Geology (GEO)

Major and Minor in Geology

Department of Geosciences, College of Arts and Sciences

CHAIRPERSON: Richard J. Reeder  DIRECTOR OF UNDERGRADUATE STUDIES: Troy Rasbury  E-MAIL: Troy.Rasbury@stonybrook.edu
OFFICE: 255 Earth and Space Sciences  PHONE: (631) 632-8200  WEB ADDRESS: http://www.geosciences.stonybrook.edu

Minors of particular interest to students majoring in Geology and Earth and Space Sciences: Environmental Studies (ENS), Marine Sciences (MAR), engineering minors

Faculty

Daniel M. Davis, Professor, Ph.D., Massachusetts Institute of Technology: Geophysics.
Steven C. Englebright, M.S., Curator, Stony Brook University: Geology.
Timothy Glotch, Assistant Professor, Ph.D., Arizona State University: Planetary Science.
Gilbert N. Hanson, Distinguished Service Professor and Professor, Ph.D., University of Minnesota: Geochemistry.
William E. Holt, Professor, Ph.D., University of Arizona: Geophysics.
Robert C. Liebermann, Professor and Distinguished Service Professor, Ph.D., Columbia University: Geophysics.
Donald H. Lindsley, Distinguished Professor Emeritus, Ph.D., Johns Hopkins University: Geochemistry; petrology.
Scott M. McLenahan, Professor, Ph.D., Australian National University: Geochemistry.
Hanna Nekvasil, Professor, Ph.D., Pennsylvania State University: Geochemistry; petrology.
John B. Parise, Professor, Ph.D., James Cook University: Crystallography; mineral physics.
Brian L. Phillips, Associate Professor, Ph.D., University of Illinois: Geochemistry, mineralogy.
Troy Rasbury, Associate Professor, Ph.D., Stony Brook University: Geochemistry; sedimentology.
Richard J. Reeder, Professor, Ph.D., University of California, Berkeley: Geochemistry; sedimentology.
Martin A. Schoonen, Professor, Ph.D., Pennsylvania State University: Geochemistry.
Donald J. Weidner, Distinguished Professor, Ph.D., Massachusetts Institute of Technology: Geophysics.
Lianxing Wen, Professor, Ph.D., California Institute of Technology: Global geophysics.
Teng-fong Wong, Professor, Ph.D., Massachusetts Institute of Technology: Geophysics.

Affiliated Faculty

Robert C. Aller, MSRC
Henry J. Bokuniewicz, MSRC
J. Kirk Cochran, MSRC
Roger Flood, MSRC
Catherine Forster, Anatomical Sciences

David W. Krause, Anatomical Sciences
Maureen O’Leary, Anatomical Sciences

Teaching Assistants

Estimated number: 12

Courses in Geology

See the Course Descriptions listing in this Bulletin for complete information.

GEO 101-E  Environmental Geology
GEO 102-E  The Earth
GEO 103-E  The Earth Through Time
GEO 107-E  Natural Hazards
GEO 109-E  Life Through Time
GEO 112  Physical Geology Laboratory
GEO 113  Historical Geology Laboratory
GEO 121  Principles of Geology
GEO 122-E  Physical Geology
GEO 287  Introductory Research in Geology
GEO 302 GIS For Geologists
GEO 305  Field Geology
GEO 306  Mineralogy and Petrology I
GEO 309  Structural Geology
GEO 310  Introduction to Geophysics
GEO 311-H  Geoscience and Global Concerns
GEO 315  Groundwater Hydrology
GEO 316  Geochemistry of Surficial Processes
GEO 318  Engineering Geology and Coastal Processes
GEO 320-E  Glacial Geology
GEO 327  Computerized Modeling of Geological Phenomena
GEO 353  Marine Ecology
GEO 401  Optical Mineralogy
GEO 403  Stratigraphy
GEO 405  Field Camp
GEO 407  Mineralogy and Petrology II
GEO 420  Environmental Analysis Using Remote Sensing and Geographic Information Systems
GEO 440  Geological Applications of Remote Sensing
GEO 447  Senior Tutorial in Geology
GEO 452  Seismology

Geology

The Department of Geosciences offers two undergraduate programs: the Geology major, leading to a Bachelor of Science degree, and the Earth and Space Sciences major, leading to a Bachelor of Arts degree. Minimum course requirements for the B.S. program in Geology are detailed below. For requirements for the B.A. program in Earth and Space Sciences, see the entry in the alphabetical listing of Approved Majors, Minors, and Programs. Upon declaring the major, the student is assigned a faculty advisor who will assist in the selection of a course sequence leading to the degree. Students should consult frequently with their faculty advisors regarding their progress and regarding appropriate science courses. Because the position of the scientist in society is responsible and complex, the student is cautioned to pay careful attention to general education in the arts, humanities, and social sciences.

Geology

The science of geology is concerned with the physical and chemical nature of the earth (and other planets) and the evolution of the earth over the vast expanse of geological time. The B.S. program in Geology includes four specializations: Geology, Environmental Geoscience, Engineering Geology, and Geological Oceanography. The major aims at providing the student with maximum preparation to carry out graduate and professional work in each of these fields. Students graduating with a B.S. in Geology typically go on to graduate school or obtain professional employment with environmental consulting firms or various government organizations.
Independent research, teaching practica, and internship courses

Requirements for the Major in Geology (GEO)
The major in Geology leads to the Bachelor of Science degree. All courses offered for the major must be passed with a letter grade of C or higher.

