Economics (ECO)

Major in Economics
Department of Economics, College of Arts and Sciences

CO-CHAIRPERSONS: William Dawes and Warren Sanderson
DIRECTOR OF UNDERGRADUATE STUDIES: William Dawes
UNDERGRADUATE PROGRAM COORDINATOR: Jenille Johnson
OFFICE: S-601 Social and Behavioral Sciences
PHONE: (631) 632-7540
E-MAIL: William.Dawes@stonybrook.edu
WEB ADDRESS: http://www.stonybrook.edu/economics

Minors of particular interest to students majoring in Economics: Applied Mathematics and Statistics (AMS), Business Management (BUS), Computer Science (CSE), International Studies (INT)

Faculty

Hugo Benitez-Silva, Assistant Professor, Ph.D., Yale University: Labor economics; applied microeconomics.

Sandro Brusco, Associate Professor, Ph.D., Stanford University: Economics Theory; mechanism design; finance.

Eva Carceles-Poveda, Assistant Professor, Ph.D., Universität Pompeu Fabra: Macroeconomics; financial economics.

William Dawes, Associate Professor, Ph.D., Purdue University: Econometrics; economic history. Recipient of the State University Chancellor’s Award for Excellence in Teaching, 1974.

Pradeep Dubey, Professor, Ph.D., Cornell University: Game theory; mathematical economics.

Debra Dwyer, Assistant Professor, Ph.D., Cornell University: Microeconomics, health economics.

John Hause, Professor, Ph.D., University of Chicago: Theory of measurement and econometric estimation in human capital; industrial organization; applied microeconomics.

Mark Montgomery, Professor, Ph.D., University of Michigan: Economic demography; development economics.

Thomas Muench, Professor, Ph.D., Purdue University: Mathematical economics; econometrics; urban economics.

Egon Neuberger, Professor Emeritus, Ph.D., Harvard University: Comparative systems; Soviet and East European economics.

Warren Sanderson, Professor, Ph.D., Stanford University: Joint appointment with History; Economic history; economic geography.

Yair Tauman, Professor, Ph.D., Hebrew University: Industrial organization; game theory.

Michael Zweig, Professor, Ph.D., University of Michigan: Political economy; labor economics. Recipient of the State University Chancellor’s Award for Excellence in Teaching, 1991, and the President’s Award for Excellence in Teaching, 1991.

Adjunct and Visiting Faculty

Estimated number: 7

Teaching Assistants

Estimated number: 30

Economics is the study of production, distribution, and exchange of goods and services. It investigates such questions as price formation, degree of employment of labor and other resources, efficient use of scarce resources, and the basis and effects of government policies in the economy. Economics also analyzes, compares, and contrasts different economic systems in the world, and studies the international economic relations among countries.

The areas of study in the Department fall into three broad classifications. The first of these, microeconomics, deals with the theoretical and empirical study of the behavior and interrelationships of individual economic agents, such as firms and individuals, and their interaction through markets. Next, macroeconomics examines the large sectors of the economy such as government, business, money and banking, and international trade. It also covers such topics as unemployment, inflation, and economic growth. Finally, econometrics uses statistics to estimate, test, and predict patterns of behavior of the various units and relationships that make up the economy.

The undergraduate economics program is designed to give students a beginning sense of what economists do as well as how they think. After taking the introductory course, ECO 108, students acquire a more thorough background in economic theory by taking ECO 303 and ECO 305. The remaining economics courses used to satisfy the major requirements focus on particular aspects of economics (e.g., labor markets, industrial organization, money and banking, economic development, finance) showing how economists analyze the theoretical and empirical issues. Some upper-division courses apply statistical methods, which are taught (but not required) in the program.

Students with a degree in Economics can pursue graduate studies leading to an M.A. or Ph.D. in Economics, or to a Master of Business Administration degree. The major is also especially useful for students interested in graduate studies in such areas as law, human resources, public policy, and health economics. The majority of graduating Economics majors who continue their education either go to law school or pursue an M.B.A. A small number of graduates go to graduate school in economics. More than half the graduating seniors go directly into the job market. The great majority find entry-level positions in finance, marketing, sales, and various forms of business analysis and research. Many M.B.A. programs require applicants to have had work experience before applying to their program, so many students enter the job market temporarily and eventually return to school for an advanced degree.

Students are urged to consider enrolling in ECO 488, Internship. Internships provide opportunities for students to integrate work experience into the Economics major by doing related readings, keeping a daily journal, and writing an analytical paper under the supervision of a faculty member. To register for ECO 488, students must have the permission of the internship coordinator in the Department of Economics and the internship manager in the Career Center. For further information, students should contact the Internship Coordinator in the Department.
Courses Offered in Economics
See the Course Descriptions listing in this Bulletin for complete information.

ECO 108-F  Introduction to Economics
ECO 303-F  Intermediate Microeconomic Theory
ECO 305-F  Intermediate Macroeconomic Theory
ECO 310  Basic Computational Methods in Economics
ECO 316-K  U.S. Class Structure and Its Implications
ECO 317  Marxist Political Economy
ECO 320  Mathematical Statistics
ECO 321  Econometrics
ECO 325  International Economics
ECO 326  Industrial Organization
ECO 327-F  Health Economics
ECO 328-F  Regional Economics
ECO 329  Urban Economics
ECO 334-J  Demographic Economics of Developing Countries
ECO 335  Economic Development
ECO 337  Labor Theory
ECO 345  Law and Economic Issues
ECO 348  Analysis for Managerial Decision Making
ECO 351-354, 356-357  Special Topics in Economics
ECO 355  Game Theory
ECO 358-J  Topics in Developing Economies
ECO 360  Money and Banking
ECO 362  Financial Economics
ECO 373-H  Economics of Environment and Natural Resources
ECO 383  Public Finance
ECO 389  Corporate Finance
ECO 475, 476  Undergraduate Teaching Practica I, II
ECO 487  Independent Research in Economics
ECO 488  Internship in Economics

Requirements for the Major in Economics (ECO)
The major in Economics leads to the Bachelor of Arts degree. All courses offered for the major must be passed with a letter grade of C or higher.

