School of Nursing

DEAN: Lenora J. McClean
ASSOCIATE DEAN: Ora James Bouey
ASSISTANT DEAN FOR ALUMNI ADVANCEMENT: Gene E. Mundie
ASSISTANT DEAN FOR CLINICAL PLACEMENTS: Arleen Steckel
ASSISTANT DEAN FOR STUDENTS: Kathleen Bratby
ASSISTANT TO THE DEAN FOR RECORDS AND REGISTRATION: Valerie DiGiovanni
ASSISTANT TO THE DEAN FOR ADMISSIONS: Jennifer Coppola
DEPARTMENT CHAIRS: Patricia Long (Community & Mental Health Nursing), Kathleen Shurpin (Adult Health), Arleen Steckel (Parent Child Health)
ADMINISTRATOR: Linda Rampil
DIRECTOR OF CLINICAL PLACEMENTS: Jeannette Coane
CLINICAL CONTRACTS COORDINATOR: Karen Allard

OFFICE: HSC Level 2 PHONE: (631) 444-3200 WEB: www.nursing.stonybrook.edu

Professors: Ora James Bouey, Patricia Long, Lenora J. McClean, Mary Nies, Kathleen Shurpin, Lee Xippolitos

Clinical Associate Professors: Nancy Balkon, Patricia Bruckenental, Marijene Buhse, Virginia Coletti, M. Elayne DeSimone, Lori Escallier, Corrine Jurgens, Lenore Lamanna, Marie Ann Marino, Barbara Messina, Gene E. Mundie, Debra Sansoucie, Arleen Steckel

Clinical Assistant Professors: Kathleen Bratby, Terri Cavaliere, Michael Chiarello, Jeannette Coane, Elizabeth Collins, Vivian Cunningham, Carol Delia Ratta, Kathleen Gambino, Barbara J. Gibbons, Lisa Jensen, Cynthia Kealey, Nancy Kennedy, Nicole Rouhana, Denise Snow, Barbara Sprung, Catherine Sullivan, Philip C. Tarantino, Paula Timoney, Lyn Vargo, Patricia Voelpel, Bruce Zitkus

Adjunct Professor Emerita: Carole Blair

Adjunct Clinical Professor Emerita: Judith Treistman

Adjunct Professors: George Tortora, Stephen Vitkun, Lee Ann Xippolitos

Adjunct Clinical Associate Professors: Virgeline Bowie, Elizabeth Walker

Adjunct Clinical Instructors: Debbie Fitzgerald, Arlene M. Fitzmaurice, Karin Ganetis, Margaret Kelly, Karen Kelly-Sproul, Jennifer Leonard, Shibani Ray-Mazumder, Margaret Stolz, Janet Stone, Linda Vlay, Colleen Walsh-Irwin

Adjunct Clinical Lecturers: Andrea Carson, Elaine Hansen, Harriet Hellman, Jean Lewis, Rita Lincoln, M. Veronica McKinnon, Kathleen Monahan, Jean Mueller

Adjunct Lecturers: Karen Halpern, Mary Jane Johnson, Peter Monsen
The School of Nursing offers two degree programs: a bachelor of science with a major in nursing and a master of science with a major in nursing. The undergraduate curriculum prepares basic baccalaureate students to become knowledgeable participants in the delivery of comprehensive healthcare within hospitals, other healthcare agencies and community settings through upper division and one year accelerated programs. Registered nurses can complete their baccalaureate degree through the registered nurse program or select the BS/MS option to complete both the undergraduate and graduate degree in nursing.

Graduate curriculum prepares students for advanced practice roles as nurse practitioners and clinical nurse specialists in adult health which could include primary, acute and critical care, child health, perinatal and women's health, neonatal health, community and mental health, family health/primary care, and as nurse midwives.

The School of Nursing offers a certificate program for nurses with masters degrees to continue their education by preparing for advanced practice as nurse practitioners in adult health which could include primary, acute and critical care, child health, perinatal and women's health, neonatal health, community and mental health, family health/primary care, and as nurse midwives.

The School of Nursing is accredited by the Commission on Collegiate Nursing Education (CCNE), (202)-887-6791 and the American College of Nurse Midwives (ACNM)

818 Connecticut Ave. NW Suite 900
Washington, DC 20006
Phone (202) 728-9860; Fax (202) 728-9897

Mission Statement

The mission of the School of Nursing is to provide accessible, high quality undergraduate, graduate, and related nursing education to geographically dispersed students representative of all segments of the population. The mission will be accomplished through innovative programs that reflect the need and current trends of society while promoting continuing professional growth.

Philosophy

Nursing education is based on a commitment to meet the health care needs of a complex and culturally diverse society. Such education begins with a comprehensive understanding of human interaction with the environment through a synthesis of the arts, sciences, humanities and life experience. Faculty believes that education is a shared undertaking wherein the faculty are facilitators and the learners are active participants in knowledge development. Ongoing data collection, outcomes evaluation and change based on sound rationale and principles of evidence based practice are inherent components of the educational program.

Faculty believe that nurses must be able to facilitate change in the world's evolving health care environment through communication, negotiation and leadership. Graduates are prepared to provide patient care, recognizing its contextual nature and to adapt evidence-based guidelines to novel circumstances through analytical skills.

Undergraduate Program Objectives

Upon completion of the program the student will be able to:

1. Utilize nursing process to provide health promotion, health maintenance and restoration of diverse populations of patients.
2. Use theory to conceptualize health responses of diverse populations of patients.
3. Apply research findings to improve nursing practice.
4. Apply principles of leadership and management in nursing and healthcare delivery.
5. Demonstrate accountability for quality improvement in nursing practice.
6. Participate in interdisciplinary collaboration to improve healthcare and health outcomes through advocacy, activism and change.
7. Demonstrate ethical and social responsibility.
8. Demonstrate continuous professional development.

Goals

- Educate a diverse population of students for professional nursing practice in a variety of settings
- Provide educational access to geographically dispersed students through innovative programs and evolving technologies
- Contribute to the scholarly development of the profession through integration of theory, research and clinical practice
- Provide an educational foundation to promote cultural competence, ethical sensitivity, leadership and lifelong learning
- Prepare for global improvement of healthcare through individual, collaborative and interdisciplinary efforts
- Provide an environment and infrastructure that supports faculty teaching, scholarship, research, service and practice
- Provide a mechanism for continuous program assessment, outcomes evaluation and improvement
Graduate Program Objectives
Upon completion of the program, the student will be able to:
1. Provide first contact and/or continuing healthcare for diverse populations of patients.
2. Apply theory to provide evidence-based clinically competent care.
3. Utilize research process and methods for analyzing healthcare and outcomes.
4. Distinguish the difference between leadership and management.
5. Contribute to the continuous improvement of healthcare systems.
6. Synthesize knowledge obtained from nursing and related sciences for application to clinical practice to promote the global improvement of healthcare.
7. Promote ethical and social responsibility for quality healthcare.
8. Demonstrate advanced professional development.

Applications
The School of Nursing requires all applications to the various programs to be complete and submitted online by the published deadlines for each program in order to be considered for review by the AAS (Admissions and Academic Standards) Committee. A personal interview may be required of qualified applicants. All applicants who have submitted completed applications will be notified of the decision regarding their application. Deadline information and applications can be found at www.nursing.stonybrook.edu

Non Matriculated Students
For registered nurse or applicants to the masters program selected applicants may begin studies as non matriculated students. Maximum of (6) credits of specified courses may be taken prior to matriculation. All students must file an application for admission to the SON upon the completion of the (6) credits in order to convert to matriculated status. Non-Matriculated study does not guarantee admission to the School of Nursing.

Supporting documents including references should be sent to:
Office of Student Services
Health Sciences Center, Level 2
Stony Brook University
Stony Brook, New York 11794-8276
(631) 444-2111

Advisement/Pre-Admission
Pre-Admission Advisement sessions about study and admission procedures in the SON are offered on the website under The Office of Student Affairs (www.nursing.stonybrook.edu). An appointment must be made to attend a specific session by calling (631) 444-3200.

Student Advisement
Upon admission all students are assigned an academic advisor who is responsible for ongoing academic counseling.

Tuition and Fees*
For detailed information about tuition and fees, see the “Financial Information” section in this Bulletin. A Distance Learning fee is assessed in addition to University tuition and fees* as follows.
Fall $236
Spring $236
Summer $150
*All fees are subject to change without notice.

Financial Aid
Professional traineeship awards may be available for graduate study.

Grading Policy
The School of Nursing follows the grading policies stated in this Bulletin with the following exceptions:
1. D grades are not considered passing on any level of study
2. Courses in which a D grade is earned may be repeated once based on review and approval from the Dean
3. S/U may be assigned to select courses
4. Two grades below C result in academic review for possible termination

Students receiving an incomplete grade in graduate studies may be required by faculty to register for a varying number of credits in HNG 582 Continuing Coursework.

Academic Sanctions
The criteria for students to maintain enrollment in good standing in the School of Nursing are satisfactory performance in all academic and clinical components of the program. Failure to meet standards for academic progression may result in an academic sanction.

Warning Unsatisfactory performance shown by unsatisfactory grades, academic and/or clinical dishonesty, or unprofessional behavior.

Jeopardy Final grade below C in any required course or a cumulative GPA below 2.0 for undergraduates or below 3.0 for graduates or failure to comply with faculty recommendations following academic warning.

Deceleration An interruption in the normal progression through the clinical sequence of courses in any of the nursing programs. Deceleration may be recommended in response to unresolved conditions of warning or jeopardy.
Suspension A mandated temporary leave initiated by the faculty or the clinical instructor/preceptor while questionable actions of a student are being investigated by the Admissions and Academic Standards Committee.

Termination is a mandated expulsion of the student from the nursing major as determined by the Dean. A student may be terminated from the nursing program for any of the following circumstances:
1. As a result of an academic warning or jeopardy
2. As a result of a substantiated suspension
3. As a result of failure to register for two (2) consecutive semesters.

Academic Dishonesty
Academic dishonesty shall be defined as misrepresentation of authorship or in any fashion falsifying part or all of any work submitted or intended to be submitted for academic credit. Such misrepresentation or falsification includes, but is not limited to, the use of supportive documentation, mechanical aids, mutual cooperation not authorized by faculty, or theft of academic materials.

The principles of academic dishonesty also apply to those courses taken during the clinical phases of any program which are taken for credit or otherwise required for completion of the program. Owing to the critical nature of such requirements and student responsibility for the welfare of patients and agencies providing healthcare, academic dishonesty is further defined to include falsification of patient or agency records, violating accepted codes of professional ethics, or engaging in activities which might endanger the health or welfare of patients. If a student is found guilty of academic dishonesty, he or she may be suspended or terminated from the program with the concurrence of the Dean.

Appeals
The School of Nursing’s policies on appeals on academic issues are initiated with the academic advisor and processed through the Committee on Admissions and Academic Standing. If further action is needed, students are advised via that committee. Students appealing a decision by the committee may appeal in writing to the Dean within two weeks after being notified of the decision.

