Why SUNY Korea?

- Prestigious American Degree
- Academic Excellence
- Global Network
- Affordable Education
- Studying in Korea
- International Career

SUNY Korea is preparing for its grand opening in Spring 2012. The commitment of the State University of New York (SUNY) to global engagement has led to the establishment of SUNY Korea to create a strong and dynamic presence in Korea. SUNY Korea, located in Incheon Free Economic Zone (IFEZ), Korea, will be the first Korean campus managed by a US University offering US degree programs and the first global university in IFEZ. SUNY Korea is committed to providing high quality research-oriented education while providing the full American university experience in Korea.

IFEZ created a unique global university for scholarship and research that is ideal for US education. Through mutual efforts between Stony Brook University, one of the four university centers of the SUNY system, and the Republic of Korea, SUNY Korea will bring “American-style” education to the Asian continent.

The curriculum at SUNY Korea consists of selected degree programs of Stony Brook. The design and delivery of each program agree with the degree programs as delivered in the US. The degree is granted by Stony Brook University.

About Stony Brook University

A Top Tier University

Top Rankings

Did you know that Stony Brook University is ranked in the top 1 percent of all universities in the world by the London Times Higher Education-QS World University Rankings? U.S. News & World Report lists Stony Brook University in the top 100 best national universities and top 50 public national universities. Furthermore, Stony Brook University is one of only 62 members of the prestigious Association of American Universities - along with Harvard, MIT, Princeton, and Yale.

Top Educators

Stony Brook’s award-winning faculty include three Nobel laureates, an Abel prize winner, two Pulitzer Prize winners, five MacArthur Fellows, and two Grammy Award winners. The MRI technology that won the Nobel Prize for Medicine was invented at Stony Brook. Stony Brook researchers discovered the golden bamboo lemur and led the team that found the top quark. And the internationally renowned Emerson String Quartet is quartet-in-residence at Stony Brook, teaching master classes in the Department of Music and illuminating the stage during performances at the Staller Center for the Arts.

Top Students

Every year Stony Brook students earn national recognition through Beckman, Churchill, Barry M. Goldwater, Howard Hughes Medical Institute, Marshall, and UNCF-Merck awards. Stony Brook alumni are leaders in their fields and include the president of Stanford University, a Pulitzer Prize-winning investigative journalist, the leader of the imaging team for the Cassini mission to Saturn, and the co-chairman and CEO of IMAX Corporation.
We are excited that you are considering admission to SUNY Korea. The curriculum at SUNY Korea consists of selected degree programs of Stony Brook University. The design and delivery of such programs shall agree with the degree programs as delivered at Stony Brook University. The degree granted is from Stony Brook University.

For Spring 2012, SUNY Korea offers selected M.S. and Ph.D. programs of Stony Brook’s College of Engineering and Applied Sciences. These programs have selective admission and are renowned in the United States. Qualified applicants to the SUNY Korea programs will be selected according to the standards and requirements of Stony Brook University.

Choosing a university is one of the most important decisions you will make. By choosing SUNY Korea, you are joining Stony Brook, a university with an enrollment of more than 24,700 students. Stony Brook University is considered a flagship campus of the 64 campuses in the public university system comprising the State University of New York (SUNY). SUNY is the largest public university system in the U.S., with more than 450,000 students from 160 nations, 30,000 faculty members, and over 2.5 million alumni residing in New York State and throughout the world.

**How to apply**

Application for admission for a graduate degree is made to a specific program for a designated degree. To be considered for admission, all students must submit a complete application online as well as the following documents to the graduate program:

- Letters of Recommendation
- Official Copies of School Transcripts
- Official GRE Scores
- Official TOEFL Scores
- Additional Materials for Student Visa

**Application Deadlines**

- **Spring 2012**
  - Regular Applications Due: January 15, 2012
- **Fall 2012**
  - Applications Due: February 15, 2012

Late applications may not receive full consideration, especially for financial support.

**Tuition & Fees**

(For a semester in USD)

- Tuition: $7,580
- Program Fee: $600
- Total: $8,180

Tuition and Fees are subject to change without notice. Health Insurance is a requirement for all non-Korean students who wish to attend SUNY Korea.

About Our Programs

Department of Computer Science

Established in 1969, the Computer Science Department at Stony Brook University is consistently ranked among the top Computer Science research departments in North America. A Gourman report indicated Stony Brook’s undergraduate program was ranked 15th nationwide and 2nd in New York State, while the most recent NRC survey ranks it among the top 20 graduate programs in the U.S.

