Petar M. Djurić recognized for outstanding achievements in signal processing by EURASIP - elevated to EURASIP Fellow

At the beginning of every year, the European Association for Signal Processing (EURASIP) recognizes "outstanding achievements of its members and volunteers. Each year, a select group of signal processing researchers is elevated to “EURASIP Fellow,” the Association's most prestigious honour."

This year one of the four recipients of this high distinction is Petar M. Djurić. His citation reads "For contributions to the theory and practice of Bayesian signal processing."

The award will be presented during the Opening and Awards Ceremony of the EUSIPCO 2016 conference, which will be held in Budapest (Hungary) from August 29 to September 2, 2016.

More information on the EURASIP Fellows 2016 can be found in the EURASIP’s Newsletter – Vol. 27, January 2016, at
