PSY 103-F Introduction to Psychology
An introduction to research and theory in psychology in such areas as learning, perception, cognition, biopsychology, development, personality, and abnormal and social psychology. As part of the course, students must participate in experiments and/or a library research project.

PSY 201-C Statistical Methods in Psychology
The use and interpretation of elementary statistical techniques in research, emphasizing descriptive statistics, correlational analysis, and inferential statistics, including chi-square, t-tests, and an introduction to the Analysis of Variance. May not be taken for credit after AMS 102, ECO 220, POL 201, or SOC 202. Prerequisite: PSY 103; satisfaction of entry skill in mathematics requirement

PSY 220-F Survey in Developmental Psychology
A study of the growth processes from fetal development to late childhood. Perceptual and learning characteristics are explained as they relate to increases in cognitive and social competence in the total community. Biological factors are examined as they relate to inheritance of behavior patterns. Prerequisite: PSY 103

PSY 230-F Survey in Abnormal and Clinical Psychology
Examines the description, etiology, course, and treatment of psychological disorders. Current theory and research are emphasized. Prerequisite: PSY 103

PSY 240-F Survey in Social Psychology
A presentation of various topics in social psychology including interpersonal processes, obedience to authority, social perception, attitude change, attraction and liking, and aggression and violence, especially as applied to national and international issues. Prerequisite: PSY 103

PSY 250-F Survey in Biopsychology
Introduction to the nervous basis of sensory processes, motor control, attention, emotion, and learning. Prerequisite: PSY 103 or BIO 101 or 150

PSY 260-F Survey in Cognition and Perception
A survey of theoretical and empirical work on human cognition and perception including pattern recognition, memory, attention, language comprehension, decision making, and problem solving. Prerequisite: PSY 103

PSY 273 Supervised Research in Psychology
Initial training and participation in techniques or duties related to a specific laboratory or field research experience under the direct supervision of a faculty member or advanced graduate student in the Department of Psychology. Students may take two sections in a single semester, but no more than three credits may be applied to a section. May not be taken for more than six credits per faculty advisor during the student's career.

Prerequisite: Permission of instructor

PSY 283 Applications and Community Service
Designed to provide opportunities for students to study and apply psychological principles outside the classroom (e.g., in settings such as hospitals and schools). Specific programs vary from semester to semester. General information is available in the Psychology Undergraduate Office. May be repeated up to a limit of six credits. Prerequisite: Permission of instructor

PSY 301 Advanced Statistics
Survey of probability and sampling theory, descriptive and inferential statistics, and introduction to experimental design. Prerequisite: PSY 310

PSY 310-F Research and Writing in Psychology
An introduction to and critical analysis of the methodology of psychological research. In addition to attending lectures taught by faculty, students work closely with a graduate instructor and peers in small breakout sections to prepare a research proposal. Not for credit in addition to the discontinued PSY 300. Prerequisites: PSY 103; PSY 201 or any other course satisfying the department’s statistics requirement

PSY 325 Children’s Cognitive Development
A survey of the basic principles of cognition from experimental research with children. Topics include perceptual development, language development, memory development, conceptual development, and the development of academic skills. Prerequisites: PSY 220; PSY 310

PSY 326 Children’s Social and Emotional Development
Current theories, models, research methods, and findings in the study of children’s socioemotional development. The course emphasizes the interaction of the individual with his or her social environment in developmental processes and outcomes. Emphasis include infancy, toddler/preschool, mid-late childhood, and adolescence. Prerequisites: PSY 220; PSY 310

PSY 327 Human Growth and Development in the Educational Context
The biological and psychological development of childhood and adolescence that affects teaching and curriculum development for diverse learners. Additional topics include childhood and adolescent psychotropic disorders, special education programs, drug and alcohol use and abuse, and societal issues. Formerly SSE 327 and SSI 327. Not for credit in addition to SSE 327 or SSI 327. Prerequisites: U3 or U4 standing; admission to a teacher education program, or admission in the Psychology major