Clinical Practice Responsibilities
To participate in clinical experiences, students must submit the following: a completed health form; record of immunizations and titters; health insurance card; Basic Life Support by August 1st of year of entry and malpractice insurance 1 million/3 million. All students must submit by August 1st yearly renewals of their R.N. license, malpractice insurance, basic life support and health form. Students in the Masters program must submit Student Nurse Practitioner or Midwife Malpractice Insurance of 1 million/3 million. All students must submit yearly renewals of their R.N. license, malpractice insurance, basic life support and health form.

Students must adhere to clinical dress code and school of nursing identification policy. Id badges must be worn at all times while participating in class and clinical experiences. Clinical placements may depend on successful preceptor/student interview. Some clinical agencies may have additional requirements. Students are responsible for arranging personal transportation to and from the clinical site.

Awards, Scholarships and Honors
Degree candidates may receive school or departmental awards for superior performance upon recommendation of the faculty.

Dean’s List
Each semester, part-time students must have completed at least (6) credits of letter-grade work in order to be considered.

Degrees with Distinction
School of Nursing undergraduate students are eligible for Degrees with Distinction. Degrees with Distinction are conferred on candidates for the Bachelor of Science degree who have completed at least 60 credits at Stony Brook, excluding special examination and waiver credit, (or 43 credits for Registered Nurse Baccalaureate at students), and who attain the requisite grade point average (determined by the school). The levels of distinction are suma cum laude, magna cum laude, and cum laude, and constitute approximately the 98th percentile, the 93rd percentile and the 85th percentile, respectively. Attainment of a degree with distinction is indicated on the student’s diploma and permanent academic record.

Honor Society
The Kappa Gamma Chapter of Sigma Theta Tau International was charted in 1988 and is the honor society for the School of Nursing. Graduate and Undergraduate students are eligible based upon criteria as established by Sigma Theta Tau International Inc.

Scholarships and Prizes
School of Nursing graduating students are eligible to apply for, or may be nominated by the School of Nursing Awards Committee, to receive University awards and prizes as they are applicable. School of Nursing students have frequently received the Distinguished Community Service Award. (Refer to the “Academic Regulations and Procedure” section at the beginning of this Bulletin for a complete list of available awards.

Helen Bang Award
Awarded to a student who has demonstrated potential for being an outstanding nurse in medical surgical clinical practice.
Yvonne Corrine Harmon Award
Awarded to a basic baccalaureate student who demonstrates academic excellence with financial need.

Stony Brook Foundation Awards
Prizes are awarded to basic baccalaureate and registered nurse baccalaureate students graduating with the highest grade point average.

Dorothy Popkin Award
A prize is awarded to a basic baccalaureate student who has demonstrated exceptional clinical excellence.

Health Sciences Undergraduate Award
A prize is given to a junior student in the Health Sciences who demonstrates academic excellence and outstanding non-academic service activities on campus and in the community.

Sandra Shaw Student Nurse Practitioner Award
A prize is given to a graduate student currently enrolled in clinical courses and maintaining a “B” average.

Dean’s Award
A certificate is given to a student from each graduate program that demonstrates overall excellence, maintains a high GPA and has contributed recognizably to the graduate program.

David Douglas Memorial Award
To a graduating nursing student who is or is related to a veteran and who has demonstrated academic excellence and service to the aging population.

Ora James Bouey Scholarship
Bi-annual scholarship to undergraduate nursing students of African American and economically disadvantaged backgrounds. Students must maintain and overall GPA of 2.5.

Debbie Whitmore Award
Academic excellence, significant contribution to student life and athletics on campus and within the community.

Doretta Dick Award
Awarded to a graduating student(s) who showed excellence in scholarly writing.

Admission

Academic Requirements for Admission to Upper-Division Undergraduate Program

Applicants to the nursing undergraduate program must achieve upper-division status (57 credits) with a cumulative grade point average of 2.5 to be admitted to the school. The school encourages applications from transfer students as well as applicants from Stony Brook University.

Interested students are advised to complete all general University requirements by the end of their second year of undergraduate work. Refer to “Requirements for the Bachelor’s Degree” in this Bulletin for general requirements. These include a minimum of 57 credits which must be earned prior to beginning the program. Students must have completed courses with a grade of C or higher in the following:

Recommended Courses

Introduction to Computers

Additional Admission Requirements

- Three letters of recommendation
- Evidence of meeting University Health requirements
- Evidence of health and malpractice insurance
- Certification in Basic Life Support for healthcare providers (HCP/BLS) AND
- Technical standards for admission requirements as follows:

Observation

The applicant/nursing student must be able to participate actively in all classroom, clinical and laboratory exercises. The applicant/nursing student must be able to assess and comprehend the condition of all patients assigned to her or him. Such observation and information acquisition usually requires the functional use of visual, auditory, olfactory and somatic senses.

Communication

The applicant/nursing student must be able to communicate effectively and sensitively with patients in order to elicit information, describe changes in mood, activity and posture, assess non-verbal communications, and be able to effectively and efficiently transmit information to patients, fellow students, faculty, staff and all members of the health care team. Skills include verbal, written, and nonverbal abilities consistent with effective communication.

Sensory/Motor

The applicant/nursing student must be able to use the senses of seeing, hearing, touch, and smell to make correct judgments regarding patient conditions for the purpose of demonstrating competence to safely engage in the practice of nursing. The applicant/nursing student must have sufficient motor function to elicit information from patient and be able to execute motor movements reasonably required to provide general care and emergency treatment to patients.
Intellectual-Conceptual, Integrative and Quantitative Abilities

The applicant/nursing student must be able to measure, calculate, analyze, synthesize, and evaluate to engage completely in the safe practice of nursing.

Behavioral and Social Attributes

The applicant/nursing student must have the emotional health to fully use her or his intellectual ability, exercise good judgment, and complete all responsibilities attendant to the diagnosis and care of patients. The practice of nursing requires applicants/nursing students to be able to develop mature, sensitive, and effective relationships with patients and colleagues. To provide safe patient care applicants/nursing students must possess characteristics of adaptability, flexibility, and be able to function in the face of uncertainty. The health care environment requires applicants/nursing students to be able to tolerate physical and emotional stress and continue to function effectively and efficiently. She/he must have a high level of compassion for others, motivation to serve, integrity and a consciousness of social values. Candidates and students must possess sufficient interpersonal skills to interact positively with people from all levels of society, all ethnic backgrounds and all belief systems.

Progression Requirements, Junior to Senior Level

To advance to the senior level, students must have completed at least 84 credits, including all junior level courses of the applicable program (B.B.P. or R.N.B.P.) with grades of C or higher. Students must maintain a cumulative grade point average of 2.0.

Undergraduate Transfer Credit

- Five-year age maximum on courses with a grade of A or B only.
- May transfer up to a maximum of six credits toward another degree.
- Six credits transferred are not counted in GPA from Stony Brook University nor do they count toward residency requirements.

Graduation Requirements

All Health Sciences Center candidates for Bachelor of Science degree must satisfy all University graduation requirements, as well as the Health Sciences Center school requirements for the specific degree. At least 120 credit hours of passing work must have been completed for the Bachelor of Science degree. Each candidate must earn at least 39 credits in upper division courses (numbered 300 and higher) and have an overall cumulative grade point average of at least 2.00.

Basic Baccalaureate Programs

Two-Year Program

The nursing curriculum, concentrated in the upper division years leads to the Bachelor of Science Degree with a major in nursing. Students enter the program having completed two years of general education which must include program prerequisites.

12-Month Accelerated Program

The accelerated basic baccalaureate program is designed for students who have already completed a bachelor's degree, either at the State University of New York at Stony Brook or another comparable institution. The concentrated nurse curriculum leads to a Bachelor of Science degree with a major in nursing.

This second bachelor's degree draws on the prerequisite courses from the humanities and the natural and social sciences as a means of assisting the student to gain comprehensive knowledge of individuals and their responses to actual or potential health problems. Students are provided learning experiences focused on individuals, families, groups and communities. In addition, students are exposed to various models of professional nursing and healthcare. Stony Brook University Medical Center is used as a clinical site along with numerous community agencies.

Admission Requirements

- B.A. or B.S. degree
- Minimum GPA 2.8
- Prerequisite courses:
  - Anatomy and Physiology (6-8 credits)
  - Chemistry I (3-4 credits)
  - Chemistry II or another science
  - e.g. Biology/Genetics/Physics (3-4 credits)
  - Microbiology (3-4 credits)
- Technical standard for admission requirements include: See page 152.

Registered Nurse Baccalaureate Program (including B.S./M.S. Option)

Program Overview

The Registered Nurse Baccalaureate Program curriculum, concentrated in the upper division, leads to the Bachelor of Science Degree with a major in nursing. Students enter the program with either an associate degree or diploma in nursing.

The upper-division nursing major draws on the lower-division prerequisite courses from the humanities and the natural and social sciences as a means of assisting the student to gain comprehensive knowledge of individuals and their responses to actual or potential health problems. Students are provided learning experiences focused on individuals, families, groups and communities. In addition, students are exposed to a variety of models of professional nursing and healthcare. Clinical experiences in a variety of agencies are designed to meet the individual needs of students.

Admission Requirements*

All courses required for admission must be completed prior to enrolling in the School of Nursing at Stony Brook. Official transcripts from each school attended must be submitted in order to transfer the minimum of 57 credits, with a minimum cumulative GPA of 2.5. Grades below C will not be transferred.

*See list of required courses on page 152
**Recommended Courses**

*Introduction to Computers*

**Advanced Placement Nursing Credits (28) for R.N. Students ONLY**

R.N. Baccalaureate students who are employed full time with a minimum of one-year experience must submit a clinical practice portfolio to be evaluated for 28 advanced placement credits.

**Clinical Practice Portfolio**

R.N. Baccalaureate students and Master of Science students with a non-nursing bachelor’s degree are eligible to submit a clinical practice portfolio that will be evaluated for academic credit (R.N. Student) or validation of baccalaureate level nursing competencies (Master of Science Student with a non-nursing bachelor’s degree). These students must have a minimum one year full time clinical experience.

The portfolio must contain, if applicable:
- Current R.N. License
- History of clinical practice employment
- Letter of Comment from Employer
- Professional/Personal development
- Copy of most recent performance evaluation
- Clinical Practice Portfolio Assessment Tool

**Technical Standards for Admission and Retention**

The Stony Brook University School of Nursing faculty has specified technical standards critical to the success of students in any Stony Brook University nursing program. Qualified applicants are expected to meet all academic admission criteria, as well as these technical standards, appropriate to their program of study.

**Observation**

The applicant/nursing student must be able to participate actively in all classroom, clinical, and laboratory exercises. The applicant/nursing student must be able to assess and comprehend the condition of all patients assigned to her or him. Such observation and information acquisition usually requires the functional use of visual, auditory, olfactory and somatic senses.

**Communication**

The applicant/nursing student must be able to communicate effectively and sensitively with patients in order to elicit information, describe changes in mood, activity and posture, assess non-verbal communications, and be able to effectively and efficiently transmit information to patients, fellow students, faculty, staff and all members of the health care team. Skills include verbal, written, and nonverbal abilities consistent with effective communication.

