The Peterson Marine Community Ecology Lab is seeking four to six (4-6) highly motivated volunteer research assistants this winter and/or spring to work on a graduate student dissertation projects. Projects will range from assessing community diversity of different habitats (enumerating, measuring and weighing by taxa groups) to preparing stable isotope samples. Research hours can be used towards research credit and internship hours with Bradley Peterson (MAR 487 and MAR 488).

Volunteers are expected to preferably commit at least six hours a week.

If interested, please send your CV/resume, research interests and a list of available meeting times to Rebecca, rkulp1@gmail.com.