PSY 329 Special Topics in Developmental Psychology
Semester supplements to this Bulletin contain specific description when course is offered. May be repeated for credit as the topic changes. Prerequisites: PSY 220; PSY 310

PSY 334-F Autism and Mental Retardation
Study of concepts, procedures, and research related to autism, mental retardation, and other developmental disabilities from a psychological and educational perspective. Topics to be dealt with include: assessment, family roles, development of communication, social development, cognitive development, sensory and motor development, adaptive behaviors, problem behaviors, instructional strategies, comprehensive programs, public policy issues, personnel preparation, methodological and research issues, and future directions for disability research and practice. Prerequisite: PSY 230

PSY 335 Clinical Behavior Modification
The application of behavioral and cognitive sciences to the assessment and treatment of clinical problems. The aims of the course are to familiarize the student with the theoretical and empirical foundations of clinical behavior modification, provide examples of applications to a variety of different clinical problems, and discuss the results of outcome studies. While specific treatment methods are described and issues related to clinical application are discussed, no actual clinical training or practicum is provided in this course. Prerequisites: PSY 220; PSY 310

PSY 337 Applied Behavior Analysis/Positive Behavior Support
Exploration of concepts, procedures, and research related to applied behavior analysis/positive behavior support, an approach that involves the application of principles derived from behavioral, community, and ecological psychology to problems of social significance in the fields of clinical psychology, education, family life, and health. There is a focus on issues of assessment, intervention, and outcomes related to problem behavior, school performance, home-based support, community integration, and improving quality of life through systems change. Not for credit in addition to PSY 339 when the topic is Applied Behavior Analysis/Positive Behavior Support. Prerequisite: PSY 103

Advisory Prerequisite: U3 or U4 standing

PSY 338 Behavior Deviation in Children
Development and modification of behavioral deviations in children; application of principles derived from experimental analysis of behavior to problems of children. Prerequisites: PSY 220; PSY 310

PSY 339 Special Topics in Clinical Psychology
Semester supplements to this Bulletin contain specific description when course is offered. May be repeated for credit as the topic changes. Prerequisites: PSY 220; PSY 310

PSY 341 Psychology of Prejudice
An overview of theoretical perspectives, research methods, empirical findings, and practical applications of psychological research on prejudice. Topics include the development of prejudice among children; the role of cognitive, social, personality, and motivational factors in maintaining prejudice and stigma; the psychological consequences of prejudice and stigma; and strategies for reducing prejudice, stigma, and intergroup conflict. Prerequisites: PSY 240; PSY 310

PSY 342 Psychology of Drug Addiction
Review of drugs from a historical perspective and motivations for drug use. Importance is placed on psychological theories that attempt to understand drug addiction, including the role of classical and operant conditioning processes, genetic factors in alcoholism and smoking, the role of expectancies, and the contri...
button of personality. Various prevention and treat-
ment approaches to drug addiction and their effec-
tiveness are examined. The use of alcohol and tobac-
co are addressed in-depth, as those drugs cause many
more deaths and disabilities than illicit drugs. Not for
credit in addition to PSY 348 or 349 when the topic is
Drug Addiction or Psychology of Addictive Behavior.
Prerequisites: PSY 240; PSY 310
3 credits

PSY 345 Theories of Personality
The study of the ways in which people differ. Examines
traditional and current thinking and research about the
nature and causes of the individual patterns of behavior, emotion, and thinking that we
call personality.
Prerequisites: PSY 240; PSY 310
3 credits

PSY 346 Health Psychology
The role of psychological factors in the maintenance
of good health or in coping with illness. Topics include
the modification of specific health behavior, such as
alcoholism, obesity, lack of exercise, and smoking; the
relationship of stress and illness; and coping with ter-
ral illnesses.
Prerequisites: PSY 240; PSY 310
3 credits

PSY 347-F Psychology of Women
The psychological impact of important physiological
and sociological events and epochs in the lives of
women: menstruation, female sexuality, marriage,
childbirth, and menopause; women and mental health,
mental illness and psychotherapy; the role of women
in the field of psychology. This course is offered as
both PSY 347 and WST 377.
Prerequisite: WST major or minor; or one of the
following: WST/SSI 102, WST 103, PSY 103, WST/
SOC 247
3 credits