**Sensory/Motor**

The applicant/nursing student must be able to use the senses of seeing, hearing, touch, and smell to make correct judgments regarding patient conditions for the purpose of demonstrating competence to safely engage in the practice of nursing. The applicant/nursing student must have sufficient motor function to elicit information from patient and be able to execute motor movements reasonably required to provide general care and emergency treatment to patients.

**Intellectual-Conceptual, Integrative and Quantitative Abilities**

The applicant/nursing student must be able to measure, calculate, analyze, synthesize, and evaluate to engage completely in the safe practice of nursing.

**Behavioral and Social Attributes**

The applicant/nursing student must have the emotional health to fully use her or his intellectual ability, exercise good judgment, and complete all responsibilities attendant to the diagnosis and care of patients. The practice of nursing requires applicants/nursing students to be able to develop mature, sensitive, and effective relationships with patients and colleagues. To provide safe patient care applicants/nursing students must possess characteristics of adaptability, flexibility, and be able to function in the face of uncertainty. The health care environment requires applicants/nursing students to be able to tolerate physical and emotional stress and continue to function effectively and efficiently. She/he must have a high level of compassion for others, motivation to serve, integrity and a consciousness of social values. Candidates and students must possess sufficient interpersonal skills to interact positively with people from all levels of society, all ethnic backgrounds and all belief systems.

**General Advisement**

Personal advisement sessions about study in the school and admission requirements are by appointment only on Fridays (1:00 p.m. - 4:00 p.m.), except January - February, July-August and holidays. Call 631-444-3200.

**Registered Nurse Baccalaureate to Masters Option**

The program for registered nurses provides the opportunity for practicing nurses to apply for admission to the master’s program while completing study for the bachelor’s degree. Applicants must be fully matriculated in the Registered Nurse Baccalaureate Program and must apply for acceptance to the B.S./M.S. option after:
- all admission and continuation requirements are complete (Clinical Practice Portfolio, R.N. license)
- a minimum of 18 credits of the Registered Nurse Baccalaureate Program have been completed with a minimum GPA of 3.0

Applications for the B.S./M.S. option may be obtained from and returned to the Office of Student Affairs, School of Nursing. Following acceptance to the master’s program, registered nurse baccalaureate students may use elective credits to take a maximum of seven credits in core curriculum requirements in the master’s program while completing their baccalaureate degree.

**Computer-Mediated Distance Learning Programs**

This innovative program utilizes our expert faculty, highly trained computer staff, and the power of Lotus Notes™ as an infrastructure to deliver all didactic coursework, in seven different Masters of Science Nurse Practitioner Specialties and Nurse Midwifery. In addition, the Registered Nurse Baccalaureate program is offered in a distance learning format. These specialties include Adult Nurse Practitioner,
Family Nurse Practitioner, Neonatal Nurse Practitioner, Pediatric Nurse Practitioner, Psychiatric/Mental Health Nurse Practitioner, Perinatal/Women’s Health, and Nurse Midwifery. Our faculty utilizes a variety of teaching modalities that include: lectures, case studies, self-paced worksheets, graphics, links to specific web-sites, interviews, collaborative workshops and examinations. We also maintain many clinical site affiliations throughout the United States and Canada.

For further information about our innovative distance learning programs and how to get started, please call the Office of Student Affairs at (631) 444-3200 or visit: www.nursing.stonybrook.edu

**Academic Requirements for Admission to the Master of Science Programs,* Post Masters Certificate Programs* and Masters Completion Programs**

**Masters of Science Degree (Minimum 45 Credits)**
- Baccalaureate degree with an upper division nursing major (Non-Nursing Bachelor of Science or low cumulative average see information on page 156.)
- Undergraduate grade point average of at least 3.0
- Three letters of recommendation
- Registered professional nurse licensure (required for clinical experience in the United States)
- Three credit undergraduate course in Health Assessment (grade C or better) by advisement
- Three credit undergraduate course in Statistics (grade C or better) by advisement
- Certification in Basic Life Support for healthcare providers (HCP/BLS)
- Evidence of meeting University health requirements
- Technical Standard for Admission and Retention - see below
- Evidence of health and malpractice insurance
- Letter of intent-personal statement

**Post Master’s Advanced Certificate Program (Minimum 18 Credits)**
- Master’s degree in Nursing from an accredited program
- Minimum of one year recent relevant experience in a clinical setting is recommended
- Three letters of recommendation
- Registered professional nurse licensure (required for clinical experience in the United States)
- Three credit undergraduate course in Health Assessment
- Letter of intent-personal statement
- Current vitae/resume
- Certification in Basic Life Support for healthcare providers (HCP/BLS)
- Evidence of meeting University health requirements
- Evidence of health and malpractice insurance
- Technical Standard for Admission and Retention

**Masters Completion Program**
By individual advisement.

**Technical Standards for Admission and Retention**

The Stony Brook University School of Nursing faculty has specified technical standards critical to the success of students in any Stony Brook University nursing program. Qualified applicants are expected to meet all academic admission criteria, as well as these technical standards, appropriate to their program of study.

**Observation**
The applicant/nursing student must be able to participate actively in all classroom, clinical and laboratory exercises. The applicant/nursing student must be able to assess and comprehend the condition of all patients assigned to her or him. Such observation and information acquisition usually requires the functional use of visual, auditory, olfactory and somatic senses.

**Communication**
The applicant/nursing student must be able to communicate effectively and sensitively with patients in order to elicit information, describe changes in mood, activity and posture, assess non-verbal communications, and be able to effectively and efficiently transmit information to patients, fellow students, faculty, staff and all members of the health care team. Skills include verbal, written, and nonverbal abilities consistent with effective communication.

**Sensory/Motor**
The applicant/nursing student must be able to use the senses of seeing, hearing, touch, and smell to make correct judgments regarding patient conditions for the purpose of demonstrating competence to safely engage in the practice of nursing. The applicant/nursing student must have sufficient motor function to elicit information from patient and be able to execute motor movements reasonably required to provide general care and emergency treatment to patients.

**Intellectual-Conceptual, Integrative and Quantitative Abilities**
The applicant/nursing student must be able to measure, calculate, analyze, synthesize, and evaluate to engage completely in the safe practice of nursing.

**Behavioral and Social Attributes**
The applicant/nursing student must have the emotional health to fully use her or his intellectual ability, exercise good judgment, and complete all responsibilities attendant to the diagnosis and care of patients. The practice of nursing requires applicants/nursing students to be able to develop mature, sensitive, and effective relationships with patients and colleagues. To provide safe patient care applicants/nursing students must possess characteristics of adaptability, flexibility, and be able to function in the face of uncertainty. The health care environment requires applicants/nursing

---

*The School of Nursing reserves the right to change admission and program requirements to meet prevailing accreditation and registration requirements. Graduates of these programs are eligible to apply for New York State certification as well as national certification in their respective specialties.*

www.stonybrook.edu/hsbulletin 155
students to be able to tolerate physical and emotional stress and continue to function effectively and efficiently. She/he must have a high level of compassion for others, motivation to serve, integrity and a consciousness of social values. Candidates and students must possess sufficient interpersonal skills to interact positively with people from all levels of society, all ethnic backgrounds and all belief systems.

**Graduate Applications with Non-Nursing Bachelor's Degrees (HSN-D)**

Licensed registered nurses who hold a bachelor's degree in an area other than nursing may be provisionally accepted in the master's program by fulfilling the following admissions requirements:

- 3.0 undergraduate GPA
- Statistics (3 credits undergraduate level)
- Health Assessment course (3 credits undergraduate level)
- BS degree and submission of passing grades on Regents College Examination in Health Restoration I and II and Health Support A and B, or a clinical practice portfolio, within one year of admission, at which time student's status is changed to matriculated. Call (631) 444-3200 to request information and study guides for the examination.

Master of Science students who are not eligible to take the portfolio option will be required to take the Excelsior College examination for non-nursing bachelors degree. Please contact the Office of Student Affairs at (631) 444-3200.

**Graduate Applicants with a Cumulative Undergraduate GPA Below 3.0 (HSN-I)**

Licensed registered nurses who hold a bachelor's degree in nursing with an earned GPA below 3.0 may study as a non-matriculated student and complete six graduate credits (two-three courses) and earn a cumulative grade point average of 3.0 to qualify for matriculation in the Master's Program. Information about the specific courses to be completed will be given during advisement. Students will be permitted to register for one semester only.

**Graduate Transfer Credit**

- Five-year age maximum on courses with a grade of A or B only.
- May transfer up to a maximum of six credits toward another degree.
- Six credits transferred are not counted in GPA from Stony Brook University nor do they count toward residency requirement.

**Challenge Evaluation**

In order to challenge a course, the student must be in good academic standing and have completed:

- All admission required courses
- All continuation requirements, R.N. license, health requirements
- Prerequisite courses to the course being challenged must be successfully completed

- The credits to be challenged plus any previous credits by challenge may not exceed the seven credit limit Challenge credit is not counted as part of semester credit load and does not meet residency requirement. A grade is recorded unless student fails. Students wishing to challenge a course must obtain permission from the course instructor and then file for challenge examination with the Office of Student Affairs.

**Progression Requirements for the Master of Science Program**

- Successful completion of all program required courses
- Maintenance of a cumulative GPA of 3.0 or better
- Satisfactory professional and ethical conduct
- Maintenance of current Registered Professional Nurse license during enrollment in clinical courses and health insurance requirements and malpractice insurance. Graduate students who do not meet the above standards are subject to the same academic sanctions, warning, jeopardy, suspension and dismissal as the undergraduate students.

**Continuing Professional Education**

The School of Nursing's Continuing Professional Education Program has been established to meet the educational demands of a diverse local, national and international adult student population. Many programs are offered to help students meet their educational and career advancement goals.

## School of Nursing

### Core Courses

**HNG 530** Professional Issues in Advanced Nursing Practice 1
**HNG 532** Leadership and Management in Advanced Nursing Practice 2
**HNG 541** Statistical Methods and Scholarly Inquiry 3
**HNG 542** Neonatal Clinical Pharmacology 3
**HNG 543** Applications of Clinical Nursing Research 3
**HNG 564** Advanced Theory & Clinical Practice in Perinatal/Neonatal Health Nursing II: Primary Care Concepts for High Risk Infants 3
**HNG 569** Advanced Theory & Clinical Practice in Perinatal/Neonatal Health Nursing I: Childbearing Family 3
**HNG 577** Families: Theories and Intervention for Advanced Nursing Practice 3
**HNG 578** Advanced Theory & Clinical Practice in Perinatal/Neonatal Health Nursing III: High Risk Neonate I 7
**HNG 579** Advanced Theory & Clinical Practice in Perinatal/Neonatal Health Nursing IV: High Risk Neonate II 7
**HNG 594** Departmental Research: Dept. of Parent/Child Health 3

### Perinatal/Women's Health Nursing HNW (Distance Learning)

Basic Baccalaureate Courses

Lower-Division Elective Courses

HNI 290 Introduction to Nursing

Introduces nursing to those planning a career in nursing, but who are not yet enrolled in the School of Nursing.

Prerequisites: One year at Stony Brook, permission of instructor.

