Stony Brook Builds an Engine of Social Mobility

In an era of growing income inequality, families have fewer opportunities to better their children's future. Meanwhile, we endanger a national tradition of innovation and discovery when many of our best and brightest minds are left by the wayside.

For many lower-income and first-generation students, attending college can seem like a pipe dream, with few people guiding them toward higher education.

At Stony Brook University, a committed community of scholars, administrators and students is igniting social mobility by offering a different progression - one that can lead to better outcomes - through a sustained, multipronged outreach before college; a culture of diversity and inclusivity; and on-campus mentoring and support to retain students to graduation.

These outcomes are singled out in a recent study led by the Stanford Institute for Economic Policy Research, which concludes that Stony Brook offers a proven path toward upward advancement for students from low-income households, far ahead of many of its better-funded peers, public and private.

Department of Defense Visits Stony Brook University

On Thursday, December 14, Dr. Robin Staffin, Director of Basic Research for the Department of Defense (DoD) visited Stony Brook University along with four of her DoD colleagues.

This visit was organized by the Office of the Vice President for Research and the Office of Government Relations to provide Stony Brook researchers with a strategic networking opportunity to learn about a wide
Provost Michael Bernstein; Dr. Robin Staffin; and Dr. Richard Reeder, Senior Vice President for Research

Dr. Robin Staffin addresses the SBU research community during the DOD visit to campus. "The visit by DoD's Director of Basic Research reflects our outstanding reputation for fundamental research at Stony Brook," said Richard Reeder, Vice President for Research at Stony Brook University. "The new insights gained during the visit will allow us to expand our research across a broad range of disciplines, a goal that's vitally important at a time when some federal funding agencies are facing possible cuts."

Senator Serino makes trip to Stony Brook for Update on Lyme and Tick Research and Care

(L-R) Dr. David Thanassi, Chair, Dept of Molecular Genetics & Microbiology; Dr. Kenneth Kaushansky, Senior VP, Health Sciences and Dean, School of Medicine; Dr. Jorge Benach, Distinguished Professor; Senator Sue Serino; Dr. Luis Marcos, Director of the Adult Lyme and Tick-Borne Disease Center; Dr. Bettina Fries, Chief, Division of Infectious Disease; Dr. Christy Beneri, Asst. Professor of Pediatric Infectious Disease, Stony Brook Children's Hospital; Eric Hoffmesiter, Chief of Staff for Senator Tom Croci, Scott Lavery, representing Senator Tom Croci, Senator Sue Serino, and Dr. David Thanassi provide updates on Lyme and Tick-Borne Disease research and care.

Dr. Kenneth Kaushansky welcomed New York State Senator Sue Serino (R-Hyde Park), Chair of the New York State Senate Task Force on Lyme and Tick Borne Diseases, to campus for a briefing on Stony Brook's research and care of these diseases.

While Suffolk County bears a disproportionate burden of tick-borne diseases in the state, the problem is increasing throughout the state especially in the Hudson Valley area which includes Senator Serino's district. The Senator was provided an overview by Dr. Jorge Benach and Dr. David Thanassi on the latest research.

Additionally, the Senator was provided with adult and pediatric clinical updates by Dr. Bettina Fries and Dr. Luis Marcos from the Division of Infectious Diseases in the Department of Medicine, Dr. Christy Beneri from the Department of Pediatrics provided an overview of the treatment of children with tick-borne diseases. Senator John Flanagan and Senator Ken LaValle also serve on the task force as well as other members of the Senate delegation on Long Island.

Collaborations with SUNY Korea

At the request of Assemblyman Ron
Kim, (D-Flushing), a meeting was held on campus to discuss a collaboration with SUNY Korea and the Korean-American Scientists and Engineers Association.

The collaboration would introduce student talent to the needs of cities in the US and South Korea for improved management through new and advanced technologies.

Assemblyman Kim is the first Korean-American to be elected to the New York State Legislature.

School of Social Welfare Leadership Briefs LI Congressional Delegation in DC

Representatives from the Stony Brook University School of Social Welfare traveled to Washington, DC, to advocate for the school's legislative and funding priorities. Jacqueline B. Mondros, Dean and Assistant Vice President for Social Determinants of Health for the School of Social Welfare, along with Professor Michelle S. Ballan and Professor George S. Leibowitz met with Congressman Peter King, Congressman Tom Suozzi, and the higher education policy staff of Leader Schumer, Senator Gillibrand, Congressman Zeldin and Congresswoman Rice.

"It was extremely interesting to have the opportunity to speak with the Congressional staff members and to hear their comments and perspectives," said Dean Mondros. "It was also important to establish Stony Brook's presence and advocate for several urgent issues that we are working on."

Stony Brook's "Communicating Science" Highlighted at National Higher Education Government Relations Conference

Judy Greiman, Chief Deputy to the President and Senior Vice President of Government and Community Relations, and Laura Lindenfeld, Director of the Alda Center, provided a presentation on Communicating Science to Policy Makers at the
2017 Higher Education Government Relations Conference in San Diego on December 7.

Hosted by AACC, AASCU, APLU and CASE, the conference was designed to help higher education government relations professionals from institutions, systems, and governing/coordinate boards understand and navigate the current era of greater political polarization. The Communicating Science to Policy Makers presentation provides an introduction to strategies for government relations professionals and faculty on their campuses to engage more effectively with elected officials and their staff.

**Mechanical Engineering Awarded $1 Million from ARPA-E for Transformational Energy Technology**

The College of Engineering and Applied Sciences has been awarded $1 Million in funding from the U.S. Department of Energy’s Advanced Research Projects Agency-Energy (ARPA-E). Led by Professor Ya Wang, the funding will be used to develop a Synchronized Low-Energy Electronically-Chopped Passive-InfraRed (PIR) Sensor for Occupancy Detection (SLEEPiR), an inventive occupancy sensing solution, for residential homes for detecting high accuracy human presence.