Completion of the major requires 39 credits.

A. A minimum of 11 courses, at least nine of them in economics, distributed as follows:
1. ECO 108 Introduction to Economics
2. Intermediate economics courses:
   ECO 303 Intermediate Microeconomic Theory
   ECO 305 Intermediate Macroeconomic Theory
3. Six additional courses in economics at the 300 level and above. Each of these must be taken for a minimum of three credits.
4. Two additional courses, either in economics or from a list of pre-approved electives in other departments, each with a minimum of three credits.

Note: No more than two 400-level courses will count toward fulfillment of major requirements.

B. MAT 122 Overview of Calculus with Applications
   or MAT 123 Introduction to Calculus
   or AMS 151 Applied Calculus I
   or level 4 on the mathematics placement examination
   or any higher level calculus course
   (See Note 2)
C. Upper-Division Writing

Requirement:
Students should meet the upper-
division writing requirement before
the end of the junior year, demonstrat-
ing their competence in writing
for the discipline by obtaining
a satisfactory evaluation of their
writing from the faculty instructor
of any upper-division ECO course
except ECO 320. Where a term
paper or other major writing
assignment is a required part of
the course, this work will form the
basis of evaluation. When the
course involves no major writing
assignment, the instructor will
assign a special paper for those
students in the class seeking to
satisfy the writing requirement. In
these cases, the number of students
who will be permitted to seek eval-
uation may be limited.

Students must request permission
from the instructor at the beginning
of the semester to use the course
for this evaluation. Only students
with a declared major in Economics
or with an Economics concentration
in either the multidisciplinary stud-
ies major or the social sciences
major may apply to have their writ-
ing evaluated. Students who fail to
fulfill the requirement on their first
effort must do so in a subsequent
semester before graduation.

Notes:
1. Students who need to take MAP 103
will be unable to take ECO 108 in the
first semester of the freshman year
and will have to adjust their schedule
accordingly.
2. Economics is a quantitative social sci-
ence. Students planning to use their
background in economics for graduate
studies or in their careers should take
additional courses in mathematics and
applied mathematics.
3. A maximum of four courses in eco-
nomics taken at other institutions
may be applied toward the major.

Independent Research

Students are encouraged to explore
advanced subjects in economics through
independent research supervised by a
faculty member. Typically, an indepen-
dent research project will emerge after a
student has taken an upper-division ECO
course that provides a foundation of
knowledge and a relationship with a fac-
ulty member. The student should formu-
late the research project in consultation
with the supervising faculty member
before the start of the semester in which
the research is undertaken for credit
through ECO 487. The project should
culminate in a substantial written paper.
Credit is variable, and will be awarded on
the basis of the University’s guideline that
one credit should involve about four hours
per week of work. Outstanding work will
be featured in the annual university
undergraduate achievement celebration.

Internships

Students are encouraged to explore
opportunities for study in the context of
an internship in a business, government,
social service agency, or union setting.
Note that an internship for credit
through ECO 488 is an academic under-
taking; it is not the same as involvement
in what the employing agency may call
an internship.

An ECO 488 internship for credit pro-
vides an opportunity for the student to
integrate work experience into the
Economics major by doing related read-
ings, keeping a daily journal reflecting on
the lessons learned at work, and writing
an analytical paper under the supervi-
sion of an ECO Department faculty
member. Essentially, an internship for
credit is an independent research project
undertaken in the context of a work envi-
ronment that provides the student with
access to data, people, and experience
that will make the study of some eco-
nomic issue possible. Students are
couraged to base the internship study
on upper-division ECO courses that have
provided basic knowledge and analytic
tools appropriate to the work setting.
Credit is variable, depending upon the
time involved.

To enroll for internship credit in ECO 488,
a student must have the approval of a
supervising faculty member in the
Department of Economics and permission
of the internship manager in the
University’s Career Center. This will
involve acknowledgment and cooperation
from the employing agency. Permission
must be arranged before the start of the
semester in which the student enrolls in
ECO 488. The academic component of the
internship must be done at the same time
as the work component in the business or
agency in which the student works.

Honors in Economics

Qualified students can graduate with
honors in Economics. As specified below,
the requirements include an honors the-
sis approved by the Department’s direc-
tor of undergraduate studies. Qualified
students interested in graduation with
honors are urged to enroll in upper-divi-
sion economics courses that provide them
with the opportunity to write research
papers which may be submitted for con-
sideration as an honors thesis. For fur-
ther information, students should contact
the director of undergraduate studies for
the Department of Economics.

Honors in Economics will be awarded to
graduating seniors who have achieved
the following:
1. A grade point average of at least 3.25
in the four required courses (A. 1., 2.),
with no less than a B in any one of
these courses.
2. A grade point average of at least 3.50
in any four electives in economics at
the 300 level.
3. Six credits in economics at the
400 level.
4. An honors thesis, submitted to the
director of undergraduate studies
for honors evaluation.