2 credits, spring semester, faculty: community and mental health

Upper-Division Required Courses

HNI 301 Mathematics for Health Care

Emphasizes conversion, math and metric values used in nursing and healthcare.

1 credit, fall semester, junior year, faculty: adult health

HNI 350 Perspectives in Nursing Education and Nursing Practice

Historical, social, economic and political perspectives on the development of nursing education and practice in the United States. Examines social and legal forces influencing the development of nursing and scope of practice.

2 credits, fall semester, junior year, faculty: adult health

HNI 360 Statistical Methods for Health Care Research

This introductory statistics course provides a basic understanding of statistical principles and their application to research underpinning evidence-based practice in health care. The course places an emphasis on practical application of data management, probability testing, statistics and statistical terminology as used to answer research questions and test hypotheses. A variety of case studies are used to allow introductory application of statistics to simple salient and researchable health care problems.

3 credits, summer semester, faculty: parent child health

HNI 362 Ecological Framework for Nursing Practice

Studies the relationship of people to environmental factors affecting health status and functioning. Explores wellness, health and illness as expressions of life processes in interaction with the environment.

2 credits, spring semester, junior year, faculty: community and mental health

HNI 363 Nutrition

Introduces the basic elements of nutrition and normal and therapeutic diets. Assesses nutritional needs and problems of individuals, families, and communities across the life cycle. Emphasizes preventive teaching. Explores selected sociological and ecological implications.

1 credit, modules 4-5, junior year, faculty: adult health

HNI 364 Fundamental Concepts of Nursing Practice

Introduces the role of the nurse as a healthcare provider. Explores critical thinking and decision making in the nursing process. Includes concepts, principles, research findings and current knowledge in the psychological, social, behavioral and physical sciences, and the humanities, to build a conceptual base for professional practice. Focuses on client/environment interactions throughout the life cycle and the fundamental skills necessary to provide therapeutic nursing interventions in a clinical setting.

10 credits, fall semester, junior year, faculty: adult health

HNI 370 Health Assessment

Emphasizes clinical decision making in assessing psychological and physiological health status of individuals throughout the life cycle. Culture, development, environment and support systems are assessed through interviewing, history taking, data collection and physical examination to derive nursing diagnoses, determine priorities and plan therapeutic nursing interventions.

4 credits, fall semester, junior year, faculty: adult health

HNI 373 Psychiatric Mental Health Nursing

Focus is on psychosocial nursing as a continuum of care during the development of children, adults and families in the psychiatric/mental health environment. Theoretical knowledge and clinical practice from the bio/psycho/social cultural model, nursing theories and current research findings are used to assist the student in establishing help as an integral aspect of the nurse-client environment relationship. Case studies and experiential based learning activities are provided to enhance analytical thinking and encourage independent decision-making.

6 credits, spring semester, junior year, faculty: community and mental health

HNI 374 Community Health Nursing

Focus is on developing skills in handling health problems of children, adults and families in community environments. Theoretical knowledge and clinical practice from the bio/psycho/social cultural model, nursing theories and current research findings are used to assist the student in establishing help as an integral aspect of the nurse-client environment relationship. Case studies and experiential based learning
activities are provided to enhance analytical thinking and encourage independent decision-making.  
6 credits, spring semester, junior year, faculty: community and mental health

HNI 440 Research in Nursing  
Introduces the language and process of scientific inquiry with a focus on nursing practice. Critical analysis of nursing research methods and application of findings.  
Prerequisite: Junior level sequence of nursing courses  
2 credits, fall semester, senior year, faculty: parent/child health

HNI 463 Parent/Child Health Nursing I (Obstetrics)  
Introduces the theoretical and clinical practice of nursing with multi-cultural parenting families. Builds on related disciplines in the sciences and the humanities and focuses the nursing process in the context of client/environment interaction.  
6 credits, fall semester, senior year, faculty: parent/child health

HNI 464 Parent/Child Health Nursing II (Pediatrics)  
Introduces the theoretical and clinical practice of nursing with multi-cultural parenting families. Builds on related disciplines in the sciences and the humanities and focuses the nursing process in the context of client/environment interaction.  
6 credits, fall semester, senior year, faculty: parent/child health

HNI 473 Adult Health Nursing  
Assessment, interventions in and evaluation of human responses to complex health problems of individuals in middle and late adulthood.  
9 credits, spring semester, senior year, faculty: adult health

HNI 474 Capstone Nursing Practicum  
Theory and research findings are integrated in an intensive clinical practicum with the opportunity to actualize the professional nurse generalist role.  
3 credits, spring semester, senior year, faculty: adult health

HNI 479 Professional, Managerial, Legal and Ethical Implications for Nursing Practice  
Analyzes legal, economic and political issues confronting the nurse manager in contemporary healthcare. Focuses on theory and principles of leadership.  
Prerequisite: Senior status.  
3 credits, spring semester, senior year, faculty: parent/child health

HBP 310 Pathology  
Studies the basic mechanisms of disease and the pathophysiology of the important illnesses of man. Primarily for Health Sciences students, others admitted with special permission.  
Prerequisite: Permission of instructor, BIO 151 and BIO 152.  
3 credits, fall modules 3-6, Dr. Furie and M. Nuovo

Electives

HNI 366 Group Theory  
Designed to increase the student’s understanding of the behavioral processes inherent in all groups. Emphasis is placed on the interaction between environmental factors, group members and the group itself as it encounters its designated tasks.  
[Prerequisite course for prospective R.N. and BBP undergraduate students only.]  
2 credits, summer semester, faculty: community and mental health

HNI 376 Clinical Assistantship in Nursing Practice  
Focuses on professional role development of the nurse in relation to people/environment interaction, promotion of health and includes 37 hours of preceptored clinical experience. Students receive wages as determined by the hospitals. Elective.  
3 credits, summer semester, faculty: adult health

HNI 482 Directed Studies  
A guided reading program with a selected member of the faculty.  
Prerequisite: Permission of instructor.  
Variable credit and repetitive credit up to four, faculty: all departments

Registered Nurse  
Baccalaureate Courses

Upper-Division Required Courses

HNC 300 Informatics in Nursing  
Designed to provide students with the knowledge and skills necessary for the areas of informatics and information management relevant to effective practice and research in nursing. It will develop use of information technologies in relation to the care of patients, the administration of healthcare facilities and the education of healthcare professionals and consumers.  
Distance Learning Students only  
2 credits

HNC 302 Introduction to Computer Applications  
This course introduces the student to the fundamentals, knowledge and skills needed to be proficient in the use of a windows based computer in a distance education environment.  
1 credit
HNC 310 Pathology
Studies the basic mechanisms of disease and the pathophysiology of the important illnesses of man.
3 credits, faculty: adult health

HNC 330 Fundamentals of Pharmacology I
Covers the basic principles that underlie the action of drugs on physiological processes. The particular application to drugs acting on the autonomic nervous system are discussed in detail.
2 credits, summer and fall semesters, faculty: adult health

HNC 331 Fundamentals of Pharmacology II
A continuation of HNC 330. Covers the action of drugs on individual systems as well as drug-drug interactions emphasizing the mechanisms of action. Surveys therapeutic applications and adverse reactions.
Pre-requisite: HNC 330.
3 credits, spring and summer semesters, faculty: adult health

HNC 340 Novice to Expert
Provides the student with the opportunity to develop their professional role using the principals of critical thinking, communication and decision making.
5 credits, spring and summer semesters, faculty: adult health

HNC 350 Perspectives in Nursing Education and Nursing Practice
Historical, social, economic and political perspectives on the development of nursing education and practice in the United States. Examines social and legal forces influencing the development of nursing and scope of practice.
2 credits, fall and spring semesters, faculty: adult health

HNC 360 Statistical Methods for Health Care Research
This introductory statistics course provides a basic understanding of statistical principles and their application to research underpinning evidence-based practice in health care. The course places an emphasis on practical application of data management, probability testing, statistics and statistical terminology as used to answer research questions and test hypotheses. A variety of case studies are used to allow introductory application of statistics to simple salient and researchable health care problems.
3 credits, summer semester, faculty: parent child health

HNC 370 Health Assessment
Emphasizes clinical decision making in assessing psychological and physiological health status of individuals throughout the lifecycle. Culture, development, environment and support systems are assessed through interviewing, history taking, data collection and physical examination to derive nursing diagnoses, determine priorities and plan therapeutic nursing interventions.
4 credits, fall faculty: adult health

HNC 440 Research in Nursing
Introduces the language and process of scientific inquiry with a focus on nursing practice. Critical analysis of nursing research methods and application of findings.
2 credits, fall and summer semesters, faculty: parent/child

HNC 469 Nursing Practice Family and Community
Focus is on decision making relevant to health promotion, health maintenance and health restoration of individual families and communities within a multicultural society. Analytical thinking, communication and evidence based guidelines are necessary to develop and provide competent nursing care. Interventions for families and communities will be emphasized.
Prerequisites: Successful completion of all professional socialization courses, satisfaction of advanced placement requirement and HNC 370, HBP 310.
5 credits, fall and summer semesters, faculty: community and mental health

HNC 470 Nursing Management Practicum
Studies a selected health-related problem or concern and uses theories and research to design, test and evaluate intervention strategies. Consultation with a faculty mentor and a preceptorial agreement are essential.
Prerequisites: Successful completion of all other required courses and satisfactory faculty assessment of clinical competence for the selected focus of study.
6 credits, fall, spring and summer semesters, faculty: all departments (last class Summer 2006)

HNC 471 Nursing Management Practicum for B.S./M.S. Studies
3 credits, fall, spring and summer semesters, second year, faculty: all departments

HNC 479 Professional, Managerial, Legal, and Ethical Implications for Nursing Practice
Analyzes legal, economic, political issues confronting the nurse manager within the contemporary healthcare setting. Focuses on theory and principles of leadership.
3 credits, spring and summer semesters, faculty: parent/child

HNC 499 Clinical Epidemiology - Population Based
An introduction to epidemiologic principles will be applied to major public health problems in the community.
2 credits, summer semester, faculty: adult health

Electives

HNC 482 Directed Studies
An independent, guided reading program with a selected member of the faculty.
Prerequisite: Permission of instructor.
Variable credit and repetitive credit up to four, all semesters, faculty: all departments
Master of Science Courses

Core Courses: All Tracks (Distance Learning)

HNG 502 Advanced Theory and Role Development: Computer Applications

This course introduces the student to computer applications in distributive learning. The purpose of this course is to provide the knowledge and skill necessary to adapt to a Lotus Notes distributive learning curriculum. The theory of adult education, role of the advanced practice nurse in life long learning and the mechanism by which learning can occur through the use of computer enhanced education will be discussed. Computer laboratory experience will be provided.

1 credit, fall and spring semesters

Core Courses: All Tracks (Except Midwifery) (Distance Learning)

HNG 530 Professional Issues In Advanced Nursing Practice

Provides the knowledge and skills needed to identify, analyze and understand the impact of theory and divergent nursing roles on the development of the discipline of nursing. Reviews and analyzes theoretical basis of nursing practice to assist in the refinement of a theoretical basis for practice as a master's prepared nurse.