Completion of the major requires 66 to 68 credits.

Geology and Environmental Geoscience Specializations

A. Required departmental courses

Geology Specialization
- GEO 103 The Earth Through Time
- GEO 113 Historical Geology Laboratory
- GEO 122 Physical Geology or GEO 102 The Earth and GEO 112 Physical Geology Laboratory
- GEO 306 Mineralogy and Petrology I
- GEO 309 Structural Geology
- GEO 310 Introduction to Geophysics
- GEO 401 Optical Mineralogy
- GEO 403 Stratigraphy
- GEO 405 Field Camp
- GEO 407 Mineralogy and Petrology II

Environmental Geoscience Specialization
- GEO 101 Environmental Geology
- GEO 122 Physical Geology or GEO 102 The Earth and GEO 112 Physical Geology Laboratory
- GEO 305 Field Geology
- GEO 306 Mineralogy and Petrology I
- GEO 315 Groundwater Hydrology
- GEO 316 Geochemistry of Surficial Processes
- GEO 401 Optical Mineralogy
- GEO 403 Stratigraphy
- One of the following: GEO 309, 310, 407, ATM 397, AMS 210, 321

B. Required courses in the related sciences
- MAT 131, 132 Calculus I, II (see Note 1 below)
- MAT 203 Calculus III with Applications or AMS 261 Applied Calculus III
- CHE 131, 132 General Chemistry or CHE 141, 142 Honors Chemistry
- PHY 131/133, 132/134 Classical Physics I, II and labs (See Note 2 below)

C. Related science electives
A coherent set of upper-division science courses, totaling 12 credits, that has been approved by the department.

D. Upper-Division Writing Requirement
All students majoring in Geology must submit two papers (term papers, laboratory reports, or independent research papers) to the director of undergraduate studies for Department evaluation by the end of the junior year. If this evaluation is satisfactory, the student will have fulfilled the upper-division writing requirement. If it is not, the student must fulfill the requirement before graduation.

Geological Oceanography Specialization

A. Required courses
- GEO 122 Physical Geology or GEO 102 The Earth and GEO 112 Physical Geology Laboratory
- GEO 306 Mineralogy and Petrology I
- GEO/BIO 353 Marine Ecology
- GEO 401 Optical Mineralogy
- GEO 403 Stratigraphy
- MAR 104 Oceanography
- MAR 304 Waves, Tides, and Beaches
- MAR 333 Coastal Oceanography
- MAR 346 Marine Sedimentology
- MAR 350 Intro. to Ocean Physics

B. Required Courses in the related sciences
- MAT 131, 132 Calculus I, II (see Note 1 below)
- AMS 361 Applied Calculus IV: Differential Equations
- BIO 150 The Living World
- BIO 201 Fundamentals of Biology: Organisms to Ecosystems
- CHE 131, 132 General Chemistry or CHE 141, 142 Honors Chemistry
- PHY 131/133, 132/134 Classical Physics I, II and labs
- or PHY 125, 126, 127 Physics A,B,C or PHY 141, 142 Classical Physics I, II: Honors

C. Upper-Division Writing Requirement
See D under “Geology and Environmental Geoscience Specializations” at left.

Notes:
1. The following alternate beginning calculus sequences may be substituted for MAT 131, 132 in major requirements or prerequisites: MAT 125, 126, 127 or 141, 142 or 171. Equivalency for MAT courses achieved by earning the appropriate score on a University mathematics placement examination will be accepted as fulfillment of the requirement without the necessity of substituting other credits. For detailed information about the various calculus sequences, see “Beginning Mathematics Courses” under the entry for the Department of Mathematics and the individual course descriptions.
2. In the Geology, Environmental Geoscience, and Engineering Geology specializations, the following physics

Courses are alternatives to PHY 131/133, 132/134: PHY 121/123, 122/124 or PHY 125, 126, 127 or PHY 141, 142.

### Honors Program in Geology

Students in the Geology major who have maintained a grade point average of 3.50 in natural sciences and mathematics through the junior year may become candidates for Departmental honors in Geology by applying to the Department.

In addition to the academic program, the student must complete an honors thesis, which is evaluated by a committee composed of the student’s advisor and two other science faculty members including one from outside of the Department. If the honors program is completed with distinction and the student has maintained a minimum 3.50 grade point average in all coursework in natural sciences and mathematics, honors are conferred.

### Requirements for the Minor in Geology (GEO)

For students majoring in other areas who are interested in obtaining a fundamental understanding of the earth sciences, a minor concentration in Geology with two distinct specializations—Geology and Environmental Geoscience—is available. The Geology specialization acquaints students with earth materials, the origin and evolution of life on earth, and physical processes that have shaped the earth through time. The Environmental Geoscience specialization acquaints students with the fundamental environmental problems that are dealt with by geoscientists.

All courses offered for the minor must be passed with a letter grade of C or higher. Completion of the minor requires 20 credits.

### Geology Specialization

GEO 103 and 113
GEO 122 Physical Geology
or GEO 102 The Earth and GEO 112 Physical Geology Laboratory

Twelve additional credits from among GEO courses numbered 300 or higher

### Environmental Geoscience Specialization

GEO 101
GEO 122 Physical Geology
or GEO 102 The Earth and GEO 112 Physical Geology Laboratory

GEO 315 Groundwater Hydrology

Nine additional credits chosen from GEO 304, 306, 307, 309, 310, 311, 316, 318, 401, 403
