

# Configuring Airnet Manually (Windows XP)

## *Manual VPN setup - XP*

- Click *Start -> Control Panel*, then click *Network Connections*
- Click *Create a New Connection* this will open the *New Connection Wizard*.
- Click *Next*, then Click *Connect to the network at my workplace*, and then click *Next*.
- Select *Virtual Private Network connection* and then click *Next*.
- Select *Do not dial the initial connection*, then click *Next*.
- Type in the connection name **AirNet VPN**, then click *Next*.
- Type the host name: **pptp.airnet.stonybrook.edu** then click *Next*.
- If asked, *Do not use a Smart Card*, Click *Next*.
- Click to select the *Add a shortcut to this connection to my desktop* check box if you want one, if not, then leave it unchecked and click *finish*.
- Now you should be able to login with a NetID and password.