1 credits, fall and spring semesters, faculty: all departments

HNG 532 Leadership and Management in Advanced Nursing Practice

Focuses on the leadership management role of the nurse practitioner/clinical nurse specialist within the context of healthcare organizations and their environments.

2 credits, fall and spring semesters, faculty: parent/child, adult health

HNG 540 Clinical Pharmacology (All Tracks)

Clinical applications of the major classifications of drugs. Emphasizes pharmacology and therapeutics. Addresses clinical correlations with applications to special populations using case studies. Prescription writing, patient compliance to drug therapy and application of this knowledge for special patient populations.

3 credits fall, spring, summer semester, faculty: adult health

HNG 541 Statistical Methods and Scholarly Inquiry

To enable students to gain the advanced theoretical knowledge and analytical skills for research utilization in the improvement of quality patient care.

Prerequisites: Admission to Graduate Health Sciences Center Program, undergraduate course in statistics.

3 credits, fall and spring semesters

HNG 543 Applications of Clinical Nursing Research

This is the second of two courses designed to examine research in relation to practice and primary care delivery in nursing and healthcare particular emphasis is on gaining increased understanding of theories and the advantages and disadvantages of various research designs and methodologies. Current clinical nursing research will be used as examples. Student's ability to critically analyze published research studies for relevance and implications for theory and clinical practice will be stressed.

Prerequisites: HNG 541

HNG 577 Families: Theory and Intervention for Advanced Nursing Practice

This course is designed to provide a theoretical and conceptual framework for the NP/CNS and Nurse Midwife in developing therapeutic interventions for individuals and their families. Adult and adolescent developmental theories, the major family theories and crisis intervention theory are examined. Selected family typologies are used to illustrate theoretical concepts. Emphasis is placed on assessment, interventions and development of referral resources.

3 credits, fall and summer semesters, faculty: community and mental health

HNG 582 Continuing Course Work

1-12 credits, faculty: all departments

Core Courses: Nurse Midwifery Program (Distance Learning)

HNG 555 Conceptual Frameworks in Midwifery I

There are four modules in this course, each providing a paradigm, or framework, for midwifery practice. The first module explores the paradigm of wellness, utilizing the tools of personal lifestyle assessment and examining the physiological and psychological human responses to stress. The second will focus on the epidemiology of perinatal outcomes and will examine international and regional statistics. The third module introduces the theme of communication strategies. The fourth module builds on the theme of communication strategies introducing key concepts in educational theory.

2 credits, faculty: parent/child

HNG 556 Conceptual Frameworks in Midwifery II

This course with three modules is designed to inform students about the profession of midwifery, especially the history and development of the profession and the contributions of the early midwives, the Federal government and other "midwifery friendly" institutions in the United States. A discussion of the role of the Federal government, especially the Children's Bureau and the Maternity Center Association, will also be prevented. Module Two presents the structure, function and major accomplishments of the American College of Nurse-Midwives (ACNM), along with the essential policies and documents of the organization. The student will participate in discussion of the different expressions of midwifery preparation for practice. Module three focuses on the philosophy of midwifery practice and how the care differs from other providers. This module analyzes the process of role transition from nurse to midwife, from novice to expert. The student will learn about the process of change, strategies to overcome resistance to change and why the nurse midwife must act as a change agent. An introduction to the
“evidence-based” concept that guides the practice of midwifery is also discussed. Module four discusses the various state to state legislative, licensure and certification issues.
2 credits, faculty: parent/child

HNG 558 Conceptual Frameworks in Midwifery III
The course is designed to facilitate an understanding of issues confronting the health care delivery system and its impact on individual practice. In addition, it is designed to transition the student into the realm of independent practice as a culturally-sensitive practitioner with the rudimentary tools for success in a variety of practice settings.
2 credits, faculty: parent/child

HNG 559 Conceptual Frameworks in Midwifery IV
This course consists of community applications: students will bring the process of birth and/or the profession of midwifery to the attention of the public. This course will require that you demonstrate knowledge of the principles of individual, group and community education. All required work should reflect an application of these principles as well as promulgation of the philosophy of midwifery. This course should be fun and help instill in each of you a sense of the responsibilities that we as midwives have beyond the provision of clinical care.
1-2 credits, faculty: parent/child

Please refer to Master of Science core courses:

HNG 577, HNG 541, HNG 543, HNG 540*
*These are also Midwifery core courses.

Child Health Required Courses (Distance Learning)

HNG 504 Conceptual Framework for Parent Child Nursing
The course focuses on the critical analysis of the Parent-Child Health advanced role specialization within the discipline of nursing. Through examination of current research and evolving conceptual models, students will examine how knowledge in the discipline of nursing and the specialization of Parent-Child nursing has been generated, changed, validated and organized into emerging paradigms. Broad viewpoints, values and perspectives adopted by Parent-Child theoreticians and researchers will be explored. The purpose of this course is to increase the knowledge base necessary for the advanced role specialization in Parent-Child health within the discipline.
2 credits, summer semesters, faculty: parent/child

HNG 507 Parenting: Anticipatory Guidance
This course critically examines issues, knowledge and skills which facilitate optimal parent/child health outcomes. Concepts from humanities, health related and nursing sciences provide a knowledge based for parenting and parent education. Anticipatory guidance, as a therapeutic nursing intervention, will be the focus of the course.
2 credits, spring, summer semesters, faculty: parent/child

HNG 518 Advanced Theory and Clinical Practice in Child Health Nursing I
The focus of this course is the development of critical thinking and clinical decision making as essential components of the advanced practice role. The major emphasis will be on analyzing and exploring common primary health problems of infants, children, and adolescents and developing optimum client outcomes that promote cost-effective, quality health care within the context of a multicultural society. Health assessments will integrate the concepts, theories, and principles underlying advanced assessment, diagnosis, and management of common health problems of infants, children, and adolescents within the context of their families and communities. Knowledge of related health sciences, nursing theories, and research are drawn upon to further develop the framework for the advanced practice role.
Prerequisite: HNG 525
4 credits, fall semester, faculty: parent/child

HNG 520 Selected Topics in Childhood Morbidity
The course is designed to provide the graduate student preparing for an advanced practice role with a broad knowledge base of the physiological and pathophysiological changes that occur during the maturational process from conception through childhood. Emphasis will be placed on the maintenance of wellness and prevention of illness through nursing interventions, perinatal education, and anticipatory guidance.
3 credits, fall semester, faculty: parent/child

HNG 525 Advanced Health Assessment Child Health
This course is designed to enable the student to refine and further develop clinical decision making skills while conducting health assessment of infants, children and adolescents. Emphasis will be placed on assessment of the child's physical, emotional and cognitive development within the context of the family and environment.
2 credits, fall, spring, summer semesters, faculty: parent/child

HNG 528 Advanced Theory and Clinical Practice in Child Health Nursing II
This is the second of four sequential courses designed to expand and integrate concepts, theories and principles underlying advanced assessment, diagnosis and management of common health problems of children within the context of their families and communities. This course prepares students for the advanced practice role of the pediatric nurse practitioner/clinical nurse specialist in an environment conducive to analytic skills, clinical decision making and reflections on practice in a multi-cultural society. Clinical research is drawn upon to further develop the framework for the advanced practice role.
Prerequisites: HNG 518*
4 credits, spring and summer semesters, faculty: parent/child
* Must be taken prior to or concurrent with clinical courses

HNG 538 Advanced Theory and Clinical Practice in Child Health Nursing III
This is the third of four sequential courses and is designed to create an environment conducive to analytic skills, clinical
decision making and reflections on practice. Reality based clinical problems in primary care of children with chronic and/or medically fragile conditions will be developed, expanded, explored, critically analyzed and critiqued by students. Evidence based practice is drawn upon to further develop the framework for the advanced practice role.

Prerequisite: HNG 528
5 credits, fall and spring semesters, faculty: parent/child

HNG 548 Advanced Theory and Clinical Practice in Child Health Nursing IV
This is the last of a series of four courses designed to provide students an opportunity to evaluate critically the role of the Pediatric Nurse Practitioner and Clinical Nurse Specialist in the care of children and their families. Care will be taken to integrate advanced nursing practice, leadership, management, research and expert clinical practice in diagnosing, treating and managing children with particular healthcare needs.
Prerequisite: HNG 538
4 credits, spring and summer semesters, faculty: parent/child

Perinatal/Women’s Health Required Courses
(Distance Learning)

HNG 501
The student explores and analyzes common health problems as experienced by women from young adulthood through old age. Optimum client outcomes are emphasized in the development of client specific management plans. The clinical components of primary care are practiced in women’s health care settings. An emphasis is placed on application of evidence-based screening guidelines.

HNG 504 Conceptual Framework for Parent Child Nursing
The course focuses on the critical analysis of the Parent-Child Health advanced role specialization within the discipline of nursing. Through examination of current research and evolving conceptual models, students will examine how knowledge in the discipline of nursing and the specialization of Parent-Child nursing has been generated, changed, validated and organized into emerging paradigms. Broad viewpoints, values and perspectives adopted by Parent-Child theoreticians and researchers will be explored. The purpose of this course is to increase the knowledge base necessary for the advanced role specialization in Parent-Child health within the discipline.
2 credits, fall and summer semesters, faculty: parent/child

HNG 507 Parenting: Anticipatory Guidance
This course critically examines issues, knowledge and skills which facilitate optimal parent/child health outcomes. Concepts from humanities, health related and nursing sciences provide a knowledge based for parenting and parent education. Anticipatory guidance, as a therapeutic nursing intervention, will be the focus of the course.
2 credits, spring, summer semesters, faculty: parent/child

HNG 514 Advanced Theory and Clinical Practice in Perinatal Women’s Health I
Health assessment of women and clinical judgment for advanced nursing practice in parent/child nursing. Laboratory practice sessions and selected clinical experiences including prenatal, gynecologic.
4 credits, fall semester, faculty: parent/child

HNG 588 Clinical Pathobiology
This is a graduate course which uses the case study approach and focuses on the underlying principles of modern experimental pathology. Focuses on the clinical aspects of the body system, including relevant underlying biochemistry structure, or pathophysiology at the organ, tissue, cell or molecular end.
3 credits, fall semester, faculty: all

HNG 524 Advanced Theory and Clinical Practice in Perinatal Women’s Health II
Strategic family-centered healthcare for normal, low-risk childbearing women throughout the prenatal, intrapartum, postpartum, interconception and early parenting periods.
Prerequisites: HNG 504 and 514
4 credits, spring semester, faculty: parent/child

HNG 531 Advanced Health Assessment of Women
This course is designed to prepare the students to enter the clinical setting. It will prepare them to conduct outpatient visits in well women gynecology, family planning and antepartum.
Prerequisite: HNG 501
2 credits

HNG 534 Advanced Theory and Clinical Practice in Perinatal Women’s Health III
Emphasizes early detection and management of reproductive risk to maximize perinatal outcome for the high-risk childbearing family.
Prerequisites: HNG 504, 514 and 524
5 credits, fall semester, faculty: parent/child

HNG 554 Advanced Theory and Clinical Practice in Perinatal Women’s Health IV
Provides advanced practicum and implementation and evaluates the role of the nurse practitioner/clinical specialist in a specialized healthcare setting of the student’s choice. Emphasizes integration of advanced nursing practice, nursing research and the leadership component of the clinical specialization.
Prerequisites: HNG 504, 514, 524, 534 or 544
4 credits, spring semester, faculty: parent/child

Neonatal Health Required Courses
(Distance Learning)

HNG 504 Conceptual Framework for Parent Child Nursing
The course focuses on the critical analysis of the Parent-Child Health advanced role specialization within the discipline of
nursing. Through examination of current research and evolving conceptual models, students will examine how knowledge in the discipline of nursing and the specialization of Parent-Child nursing has been generated, changed, validated and organized into emerging paradigms. Broad viewpoints, values and perspectives adopted by Parent-Child theoreticians and researchers will be explored. The purpose of this course is to increase the knowledge base necessary for the advanced role specialization in Parent-Child health within the discipline.