PSY 348 Special Topics in Social
Psychology
Semester supplements to this Bulletin contain specific
description when course is offered. May be repeated
for credit as the topic changes.
3 credits

PSY 349 Special Topics in Social
Psychology
Semester supplements to this Bulletin contain specific
description when course is offered. May be repeated
for credit as the topic changes.
Prerequisite: PSY 310
3 credits

PSY 350 Human Brain Function
The functional organization of the human brain,
including dysfunctions resulting from various types of
brain pathology. Neuroanatomical, neuropsychologi-
cal, neurophysiological, and experimental psychologi-
cal approaches are described.
Prerequisite: PSY 250
3 credits

PSY 351 Physiological Psychology
An advanced survey of the neurobiological bases of
complex behavior. A review of basic neurophysiology,
neuroanatomy, and neurochemistry is followed by con-
siderations of the circuitry and neural processing sup-
porting perception, motion, emotion, sleep, attention,
learning, language, and higher cognitive mechanisms.
Prerequisite: PSY 250 or BIO 202 or BIO 203
3 credits

PSY 356 Special Topics in Biopsychology
Semester supplements to this Bulletin contain specific
description when course is offered. May be repeated
for credit as the topic changes.
3 credits

PSY 359 Special Topics in Biopsychology
Semester supplements to this Bulletin contain specific
description when course is offered. May be repeated
for credit as the topic changes.
Prerequisites: PSY 250 and 310
3 credits

PSY 360 The Psychology of Language
Examination of language acquisition and a considera-
tion of its implication for cognitive psychology.
Prerequisites: PSY 260; PSY 310
3 credits

PSY 361 Human Problem Solving
An exploration of human problem solving and critical
thinking. Topics include memory strategies, the role
of language in thinking, inductive and deductive rea-
soning, creativity, and the development of problem
solving skills.
Prerequisites: PSY 260; PSY 310
3 credits

PSY 363 Memory
A review of classic and current theories of memory
and empirical research on memory in memory-intact
and memory-impaired populations.
Prerequisites: PSY 260; PSY 310
3 credits

PSY 364 Sensation and Perception
An examination of both the basic mechanisms and the
organizational processes of visual and auditory per-
ception. Topics include the perception of color, depth,
movement, pitch, loudness, speech, and music.
Prerequisites: PSY 260; PSY 310
3 credits

PSY 366 Special Topics in Cognition and
Perception
Semester supplements to this Bulletin contain specific
description when course is offered. May be repeated
for credit as the topic changes.
Prerequisites: PSY 260; PSY 310
3 credits

PSY 367 History and Systems of
Psychology
History of psychology presented either as a develop-
mental, intellectual, and pedagogical matters relating to the
process within the department. Students are expected
to present oral and written proposals for their senior
year research project.
Prerequisites: PSY 310; admission to psychology hon-
ors program
1 credit

PSY 368 Special Topics in Biopsychology
Semester supplements to this Bulletin contain specific
description when course is offered. May be repeated
for credit as the topic changes.
Prerequisites: PSY 260; PSY 310
3 credits

PSY 380 Research Lab: Human Cognition
Techniques and experimental methods to conduct
research in cognition on a selection of topics such as
perception and sensation, language, attention, or
memory. Hands-on learning of research and reporting
of research.
Prerequisites: PSY 310; permission of instructor
1 credits

PSY 381 Research Lab: Cognition/Computers/Learning
Experimental analysis of human performance. Topics
include learning, cognitive processes, human-comput-
er interaction, and motor skills. Two hours of lecture
and four hours of laboratory per week.
Prerequisites: PSY 310; permission of instructor
1 credits

PSY 382 Research Lab: Social Psychology
Techniques and experimental problems in social psy-
chology, including natural observation, surveys, and
experimental design. Three hours of lecture and two
hours of field or laboratory research per week.
Prerequisites: PSY 240; PSY 310; one 300-level social
psychology course; permission of instructor
1 credits