The M.S. program in Computer Science

is designed primarily to train students with professional goals in business, industry, or government, requiring a detailed knowledge of computer science concepts and applications. The program concentrates primarily on applied computer science, emphasizing software development, programming, computer systems, and applications. Each student is given the experience of working on a large-scale software or hardware development project involving analysis, design, evaluation, and implementation.

The Ph.D. program in Computer Science

The Ph.D. program in Computer Science is for students interested in obtaining academic or research positions in colleges and universities or in government or industrial research laboratories. The program gives students a rigorous and thorough knowledge of a broad range of theoretical and practical research subject areas and develops the ability to recognize and pursue significant research in computer science. The first year and a half of graduate study are devoted to course work. By the end of the second year the research phase of the student graduate career should be underway, with participation in advanced study and preliminary research work. The final years of graduate study are devoted to dissertation research.

Department of Technology & Society

The Department of Technology and Society is an integral part of the College of Engineering and Applied Sciences. Through our academic programs and sponsored projects, the Department of Technology and Society has enhanced the technological literacy and educational opportunities of thousands of students. We have also provided university, regional, and national leadership in educational innovation and STS (Science, Technology and Society) curriculum development.

The M.S. program in Technological Systems Management

provides professionals in all fields, and persons planning such careers, with state-of-the-art concepts, analytical tools and practical skills for managing specific technological systems and improving their performance. A deep understanding of the technology and a broad knowledge of the social implications of technology are essential to identifying, understanding, and addressing a growing number of complex issues facing our society.

The Ph.D. program in Technology, Policy, and Innovation (TPI)

is at the forefront of current and emerging efforts to address the challenges that arise from the intersection of technological innovation and societal changes. The Ph.D. degree in TPI is for students who wish to be engines of national leadership in gauging the prospects and charting the future course of technologies. Students in this program will carry out policy and design/planning research in three interacting socio-technological areas: energy and environmental systems; education (including educational technologies, and education in engineering and applied sciences); technology management, engineering entrepreneurship, and science and technology policy. TPI equips its doctoral graduates with skills that may be applied to careers in both the public and private sectors. The graduates will find strong needs for their skills – and job opportunities - in government agencies, think-tanks and research organizations, industries and consulting firms, and academia, both in the United States and overseas.
Life at SUNY Korea

SUNY Korea is housed in Songdo Global University (SGU), a single multi-institutional campus. SUNY Korea is the first among many internationally renowned university to open its door in SGU. Participating universities will offer a broad range of undergraduate and graduate majors and provide high-quality, cutting-edge education to over 10,000 students from around the world.

Housing & Dining
SUNY Korea students are eligible for on-campus housing. Students are housed in fully furnished apartment buildings that have lounges, a laundromat, exercise facilities and a cafeteria. There are two student dormitories accommodating more than 2,000 students. A resident supervisor and an assistant live in the dorms to assist resident students. Residence life offers many programs to help students transition to independent living.

Clubs & Organizations
A wide variety of organizations & clubs provide a social setting for students to develop new skills and make new friends. SUNY Korea plans to foster international connections through interactions with students from the various campuses in Songdo. Clubs will arrange a myriad of activities and events and give students the opportunity to develop leadership and organization skills.

Libraries
SUNY Korea students have access to two different libraries: the College Library located in the academic building and the Central Library. The libraries offer materials on a wide range of topics to support discovery and learning. A wealth of material appropriate for SUNY Korea students is also available online. The electronic resources of the digital library of Stony Brook University are available to students at SUNY Korea and are a key component of the library collections.

About IFEZ
Department of Business Administration

SUNY Korea is located in Songdo, the Incheon Free Economic Zone (IFEZ), Incheon City, which is one hour west of Seoul. IFEZ was designated in 2003 by the Korean Central Government as the first such zone in Korea. The numerous international developments occurring in IFEZ are centered around creating a new growth engine to transform the economic structure of Korea from that of manufacturing to one of knowledge-based, high value-added industry.

IFEZ, located in Songdo, Incheon, is situated at the heart of Northeast Asia, and is surrounded by more than 50 metropolises, each with a population of more than 1 million. Its strategic location effectively enables future generations to establish the engine for global economic growth. Songdo is the most rapidly booming region of IFEZ, which is currently undergoing a period of great expansion and radical growth, and residents witness its rapid development on a daily basis.
