

Instructions for Accessing Airtel on a Windows PC with no Limitations

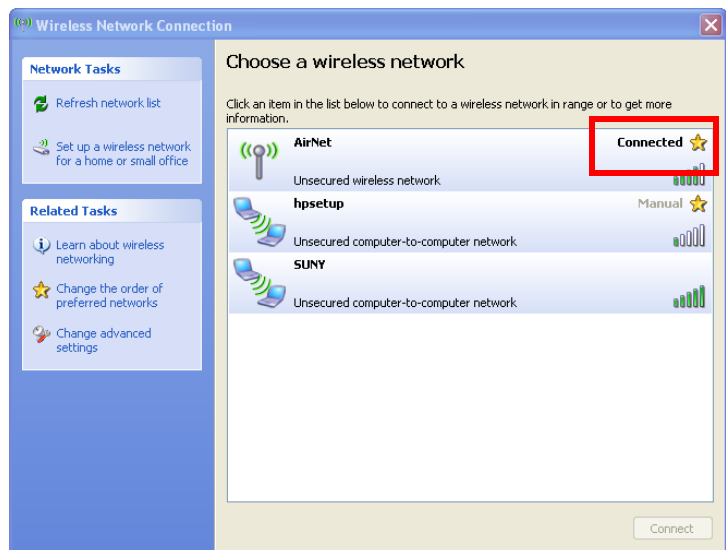

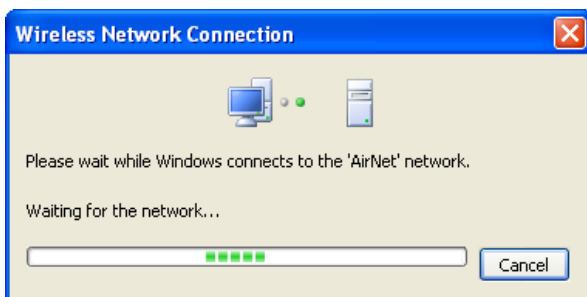

1. Open the Available Network Connections by right-clicking the Wireless Network Icon in the System Tray.

2. Click on the Airtel Wireless Network and then Click **Connect**.

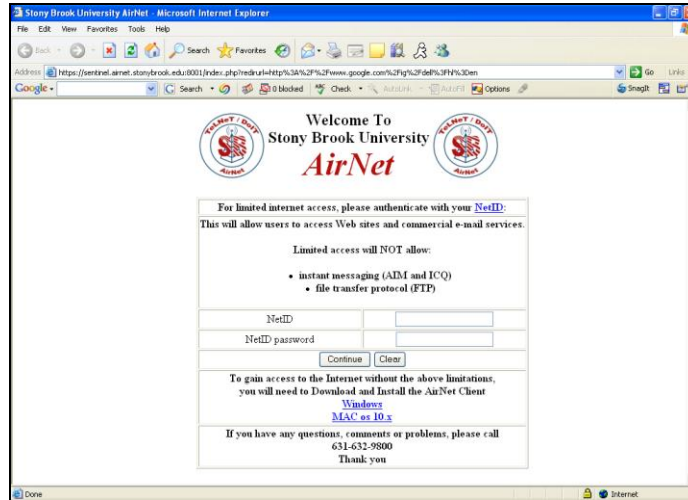

3. A window might appear showing that Windows is connecting to Airtel. After the window disappears make sure Airtel says connected.

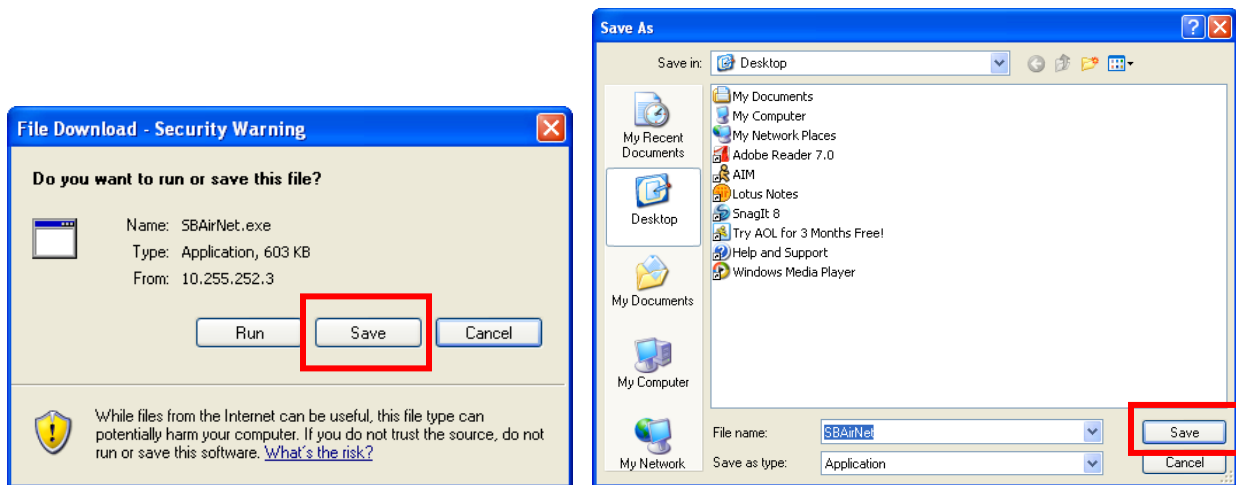

4. Open the Internet Browser. (Internet Explorer, Firefox, etc.)

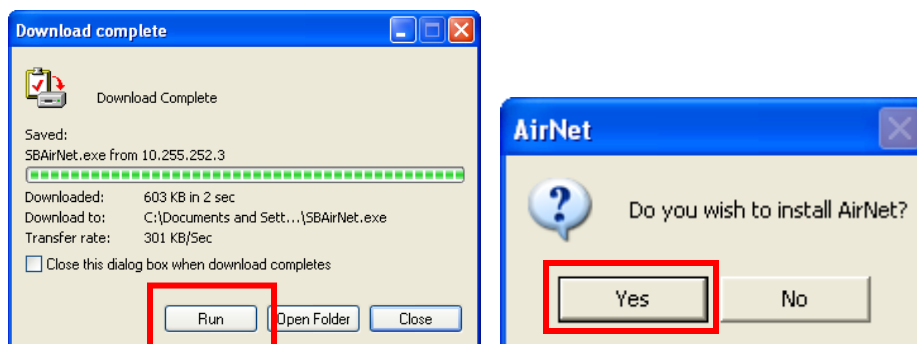

5. The following page should be displayed. Click on the Link for the Windows Client.

6. A Dialog box will appear if you want to run or save the file. Click on **Save**. Choose a location to save the file to and then click **Save**.

7. After the download is complete, Click **Run**. Another box will appear asking if you wish to install. Click **Yes**.

8. After the installation begins the following window will appear. Be sure to select **All Users**, and **Add a shortcut to the desktop**.

9. When the installation is complete the AirNet Client will open. Put **Your NetID** in for the **User name** and **Your NetID Password** for the Password. Click **Connect**.

10. You can connect using the shortcut on the desktop in the future.
