Mechanical Engineering (MEC)

Major and Minor in Mechanical Engineering
Department of Mechanical Engineering, College of Engineering and Applied Sciences

CHAIRPERSON: Fu-Pen Chiang  UNDERGRADUATE PROGRAM DIRECTOR: Q. Jeffrey Ge  UNDERGRADUATE SECRETARY: Patricia Brockbank
OFFICE: 113 Light Engineering Lab  PHONE: (631) 632-8310  E-MAIL: Patricia.Brockbank@stonybrook.edu  FAX: (631) 632-8544
WEB ADDRESS: http://me.eng.sunysb.edu

Minors of particular interest to students majoring in Mechanical Engineering: Science and Engineering (LSE)

Faculty

Daniel Attinger, Assistant Professor, Ph.D., ETH Zurich: Microfluidics; microscale heat transfer.
Fu-Pen Chiang, Distinguished Professor, Ph.D., University of Florida: Experimental stress analysis; solid mechanics; optical nondestructive evaluation.
Q. Jeffrey Ge, Associate Professor, Ph.D., University of California, Irvine: Mechanical design; kinematics; robotics; CAD/CAM; computer graphics.
Peisen S. Huang, Associate Professor, Ph.D., University of Michigan: D. Eng, Tohoku University, Japan: Optical measurement; precision engineering.
Imin Kao, Associate Professor, Ph.D., Stanford University: Robotics; control; MEMS; wafer manufacturing.
John M. Kincaid, Professor, Ph.D., Rockefeller University: Statistical mechanics; thermodynamics.
Chad Korac, Assistant Professor, Ph.D., Northwestern University: Nanotribology.
Robert V. Kukta, Assistant Professor, Ph.D., Brown University: Solid mechanics; thin films; crystal growth; micro-mechanics of defects in crystals.
Foluso Ladeinde, Associate Professor, Ph.D., Cornell University: Fluid mechanics and heat transfer; turbulence; computational fluid dynamics.
Jon P. Longtin, Associate Professor, Ph.D., University of California, Berkeley: Heat transfer; radiation interactions with materials; optical measurements.
Toshio Nakamura, Professor, Ph.D., Brown University: Solid mechanics; computational fracture mechanics.
Edward E. O’Brien, Professor Emeritus, Ph.D., Johns Hopkins University: Fluid mechanics; chemically reactive flows; turbulence.
Vishwanath Prasad, Professor Emeritus, Ph.D., University of Delaware: Heat transfer; transport processes.
Jahangir Rastegar, Associate Professor, Ph.D., Stanford University: Kinematics; dynamics; vibration control of high performance machinery; optimal design of mechanical systems.

Raman P. Singh, Assistant Professor, Ph.D., University of Rhode Island: Experimental mechanics; fracture; degradation; composite materials.
James Tasi, Professor Emeritus, Ph.D., Columbia University: Mechanics of solids.
Lin-Shu Wang, Associate Professor, Ph.D., University of California, Berkeley: Thermodynamics.
Hui Zhang, Associate Professor, Ph.D., Polytechnic University, Brooklyn: Materials processing; solidification and free surface problems; computational fluid dynamics.
Lili Zheng, Assistant Professor, Ph.D., Cambridge University: Turbulent combustion; solidification; magnetohydrodynamics; two-phase flow.

Affiliated Faculty

Robert D. Cess, Marine Sciences Research Center
Sheng Chang, Visiting Assistant Professor
John Metzger, Research Associate Professor
Clinton Rubin, Biomedical Engineering
George Stell, Chemistry

Adjunct Faculty

Estimated number: 5

Teaching Assistants

Estimated number: 13

Mechanical engineering is one of the core disciplines of engineering, and it encompasses a large number of subdisciplines that are at the heart of both traditional and leading-edge technologies. It is a broad profession frequently concerned with activities such as energy conversion, power generation, design, and manufacturing. The theoretical and technical bases of knowledge include the pure sciences, mathematics, and the engineering sciences, especially the mechanics of solids and fluids, thermodynamics, and kinematics. Mechanical engineering requires aptitude and interest in the physical sciences and the language of mathematics, and the ability to apply these to societal needs.

The undergraduate mechanical engineering program at Stony Brook recognizes that students have a variety of career objectives and a choice of industrial environments in which to pursue them. While the majority of our graduates are immediately employed in industry, a significant percentage pursue graduate study. Most of the students entering graduate schools continue mechanical engineering studies. However, some go to law, business, and medical schools. The undergraduate curriculum is specifically designed: 1) to provide the skills and instill the values necessary for success in the engineering profession and/or graduate-level study through rigorous instruction in fundamentals and engineering practice; 2) to provide the technological skills to practice modern mechanical engineering in today’s global marketplace, and the opportunity to develop specialized interests through electives, involvement in research projects, and industrial internships; 3) to provide comprehensive training in design and laboratory practice; and 4) to encourage the development of communication and leadership skills while increasing awareness of environmental and ethical responsibilities as a professional engineer.

