Technology and Policy Speaker Series – Spring 2015

The Department of Technology and Society is proud to announce the launch of the Technology and Policy Speaker Series. In today’s complex technological society, policy makers are charged with some of the most critical challenges ever faced by our global society. The Department of Technology and Society is uniquely focused on the intersection of technology and policy particularly in the areas of energy and the environment, engineering education and workforce and cross-disciplinary, inter-agency cooperation and collaboration. The speakers lined up for our inaugural semester will tantalize participants by showcasing cutting-edge research and expert commentary on today’s most pressing problems. We hope you will join us.