2 credits, fall and summer semesters, faculty: parent/child

HNG 507 Parenting: Anticipatory Guidance

This course critically examines issues, knowledge and skills which facilitate optimal parent/child health outcomes. Concepts from humanities, health related and nursing sciences provide a knowledge-based foundation for parenting and parent education. Anticipatory guidance, as a therapeutic nursing intervention, will be the focus of the course.

2 credits, spring, summer semesters, faculty: parent/child

HNG 513 Advanced Health Assessment of the Neonate and Infant

This course will be centered on assessment of physical, behavioral and cognitive development of the neonate and infant within the context of their family and environment. Emphasis will be placed on the development of diagnostic reasoning and clinical decision-making skills as essential components of the advanced practice role.

2 credits, Available to Class 10 and beyond, faculty: parent/child

HNG 522 Advanced Topics in Fetal & Neonatal Pathophysiology

This course is designed to provide the graduate student preparing for an advanced practice role in perinatal/neonatal health with a broad knowledge base of the physiological and pathophysiological changes that occur during the maturation process from conception through infancy. Emphasis will be placed on the development of diagnostic reasoning and clinical decision-making skills as essential components of the advanced practice role.

3 credits, faculty: parent/child

HNG 542 Neonatal Clinical Pharmacology

The course will be centered on pharmacotherapeutic management of selected neonatal conditions with major emphasis on the development of diagnostic reasoning and clinical decision making skills as essential components of the advanced practice role. Learners will explore and analyze pharmacologic issues relevant to the neonate and infant in the intensive care and primary care settings as well as potential consequences of maternal drug therapy on the fetus. Currency in knowledge of the principles of clinical and basic pharmacology is a essential prerequisite of this course.

HNG 564 Advanced Theory & Clinical Practice in Perinatal/Neonatal Health Nursing II:
Primary Care Concepts for High Risk Infants

Emphasis placed on the advanced assessment skills required to provide primary care to high-risk infants and their families within the context of a pluralistic society. The biological and psychosocial aspects are studied as a basis for nursing practice. Emphasis is placed on the role of the neonatal nurse practitioner in improving the provision of primary care and follow-up services to high-risk infants with the purpose of decreasing mortality and morbidity rates and improving the quality of life for these infants after discharged from the intensive care nursery.

3 credits, fall semester, faculty: parent/child

HNG 569 Advanced Theory and Clinical Practice in Perinatal/Neonatal Health Nursing I:
Childbearing Family

Emphasis is placed on advanced assessment of the childbearing family. All components of this comprehensive assessment are integral to the development of differential diagnoses and management plans for high-risk neonates and their families and will form the foundation for clinical decision-making required in the advanced practice role of the neonatal nurse practitioner. Parenting and the needs of the family in the context of a pluralistic society are emphasized.

3 credits, spring semester, faculty: parent/child

HNG 578 Advanced Theory and Clinical Practice in Perinatal/Neonatal Health Nursing III:
High Risk Neonate I

Emphasis is placed on the development of diagnostic reasoning and clinical decision-making skills as essential components of the advanced practice role in providing care to high-risk infants and their families in the acute care setting. Nursing theory and research for health promotion and management of the neonate and family within the context of a pluralistic society will be explored.

7 credits, fall semester, faculty: parent/child

HNG 579 Advanced Theory and Clinical Practice in Perinatal/Neonatal Health Nursing IV:
High Risk Neonate II

Emphasis is placed on the development of diagnostic reasoning and clinical decision-making skills as essential components of the advanced practice role in providing care to high-risk infants and their families in the acute care setting. The role of the neonatal nurse practitioner in improving the provision of care to high-risk infants with the purpose of decreasing mortality and morbidity rates and improving their quality of life is explored. Parenting and the needs of the family in the context of a pluralistic society are stressed.

2-7 credits, spring semester, faculty: parent/child
Adult Health Required Courses (On Site and Distance Learning)

**HNG 515 Advanced Health Assessment Across the Life Span**

Provides diagnostic reasoning and a regional approach to a physical exam in the health assessment process. Functional health patterns and biomedical models constitute the theoretical framework.

4 credits, faculty: adult health

**HNG 519 Advanced Theory and Clinical Practice in Adult Health Nursing I**

Clinical problem solving and decision making skills essential to assessing and diagnosing health status, health risks, illness and functional/ dysfunctional health patterns of adults and their families. Resources, strengths and limitations are used as a basis to collaborate with adult-patient/families and/or other healthcare providers to plan therapeutic interventions to promote, maintain or restore health.

Prerequisite: Course in health assessment

Co-requisites: HBP 511; HNG 530

4 credits, faculty: adult health

**HNG 529 Advanced Theory and Clinical Practice in Adult Health Nursing II**

Builds upon the diagnostic process to develop advanced clinical problem solving skills in diagnosing, treating and managing a patient/family with health problems and dysfunctional patterns. Therapeutic interventions are planned to promote health, treat illness, manage chronic disease and limit disabilities by enhancing problem solving and self care abilities of adults and their families.

Prerequisites: HNG 519, HNG 530, HBP 511

Co-requisites: HNG 577, HNG 540

5 credits, faculty: adult health

**HNG 539 Advanced Theory and Clinical Practice in Adult Health Nursing III**

Emphasizes coordination, consultation and interaction components of case management to promote, maintain and/or restore health in groups of adult patients in acute and critical care settings.

Prerequisites: HNG 529, HNG 540, HBP 511

5 credits, faculty: adult health

**HNG 549 Advanced Theory and Clinical Practice in Adult Health Nursing IV**

A capstone experience for students to be mentored by faculty in experiencing full enactment of the roles and functions of the NP/CNS. Students identify the patient populations with whom they plan to practice, negotiate for placement in a self selected practice setting, implement the roles and functions of NP/CNS, terminate and evaluate this experience in advanced practice in adult healthcare.

Prerequisites: HNG 539

5 credits, faculty: adult health

**HNG 588 Clinical Pathobiology**

This is a graduate course which uses the case study approach and focuses on the underlying principles of modern experimental pathology. Focuses on the clinical aspects of the body system, including relevant underlying biochemistry structure, or pathophysiology at the organ, tissue, cell or molecular end.

3 credits, fall semester, faculty: all

**HBP 511 Clinical Pathobiology**

For graduate students who have obtained primary healthcare baccalaureate degrees through the case study approach. Covers the underlying principles of modern experimental pathology. Focuses on the clinical aspects of the body system, including relevant underlying biochemistry, structure, or pathophysiology at the organ, tissue, cell or molecular level.

Prerequisites: Undergraduate degree, healthcare experience, biochemistry or cell biology, anatomy and microbiology.

3 credits, fall and spring modules, Dr. Galanakis

Family Health Required Courses (Distance Learning)

**HNG 515 Advanced Health Assessment Across the Life Span**

Provides diagnostic reasoning and a regional approach to physical exam in the health assessment process. Functional health patterns and biomedical models constitute the theoretical framework of credits.

4 credits, faculty: adult health

**HNG 572 Advanced Theory and Clinical Practice in Family Health Nursing I**

This is the first of four sequential clinical courses. The major emphasis is on clinical decision making and critical thinking. Students will explore and analyze common health problems as experienced by individuals and families across life spans.

4 credits, faculty: adult health

**HNG 573 Advanced Theory and Clinical Practice in Family Health Nursing II**

This is the second of four sequential courses designed to develop advanced clinical decision making skills in diagnosing, treating illness, managing chronic disease and limiting disabilities by enhancing problem solving and self care abilities of individuals across the life span.

5 credits, faculty: adult health

**HNG 574 Advanced Theory and Clinical Practice in Family Health Nursing III**

This is the third course of four sequential advanced clinical courses. Coordination, consultation and interaction components of case management are emphasized to promote, maintain and/or restore health in families in primary care settings.

5 credits, faculty: adult health

**HNG 575 Advanced Theory and Clinical Practice in Family Health Nursing IV**

This is the culminating course of the four sequential advanced clinical courses. It is designed to develop advanced clinical decision making skills in diagnosing, treating and managing an individual across the life span with health problems.

5 credits, faculty: adult health
**HNG 588 Clinical Pathobiology**
This is a graduate course which uses the case study approach and focuses on the underlying principles of modern experimental pathology. Focuses on the clinical aspects of the body system, including relevant underlying biochemistry structure, or pathophysiology at the organ, tissue, cell or molecular end.
3 credits, fall

**HNG 590 Selected Topics in Pathophysiology: Child Health**
Focuses on pathophysiology and morbidity in children. Concepts relevant to implications and strategies for health promotion through nursing interventions, patient education and anticipatory guidance are discussed.
1 credit, faculty: adult health

**HNG 591 Selected Topics in Pathophysiology: Women's Health**
Focuses on the anatomic, physiologic and pathophysiologic changes that women experience throughout the developmental phases of their lifespan.
1 credit, faculty: adult health

**HNG 592 Selected Topics in Pathophysiology: Adult Health**
Focuses on pathophysiology and morbidity in adults. Concepts relevant to implications and strategies for health promotion through nursing interventions, patient education and anticipatory guidance are discussed.
1 credit, faculty: adult health

**Psychiatric/Mental Health Nursing Required Courses**

*(On-Site and Distance Learning)*

**HNG 515 Advanced Health Assessment Across the Life Span**
Diagnostic reasoning skills and a regional approach to the physical exam in the health assessment process. Functional health patterns and biomedical models constitute the theoretical framework.
4 credits, spring, summer semesters, faculty: adult health

**HNG 517 Advanced Theory and Clinical Practice in Psychiatric/Mental Health Nursing I**
Provides a theoretical and conceptual foundation for the advanced practice of Psychiatric/Mental Health Nursing. The concept of mental health is based upon a comprehensive understanding of human interaction with the environment through a synthesis of arts, sciences, humanities and life experience. Emphasis will be placed on the importance theory plays in defining knowledge necessary to assess human behavior, diagnose illness and to implement and evaluate treatment related to psychopathology.
Prerequisite: HNG-557
Corequisite: HNG-557
4 credits, fall semester, faculty: community and mental health

