judging, display their work to the public, meet with notable scientists, and compete for awards, including the top award of $250,000.

2017 SCHOLARS
ALABAMA
Birmingham
Jefferson County International Baccalaureate School
Sridhar, Varsha R., 18
Generalization of the Marcus Model for in vivo Electron Transfer

ALASKA
Fairbanks
West Valley High School
Chen, David Dawei, 18
An Analysis of H5-HA Avian Influenza Subtypes in Alaska Migratory Birds

ARIZONA
Chandler
Arizona College Preparatory – Erie Campus
Loop, McKenna Kristin, 17
Algae Lipid Extraction Methods and Economic Feasibility Analysis — Introducing Fungal-Assisted Extraction

Hamilton High School
Iyer, Dhruv, 18
Identifying Pathways Enriched with Differential Dependencies Using LASSO

Zhu, Justin, 17
Optimizing Tools for Genomics Data: Enhancing the Integrative Genomics Viewer with Java Functionality for Next-Generation Sequencing

Oro Valley
Immaculate Heart High School
Minke, Amanda Catherine, 17
Analyzing the Mechanism and Efficiency for Filtering Pb²⁺ Using Freshwater Algae - Phase 3

Scottsdale
Desert Mountain High School
Saxena, Aakanksha, 17
The Influence of Contaminants and Secondary Phases on the Optical Properties of Iron Pyrite (FeS₂), a New Candidate for Large Area, Low Cost Photovoltaic Cells

CALIFORNIA
Cupertino
Monta Vista High School
Cheerla, Nikhil, 17
Scoring Regulatory Variants Using Deep Convolutional Neural Networks and DeepLIFT

Saluja, Sajeev, 17
Simulation and Experimental Verification of Thioflavin-T mediated Reversal of Amyloid-like Aggregation

Talapaneni, Suresh, 17
A Versatile, Quantitative Means for Post-mortem Diagnosis of Tauopathies Using Supervised Machine Learning

Diamond Bar
Diamond Bar High School
Chen, Benjamin, 17
Asymmetric Bipartite Variants of the Erdős Distinct Distances Problem

About Regeneron
Regeneron is a leading science and technology company discovering and delivering life-transforming medicines for patients in need. Founded by physician-scientists nearly 30 years ago, our innovative approach has resulted in multiple FDA-approved treatments and numerous product candidates in a range of diseases, including rheumatoid arthritis, atopic dermatitis, asthma, pain, cancer and infectious diseases.

STEM education is at the heart of our corporate citizenship efforts. We believe that science plays a key role in advancing society and are committed to ensuring a continual pool of talent. We seek to attract more students to science careers, while supporting and nurturing talented young people who have shown early promise. Our STEM programs include the Regeneron Science Talent Search, a program of Society for Science & the Public since 1942 and the nation’s oldest and most prestigious pre-college science competition. Westinghouse and Intel were previous title sponsors of the Science Talent Search.

Learn more about our programs at www.regeneron.com/scienceeducation
