A Message From Judith B. Greiman

Chief Deputy to the President and Vice President for Government and Community Relations

With the passage of this year's State Budget, Congressional appropriations negotiations heating up, and our spring semester in full swing here on campus, Stony Brook's Office of Government and Community Relations has been buzzing with activity. In this issue we share our response to the budget, advocacy efforts in D.C. and a few of the ways we are connecting with the community.

I hope you enjoy our latest updates in this April edition of Capslts and Communities.

Sincerely,

2016-17 State Budget Finalized

The 2016-17 State Budget was finalized this month, which for SUNY and Stony Brook University brings good news and not-so-good news.

Let's start with the not-so-good news... The proposal to extend the SUNY 2020 rational tuition plan was not included in the final budget. Instead, the budget froze tuition for resident undergraduate students for one year, the Maintenance of Effort provision (which requires the State to maintain level funding) was...
President Samuel L. Stanley Jr. and Chief Deputy to the President Judith B. Greiman discuss Stony Brook University priorities with New York State Assembly Higher Education Chair, Assemblymember Deborah Glick.

The TAP tuition credit was maintained for one year, but universities were not provided with tuition or base aid revenue to support the aid - a cost of about $5M for Stony Brook.

The big news in the budget, thanks to Senator Ken LaValle and Senate Majority Leader John Flanagan, was the award of $75M in capital funds to Stony Brook for development of an institute that will use our strengths in computational science to support innovations in biotechnology and medical research and will serve as a draw for companies to the LI Research Corridor.

Other capital budget appropriations include an extra $50M for Stony Brook University Hospital and $27.2M for critical maintenance. This was $6M more than what had originally been proposed, but is still far from the $75M Stony Brook depended on some years ago. Critical maintenance funds allow us to take care of our aging infrastructure including buildings, walkways, labs, roofs and critical systems. In addition, previous years’ appropriations have been redirected for an expansion of Kenneth P. LaValle stadium and for the renovation and modernization of classrooms and laboratories at Stony Brook Southampton.

Equal Opportunity Programs (EOP) statewide saw an increase of $5.4M in operating funds, the Centers of Excellence remained flat at $1M each and the Centers for Advanced Technology were reduced $1M statewide. Funding for SOMAS’ Marine Animal Disease Lab was a three year project that expired last fiscal year and was not extended.

Wolfie’s Albany Road Trip

During Mascot Madness 2016, Wolfie joined SUNY mascots from across New York in the state capital. Not one for the usual formalities of the hallways of the Capitol and Legislative Office Building, legislators and advocacy groups were unexpectedly greeted by Wolfie.

Although it was budget season, a time of working late nights and weekends, the legislators greeted the mascots with hugs and high-fives. Wolfie was especially excited to run into members of Stony Brook Undergraduate Student Government (USG) and the Graduate Student Organization (GSO) who were speaking with legislators about the importance of predictable tuition costs for students and their families.

Stony Brook Answers Why Science Matters

As voters in 14 states on Super Tuesday answered the question of who they want to be their party's nominee for president of the United States, The Science Coalition (TSC) asked students, researchers and faculty at four universities - including Stony Brook - a different question: Why should science matter to our presidential candidates? Stony Brook University answers included the importance of cancer research, promoting energy efficiency and the future of our water supply, among others.

Stony Brook University, along with its fellow TSC members, continue to focus advocacy efforts on the need to maintain America's leadership in scientific discovery and innovation.

FY17 Budget Process Moves Forward

The House and Senate appropriations committees are making progress on their FY17 funding bills, but it seems inevitable that Congress will need to approve a continuing resolution (CR) this fall to prevent a government shutdown on October 1.

Recently, the Senate Appropriations Committee unanimously approved its FY17 Commerce-Justice-Science Appropriations bill. This bill funds the National Science Foundation (NSF) at $7.5 billion. While this is an increase of $46 million above the FY16 enacted level, we are disappointed that NSF was not funded at the higher education community’s requested level of $8 billion. Stony Brook continues to work with our fellow members of the Association of American Universities (AAU) to urge the House not to follow suit with the Senate and rather, fund NSF at $8 billion.

Meanwhile, Stony Brook University Government Relations and student advocates continue to show a strong presence in Washington, D.C. this spring, meeting with members of the Long Island delegation to discuss university priorities including increased funding to federal research agencies.

"Far Beyond" Brings the Stony Brook University Story to Life

As Stony Brook University continues its ascent as one of the nation's preeminent research universities, students, faculty, alumni and staff now have a new compelling and consistent communications framework from which to tell their stories, to describe their life-changing experiences, and to reflect their pride: FAR BEYOND.
"Our community recognizes the remarkable, groundbreaking work and outstanding scholarship that take place on our campus every day," said Stony Brook University President Samuel L. Stanley Jr. "Equally as important is ensuring that people outside of Stony Brook - peers, the public, media, legislators - see the full breadth of our story and recognize the drive and growing reach and impact of our University.

Eric H. Holder, Jr., Soledad O’Brien to Receive Honorary Degrees at 2016 Commencement

Two eminent Americans, former US Attorney General Eric H. Holder, Jr. and award-winning journalist Soledad O’Brien, will receive honorary degrees at Stony Brook University’s 56th annual Commencement ceremony, to be held May 20, 2016. The conferral of these degrees underscores the University’s ongoing commitment to diversity, social justice and public service.

“This is a remarkable distinction for the class of 2016, to be joined by individuals who personify what Stony Brook embraces - the relentless pursuit of excellence and commitment to make a real difference," said Stony Brook University President Samuel L. Stanley Jr.

13 SBU Students Honored with SUNY Chancellor’s Award for Excellence

Thirteen students from Stony Brook University received the Chancellor’s Award for Student Excellence in a ceremony at the Empire State Plaza Convention Center in Albany on April 5. SUNY Chancellor Nancy L. Zimpher presented the awards to 248 SUNY students.

The Chancellor’s Award for Student Excellence was created in 1997 to recognize students who have best demonstrated, and have been recognized for, the integration of academic excellence with accomplishments in the areas of leadership, athletics, community service, creative and performing arts, campus involvement, or career achievement.