**HNG 527 Advanced Theory and Clinical Practice in Psychiatric/Mental Health Nursing II**
Provides advanced knowledge and skills inherent in the diagnosis of mental disorders as related to etiology, psychopathology, practice and research. A variety of treatment models that provide a foundation for psychotherapeutic interventions will be explored, analyzed and applied to meet the needs of a complex and culturally diverse society.
Prerequisite: HNG 517
5 credits, spring semester, faculty: community and mental health

**HNG 537 Advanced Theory and Clinical Practice in Psychiatric/Mental Health Nursing III**
Provides the knowledge and skills in the nursing diagnosis and therapeutic nursing interventions of mental disorders in special populations in a multicultural society. The variety of therapeutic roles for the NP/CNS in Psychiatric/Mental Health nursing will be analyzed to provide a framework for advanced practice.
Prerequisite: HNG 527
5 credits, fall semester, faculty: community and mental health

**HNG 547 Advanced Theory and Clinical Practice in Psychiatric/Mental Health Nursing IV**
Provides students with the opportunity to implement and evaluate the role of the nurse practitioner/clinical nurse specialist within the nursing discipline in a specialty area of their choice. Emphasis will be placed on integration of the advanced nursing practice role, nursing research and the leadership component in the clinical specialization. Concepts of clinical practice as they relate to the specialty area in a culturally diverse society will be explored and analyzed so that therapeutic nursing interventions are linked with patient outcomes. Students will be expected to implement their role as advanced nurse practitioner, terminate and evaluate the experience.
Prerequisites: HNG 537
5 credits, spring semester, faculty: community and mental health

**HNG 557 Clinical Perspectives of Neurophysiology**
This course is based on the core concepts in Neurophysiology which are integral to the clinical practice of advanced psychiatric mental health nurses. A major focus involves understanding the neurophysiological theories of major psychiatric/mental health disorders, neurological assessment and the mechanisms of psychopharmacology.
Prerequisites: HNG 517, HNG 527, or permission of instructor
2 credits, fall semester, faculty: community and mental health

**Nurse Midwifery Required Courses**

**HNG 501 Primary Care**
The student explores and analyzes common health problems as experienced by women from young adulthood through old age. Optimum client outcomes are emphasized in the development of client specific management plans. The clinical components of primary care are practiced in women's health
care settings. An emphasis is placed on application of evidence-based screening guidelines.

3 credits, faculty: parent/child

**HNG 531 Advanced Health Assessment of Women**

This course is designed to prepare the students to enter the clinical setting. It will prepare them to conduct outpatient visits in well women gynecology, family planning and antepartum

Prerequisite: HNG 501

Corequisite: HNG 581

2 credits

**HNG 550 Clinical Nursing Research**

Relates to theory, clinical practice and primary care delivery in nursing. Emphasizes gaining increased understanding of theories and the advantages and disadvantages of various research designs and methodologies. Stresses ability to critically analyze published research for relevance and implications for theory and clinical practice.

Prerequisite: Undergraduate statistics

3 credits, fall and spring semesters, faculty: family/community

**HNG 581 Midwifery I**

This is the first of four sequential courses, each containing the didactic content associated with the clinical practice of midwifery. Providing reproductive anatomy and physiology as a foundation, the course focuses on development of clinical decision making for the diagnosis and management of gynecologic care of women across the life-span. The course utilizes the conceptual frameworks of wellness, health promotion and disease prevention. The course is designed to foster the effective use of communication strategies in documentation, client education and advocacy for women.

Effective coordination of care, integration of evidence-based practice, and application of bioethical principles of care are emphasized. This course develops the paradigm of family-centered, community-based healthcare, which respects multicultural traditions and lifestyle variations.

Prerequisite: HNG 501 (May be taken as a co-requisite)

2 credits

**HNG 585 Midwifery II**

This course, Antepartum Care, will introduce the student to the midwifery management process in the primary care of women during the antepartal period. The conceptual frameworks of wellness, health promotion and disease prevention, and the effective use of communication strategies in documentation, client education and advocacy will be emphasized. This course develops the paradigm of family-centered, community-based healthcare, which respects multicultural traditions and lifestyle variations. Students will continue with the provision of “outpatient” care to women during this course. This will mark the beginning of the student’s provision of care to women.

Prerequisites: HNG 501, HNG 581

5 credits

**HNG 586 Midwifery III**

There are two modules in this course. This course will emphasize the normalcy of labor and birth as a physiologic and developmental process. The use of conceptual frameworks of wellness, health promotion and disease prevention will be emphasized. The use of communication and collaborative strategies will be emphasized to build upon the strengths of families and communities and minimize technological intervention. Intrapartum clinical practice is to begin only after the student has completed the bulk of this course and attended the second of the two clinical teaching residencies.

Prerequisites: HNG 581, HNG 585, HNG 531

Co-requisites : HNG 556

3 credits, faculty: parent/child

**HNG 587 Midwifery IV**

This is the third in a sequence of courses designed to prepare the midwife for clinical practice. There are three modules: Out of Hospital Birth, Postpartum and Newborn Care. The organizing framework of this course is continuity of care, emphasizing family centered community-based healthcare and the normalcy of birth.

Prerequisites: HNG 581, HNG 585, HNG 531, HNG 556, HNG 586

Co-requisite: HNG 558

5 credits, faculty: parent/child

---

**Nurse Practitioner Post-Master’s Program Required**

**Courses-All Tracks**

**HNG 515 Advanced Health Assessment Across the Life Span**

Provides diagnostic reasoning skills and a regional approach to physical exam in the health assessment process. Functional health patterns and biomedical models constitute the theoretical framework.

4 credits, fall semester, faculty: adult health/child health

OR

**HNG 525 Advanced Child Health Assessment**

This course is designed to enable the student to refine and further develop clinical decision making skills while conducting health assessment of infants, children and adolescents. Emphasis will be placed on assessment of the child’s physical, emotional and cognitive development within the context of the family and environment.

2 credits, fall, spring, summer semesters, faculty: parent/child health

**HNG 535 Theory and Role Transition in Advanced Nursing Practice**

Reviews and analyzes the historical and theoretical basis of nursing practice to assist in the projection of new applications and questions for the nurse practitioner role. Rationales and strategies for planning role transition and gaining identity as a nurse practitioner are developed through focused
Perinatal/Women's Health Required Courses in Specialty

**HNG 514 Advanced Theory and Clinical Practice in Perinatal Women's Health Nursing I**

Health assessment of women and neonates and clinical judgment for advanced nursing practice in parent/child nursing. Laboratory practice sessions and selected clinical experiences including prenatal, gynecologic and the newborn. 4 credits, fall semester, faculty: parent/child

**HNG 524 Advanced Theory and Clinical Practice in Perinatal Women's Health Nursing II**

Strategic family-centered healthcare for normal, low-risk, childbearing women throughout the prenatal, intrapartum, postpartum, interconception and early parenting periods. Prerequisites: HNG 504 and 514 4 credits, fall semester, faculty: parent/child

**HNG 534 Advanced Theory and Clinical Practice in Perinatal Women's Health Nursing III**

Emphasizes early detection and management of reproductive risk to maximize perinatal outcome for the high-risk childbearing family. Prerequisites: HNG 504, 514 and 524 5 credits, spring semester, faculty: parent/child

**HNG 554 Advanced Theory and Clinical Practice in Perinatal Women's Health Nursing IV**

Provides advanced practicum and implementation and evaluates the role of the nurse practitioner/clinical specialist in a specialized healthcare setting of the student's choice. Emphasizes integration of advanced nursing practice, nursing research and the leadership component of the clinical specialization.

**Child Health**

**HNG 518 Advanced Theory and Clinical Practice in Child Health Nursing I**

This is the first of four sequential courses designed to promote the development of analytic skills and clinical decision making as essential components of the advanced practice role. The major emphasis will be on analyzing and exploring common primary health problems of infants, children and adolescents and developing optimum client outcomes that promote cost-effective, quality healthcare within the context of a multicultural society. Prerequisite: HNG 525 4 credits, fall, spring, summer semesters, faculty: parent/child

**HNG 520 Selected Topics in Childhood Morbidity**

Pathophysiology and morbidity in children. Eclectic topics are at the cutting edge of science and discovery of knowledge. Discusses concepts relevant to implications and strategies for health promotion through nursing interventions, patient education and anticipatory guidance. 2 credits, fall, spring, summer semesters, faculty: parent/child

**HNG 525 Advanced Child Health Assessment**

This course is designed to enable the student to refine and further develop clinical decision making skills while conducting health assessment of infants, children and adolescents. Emphasis will be placed on assessment of the child's physical, emotional and cognitive development within the context of the family and environment. 3 credits, fall, year, spring, summer semesters, faculty: parent/child

**HNG 528 Advanced Theory and Clinical Practice in Child Health Nursing II**

This is the second of four sequential courses designed to expand and integrate concepts, theories and principles underlying advanced assessment, diagnosis and management of common health problems of children within the context of their families and communities. This course prepares students for the advanced practice role of the pediatric nurse practitioner/clinical nurse specialist in an environment conducive to analytic skills, clinical decision making and reflections on practice in a multi-cultural society. Prerequisites: HNG 518 4 credits, fall, spring, summer semesters, faculty: parent/child

**HNG 538 Advanced Theory and Clinical Practice in Child Health Nursing III**

This is the third of four sequential courses and is designed to create an environment conducive to analytic skills, clinical decision making and reflections on practice. Reality based clinical problems in primary care of children with chronic and/or medically fragile conditions will be developed, expanded, explored, critically analyzed and critiqued by students. Prerequisite: HNG 528 5 credits, fall, spring, summer semesters, faculty: parent/child
HNG 548 Advanced Theory and Clinical Practice in Child Health Nursing IV
This is the last of a series of four courses designed to provide students an opportunity to evaluate critically the role of the Pediatric Nurse Practitioner and Clinical Nurse Specialist in the care of children and their families. Care will be taken to integrate advanced nursing practice, leadership, management, research and expert clinical practice in diagnosing, treating and managing children with particular healthcare needs. Concepts of clinical practice will be related to outcome-based research.
Prerequisite: HNG 538
4 credits, fall, spring, summer semesters, faculty: parent/child

Adult Health

HNG 515 Advanced Health Assessment Across the Life Span
Diagnostic reasoning skills and a regional approach to physical exam in the health assessment process. Functional health patterns and biomedical models constitute the theoretical framework.
4 credits, fall semester, faculty: adult health

HNG 519 Advanced Theory and Clinical Practice in Adult Health Nursing I
Clinical problem solving and decision making skills essential to assessing and diagnosing health status, health risks, illness and functional/ dysfunctional health patterns of adults and their families. Resources, strengths and limitations are used as a basis to collaborate with adult patient/families and/or other healthcare providers to plan therapeutic interventions to promote, maintain or restore health.
Prerequisite: HNG 515, HNG 540
4 credits, fall semester, faculty: adult health

HNG 529 Advanced Theory and Clinical Practice in Adult Health Nursing II
Builds upon the diagnostic process to develop advanced clinical problem solving skills in diagnosing, treating and managing a patient/family with health problems and dysfunctional patterns. Therapeutic interventions are planned to promote health, treat illness, manage chronic disease and limit disabilities by enhancing problem solving and self-care abilities of adults and their families.
Prerequisites: HNG 519
Co-requisites: HNG 577, 540
5 credits, spring semester, faculty: adult health

