Good research skills are critical to academic success. Most disciplines require writing based upon research, as arguments and explanations make little impact on audiences without effective supporting evidence, drawn from relevant scholarship on the subject. This involves knowing how to use appropriate databases, source materials, and composing processes, as well as negotiating the values, genres, and languages of the scholarly communities in which one is researching. In this course, students will learn fundamentals of research methods, practice these methods in a series of integrated research and writing assignments, and engage in critical reflection about research and writing. Students will focus on an area of disciplinary interest to them, and practice these essential research and writing skills through a series of projects: library assignments, research log, research proposal, annotated bibliography, literature review, abstract, and research paper.

Instructor: Robert Kaplan
Course Code: 93270
Meeting Times: M/W 5:30pm-6:50pm