PSY 383 Research Lab: Physiological
Psychology
Techniques for studying brain mechanisms underly-
ning behavior through such topics as recording of auto-
nomic responses in humans, motor control in humans
or animals, pharmacological effects on animal behav-
ior, and recordings of human brain activity. One hour
of lecture and four hours of laboratory per week.
Prerequisites: PSY 310; PSY 356; permission of instructor
1 credits

PSY 384 Research Lab: Human Factors
Current theories and empirical methods in the psy-
chology of human-computer interaction. Students
practice techniques in the research, design, and eval-
uation of human-computer interfaces.
Prerequisites: PSY 280 and 310; permission of department
1 credits

PSY 385 Junior Honors Seminar
First course of a three-semester research seminar on
research in psychology. Topics investigated by faculty
are reviewed. The class focuses on particular theories,
methods, and results that illustrate the research
process within the department. Students are expected
to present oral and written proposals for their senior
year research project.
Prerequisites: PSY 310; permission of department
1 credits

PSY 447 Readings in Psychology
Directed readings under the guidance of a faculty
member. May be repeated once.
Prerequisite: PSY 310
1-6 credits

PSY 457 Undergraduate Teaching
Practicum I
Work with a faculty member as an assistant in one of
the faculty member’s regularly scheduled classes. The
student is required to attend all the classes, do all the
regularly assigned work, and meet with the faculty
member at regularly assigned times to discuss the
intellectual and pedagogical matters relating to the
course.
Prerequisites: PSY 310; U4 standing in psychology
major; permission of instructor and department
3 credits, SU grading
PSY 476 Undergraduate Teaching Practicum II
Work with a faculty member as an assistant in one of the faculty member's regularly scheduled classes. Students assume greater responsibility in such areas as leading discussions and analyzing results of tests that have already been graded. Students may not serve as teaching assistants in the same course twice.
Prerequisites: PSY 475; permission of instructor and department
3 credits, S/U grading

PSY 487 Independent Research in Psychology
Upper-division students interested in carrying out independent research projects under the auspices of a faculty member in the Department of Psychology may do so in this course. The student must propose and carry out the research project and must analyze and write up the results in a form acceptable to the sponsor. Written agreement by the faculty sponsor to undertake this responsibility and an outline of the project goals are filed with the Undergraduate Psychology Office. These become part of the student's departmental file. May be repeated up to a limit of 12 credits.
Prerequisites: U3 or U4 standing; PSY 310; permission of department
0-6 credits

PSY 488 Internship
Participation in public and private agencies and organizations. Students are required to submit written progress reports and a final written report on their experience to the faculty sponsor and department. May be repeated up to a limit of 12 credits.
Prerequisites: 12 credits in psychology including PSY 310; permission of instructor
Corequisite: PSY 447 or 491 or 492
0-6 credits, S/U grading

PSY 491, 492 Advanced Seminar in Psychology
Special seminars covering current research theory. Topics are announced prior to the beginning of each semester. May be repeated up to a limit of 18 credits. Students may take two sections in a single semester. May not be taken for more than six credits per faculty member during the student's career.
Prerequisites: PSY 310; permission of instructor
3 credits per course

PSY 495 Senior Honors Seminar
Second course of a three-semester research seminar with continuing discussions of methods and theories relevant to honors research projects. Students are expected to design and execute a research project and submit a thesis under the supervision of appropriate faculty sponsorship. Students enrolled in PSY 495 are obliged to complete PSY 496. Students receive only one grade upon completion of the sequence.
Prerequisite: PSY 399; permission of department
Corequisite: PSY 487
1 credit

PSY 496 Senior Honors Seminar
Third course of a three-semester research seminar with continuing discussions of methods and theories relevant to honors research projects. Students are expected to design and execute a research project and submit a thesis under the supervision of appropriate faculty sponsorship. Students enrolled in PSY 495 are obliged to complete PSY 496. Students receive only one grade upon completion of the sequence.
Prerequisite: PSY 495; permission of department
Corequisite: PSY 487
1 credit