HNG 539 Advanced Theory and Clinical Practice in Adult Health Nursing III
Emphasizes coordination, consultation, and interaction components of case management to promote, maintain and/or restore health in groups of adult patients in acute and critical-care settings.
5 credits, fall semester, faculty: adult health

HNG 549 Advanced Theory and Clinical Practice in Adult Health Nursing IV
A capstone experience for students to be mentored by faculty in experiencing full enactment of the roles and functions of the NP/CNS. Students identify the patient populations with whom they plan to practice, negotiate for placement in a self-selected practice setting, implement the roles and functions of NP/CNS, terminate and evaluate this experience in advanced practice in adult healthcare.
5 credits, spring semester, faculty: adult health

HNG 592 Selected Topics in Pathophysiology: Adult Health
Pathophysiology and morbidity in adults. Concepts relevant to implications and strategies for health promotion through nursing interventions, patient education and anticipatory guidance are discussed.
1 credit, year, faculty: parent/child

Neonatal Health

HNG 522 Advanced Topics in Fetal and Neonatal Pathophysiology
This course is designed to provide the graduate student preparing for an advanced practice role in perinatal/neonatal health with a broad knowledge base of the physiological and pathophysiological changes that occur during the maturation process from conception through infancy. Emphasis will be placed on the development of diagnostic reasoning and clinical decision making skills as essential components of the advanced practice role.
3 credits, faculty: parent/child

HNG 542 Neonatal Clinical Pharmacology
The course will be centered on pharmacotherapeutic management of selected neonatal conditions with major emphasis on the development of diagnostic reasoning and clinical decision making skills as essential components of the advanced practice role. Learners will explore and analyze pharmacologic issues relevant to the neonate and infant in the intensive care and primary care settings as well as potential consequences of maternal drug therapy on the fetus. Currency in knowledge of the principles of clinical and basic pharmacology is an essential prerequisite of this course.
3 credits, faculty: parent/child

HNG 564 Advanced Theory and Clinical Practice in Perinatal/Neonatal Health Nursing II: Primary Care Concepts for High Risk Infants
Emphasis placed on the advanced assessment skills required to provide primary care to high risk infants and their families within the context of a pluralistic society. The biological and psychosocial aspects are studied as a basis for nursing practice. Emphasis is placed on the role of the neonatal nurse practitioner in improving the provision of primary care and follow-up services to high risk infants with the purpose of decreasing mortality and morbidity rates and improving the quality of life for these infants after discharged from the intensive care nursery.
6 credits, fall semester, faculty: parent/child

HNG 532 Leadership and Management in Advanced Nursing Practice
Focuses on the leadership management role of the nurse practitioner/clinical nurse specialist within the context of healthcare organizations and their environments.
2 credits, fall and spring semesters, faculty, parent/child, adult health

HNG 541 Statistical Methods and Scholarly Inquiry
To enable students to gain the advanced theoretical knowledge and analytical skills for research utilization in the improvement of quality patient care.
Prerequisites: Admission to Graduate Health Sciences Center Program, undergraduate course in statistics.
3 credits, fall and spring semesters

HNG 542 Neonatal Clinical Pharmacology
The course will be centered on pharmacotherapeutic management of selected neonatal conditions with major emphasis on the development of diagnostic reasoning and clinical decision making skills as essential components of the advanced practice role. Learners will explore and analyze pharmacologic issues relevant to the neonate and infant in the intensive care and primary care settings as well as potential consequences of maternal drug therapy on the fetus. Currency in knowledge of the principles of clinical and basic pharmacology is an essential prerequisite of this course.

HNG 543 Applications of Clinical Nursing Research
This is the second of two courses designed to examine research in relation to practice and primary care delivery in nursing and healthcare particular emphasis is on gaining increased understanding of theories and the advantages and disadvantages of various research designs and methodologies. Current clinical nursing research will be used as examples. Student’s ability to critically analyze published research studies for relevance and implications for theory and clinical practice will be stressed.
Prerequisites: HNG 541

HNG 564 Advanced Theory & Clinical Practice in Perinatal/Neonatal Health Nursing II: Primary Care Concepts for High Risk Infants
Emphasis placed on the advanced assessment skills required to provide primary care to high risk infants and their families within the context of a pluralistic society. The biological and psychosocial aspects are studied as a basis for nursing practice. Emphasis is placed on the role of the neonatal nurse practitioner in improving the provision of primary care and follow-up services to high risk infants with the purpose of decreasing mortality and morbidity rates and improving the quality of life for these infants after discharged from the intensive care nursery.
3 credits, fall semester, faculty: parent/child

Graduate Program Electives
HNG 500 ECG Monitor Interpretation
This course is designed to enable the nursing student to acquire knowledge and skills needed to identify, analyze and understand ECG monitor interpretation. The course will cover the anatomy and physiology of the heart, the conduction system and 30 basis rhythms including treatment modalities. The course provides the foundation for ECG interpretation for the advanced practice nurse. The role of the advanced practice nurse in recognizing and diagnosing dysrhythmias will be defined and discussed. The course serves as both an introductory course and review course for nurses who wish to refresh their monitor skills prior to entering the clinical setting or attending 12 lead ECG course.
1 credit, summer semester, faculty: adult health

HNG 503 Case Studies in Pharmacotherapeutics I
With major emphasis on the development of clinical decision making and critical thinking skills as essential components of the advanced practice role, this is the first of two courses that builds on the course content of HNG-540, Clinical Pharmacology. Using complex case studies (CV, Respiratory, GI focus) presented in a problem based learning format, students will be guided in their development of the skills required to identify and resolve drug-related problems which are common in clinical practice (adult health, child health, perinatal/women’s health and psychiatric/mental health nursing) and may occur whenever pharmacotherapy is included in a therapeutic regime.
2 credits, summer semester

HNG 505 Case Studies in Pharmacotherapeutics II
With major emphasis on the development of clinical decision making and critical thinking skills as essential components of the advanced practice role, this is the second of two courses that builds on the course content of HNG-540, Clinical Pharmacology. Using complex case studies (neurologic, psychiatric, selected topics) presented in a problem based learning format, students will be guided in their development of the skills required to identify and resolve drug-related problems which are common in clinical practice (adult health, child health, perinatal/women’s health and psychiatric/mental health nursing) and may occur whenever pharmacotherapy is included in a therapeutic regime.
2 credits, summer semester

HNG 506 Alternate Forms of Healing I
This course is designed to introduce the student to an overview of the most popular alternative forms of healing including: biofeedback, clinical hypnosis, meditation, past life therapy, relaxation progression, Reiki, Ro-Hun Therapy, Rubenfeld’s Synergism, Shamanism, Therapeutic Touch, Traeger and Yoga.
3 credits, summer semester

HNG 511 Caring for Patients at the End of Life
This is an elective course focused on nursing care of the adult individual and their family who is nearing death from disease; it will incorporate physical, psychosocial and spiritual dimensions of caring for adults at the end of life.
2 credits
HNG 512 Community Health Promotion: Implications For Nursing Theory and Practice
This elective course will examine theoretical and empirical basis for health promotion and risk reduction in the community. Issues that impact community health promotion and disease prevention programs will be examined. The examples will focus on women and children. Implications for advanced nursing practice and nursing research will be discussed.
3 credits

HNG 515 Advanced Health Assessment Across the Life Span
Diagnostic reasoning skills and a regional approach to a physical exam in the health assessment process. Functional health patterns and biomedical models constitute the theoretical framework.
4 credits, spring, summer semesters, faculty: adult health

HNG 523 Beginner Reiki: Energy Healing for the Health Care Professional
This course assists the student to become proficient in the Reiki method of hands on healing. The student will learn the history of Reiki, the human energy system, assessment of the human energy field and the basic hand positions for giving and receiving a Reiki treatment.
1 credit, summer semester

HNG 525 Advanced Child Health Assessment
This course is designed to enable the student to refine and further develop clinical decision making skills while conducting health assessment of infants, children and adolescents. Emphasis will be placed on assessment of the child's physical, emotional and cognitive development within the context of their family and environment.
2 credits, fall semester, faculty: parent/child health

HNG 533 Contemporary Topics in Pain Management I
With major emphasis on the development of clinical decision making and critical thinking skills as essential components of the advanced practice role, this is the first of two pain management courses. This course provides an introduction to pain management with an emphasis on assessment, treatment modalities and acute and chronic pain syndromes common to primary care (adult health, child health, perinatal/women's health and psychiatric/mental health nursing).
1 credit, summer semester

HNG 551 Psychopharmacology
This course will center on pharmacotherapeutic management of selected psychiatric conditions. Students will explore and analyze pharmacologic issues relevant to the psychiatric client in ambulatory, acute care and chronic care settings.
2 credits, summer semester

HNG 552 Pediatric Multiple Sclerosis
This course focuses on the epidemiology, pathology, differential diagnosis and treatment of Pediatric Multiple Sclerosis. Radiographic, laboratory, clinical features and case studies will be presented. Cognitive and psychosocial issues will be discussed.

HNG 561 Contemporary Topics in Pain Management II
With major emphasis on the development of clinical decision making and critical thinking skills as essential components of the advanced practice role, this is the second of two pain management courses. Using prototype complex case studies presented in a problem based learning format, students will be guided in their development of the skills required to identify and resolve pain-related problems common in clinical practice (adult health, child health, perinatal/women's health and psychiatric/mental health nursing). This course builds on content introduced in HNG-533, however may be taken without this prerequisite with faculty permission.
2 credits, summer semester

HNG 567 Revisioning Nursing: Crisis or Opportunity
This course will examine the phenomena associated with paradigm shifts in nursing today. The student will explore many of the important areas in which subtle and not so subtle variations of worldview affect our decisions, our interrelationships and our work environment.
2 credits, summer semester

HNG 568 The Addicted Client: Strategies for Nursing Assessment and Intervention
Provides a theoretical and conceptual foundation needed to address clients with a broad range of substance abuse and addiction patterns on the health-illness continuum. It utilizes concepts from a number of nursing specialties in data collection, diagnosis, planning, intervention and evaluation through the case study method. The critical evaluation of socio-cultural beliefs, values and attitudes toward the addicted client will also be explored.
2 credits, spring semester, faculty: community and mental health

HNG 570 Independent Studies
The focus of this course is self-directed study in the analysis, examination and critique of a specialty area of interest in advanced practice. Variable (1-6) credits

HNG 571 Radiological Diagnostics for Nurse Practitioners
Provides the practitioner student with an overview of current state-of-the-art radiological diagnostics and related subspecialty procedures. Emphasis placed on acquiring a basic understanding of radiological studies, accuracy in diagnosis and interrelated scenarios.
3 credits, summer semester, faculty: parent/child health

HNG 599 Therapeutic Touch
Therapeutic Touch assessment skills will be taught so that the practitioner may use Therapeutic Touch clinically to assist in reduction of pain and anxiety, promote relaxation and facilitate the body's natural restorative process.
1 credit, summer semester, faculty: community and mental health