The program in mechanical engineering provides students with a core education in mathematics and the physical sciences along with a broad sequence of courses covering thermal processes and fluid mechanics, mechanical design, solid mechanics, and the dynamic behavior and control of mechanical systems. Students also take courses that introduce them to the use of advanced computational methods for engineering design and analysis and data processing and analysis. A series of laboratory courses introduces them to sensors and electronics, modern instrumentation and experimental techniques used in engineering for tasks ranging from product design, evaluation, and testing to research. In
addition, students can select electives to provide either higher level academic training in preparation for graduate school or a broader exposure to subjects related to engineering practice to enhance their preparation for a job after graduation. All of these activities are carefully integrated so that graduates will demonstrate: 1) the ability to apply knowledge of mathematics, science, and engineering to mechanical engineering problems; 2) the ability to design and conduct experiments and to analyze and interpret data; 3) the ability to work professionally in both the thermal and mechanical systems areas including the design and realization of such systems to meet desired needs; 4) the ability to identify, formulate, and solve engineering problems; 5) the ability to function as a member of multidisciplinary teams; 6) a solid understanding of professional and ethical responsibility; 7) an ability to communicate effectively in written, oral, and visual form; 8) the broad education necessary to understand the impact of engineering solutions in a global and societal context; 9) a recognition of the need for and the ability to engage in life-long learning; 10) a knowledge of contemporary issues; and 11) the ability to use modern engineering techniques, skills, and computing tools necessary for engineering practice.

The current Program Educational Objectives for the mechanical engineering program are available at http://me.eng.sunysb.edu/undergraduate-program.php.

The spectrum of activity within each career area includes research, development, design, testing, manufacturing, operations and maintenance, marketing and sales, administration, and consulting. Some of the industries that require the expertise of mechanical engineers are: aerospace, automotive, industrial machinery and equipment, power, transportation, environmental, mining, chemical, textile, petroleum, pharmaceutical, computing, electronics, office machinery, and consumer household products. The program in Mechanical Engineering is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.

Courses Offered in Mechanical Engineering

See the Course Descriptions listing in this Bulletin for complete information.

MEC 100 Introduction to Mechanical Engineering
MEC 101, 102 Engineering Computing and Problem Solving I, II
MEC 104-E Practical Science of Things
MEC 105-E Everyday Science
MEC 111 Computer Science for Engineers
MEC 112 Practical C/C++ for Scientists and Engineers
MEC 160-E Introductory Nuclear Science and Technology
MEC 200 Technical Communication in Mechanical Engineering I
MEC 202, 203 Engineering Drawing and CAD I, II
MEC 290 Engineering Statics
MEC 292 Engineering Dynamics
MEC 280-H Pollution and Human Health
MEC 290-H Nuclear Technology: History, Society, Medicine and the Environment
MEC 300 Technical Communication in Mechanical Engineering II
MEC 301 Thermodynamics
MEC 305 Heat and Mass Transfer
MEC 309 Numerical Methods for Engineering Analysis
MEC 310 Introduction to Machine Design
MEC 316 Mechanical Engineering Lab I: Sensors and Instrumentation
MEC 317 Mechanical Engineering Laboratory II
MEC 320 Engineering Design Methodology and Optimization
MEC 323 Internal Combustion Engine
MEC 326 Manufacturing Processes and Machining
MEC 342 Introduction to Experimental Stress Analysis
MEC 350 Energy Conversion and Alternate Energy Technologies
MEC 363 Mechanics of Solids
MEC 364 Introduction to Fluid Mechanics
MEC 381 Transport and Fate of Pollutants
MEC 391, 392 Introduction to Automotive Engineering I, II
MEC 393 Engineering Fluid Mechanics
MEC 398 Thermodynamics II
MEC 402 Mechanical Vibrations
MEC 406 Energy Management in Commercial Buildings
MEC 410 Design of Machine Elements
MEC 411 Control System Analysis and Design
MEC 412 Computer-Aided Design
MEC 420 Turbomachinery and Applications
MEC 421 Statistical Quality Control and Design of Experiments
MEC 422 Thermal System Design
MEC 440, 441 Mechanical Engineering Design I, II
MEC 455 Applied Stress Analysis
MEC 475 Undergraduate Teaching Practicum
MEC 488 Mechanical Engineering Internship
MEC 490-492 Topics in Mechanical Engineering
MEC 495 Professional Engineering Seminar
MEC 499 Research in Mechanical Engineering

Requirements for Acceptance to the Major in Mechanical Engineering

Freshman and transfer applicants who have specified their interest in the Mechanical Engineering major may be accepted directly into the major upon admission to the University. Students in good academic standing who were admitted to the University but not immediately accepted into the major may apply for acceptance in any semester. Priority for admission to the Mechanical Engineering major is given to those students who have 1) completed MAT 132 and PHY 132 or their equivalents; 2) earned a g.p.a. of 3.0 in all mathematics and physics courses with no more than one grade in the C range; and 3) received completed course evaluations for all transferred courses that are to be used to meet requirements of the major.
### Requirements for the Major in Mechanical Engineering (MEC)

The major in Mechanical Engineering leads to the Bachelor of Engineering degree.

Completion of the major requires approximately 107 credits.

1. **Mathematics**
   - a. MAT 131, 132 Calculus I, II
   - b. AMS 261 Applied Calculus III or MAT 203 Calculus III with Applications
   - c. AMS 361 Applied Calculus IV: Differential Equations or MAT 303 Calculus IV with Applications

   **Note:** The following alternate calculus course sequences may be substituted for MAT 131, 132 in major requirements or prerequisites:
   - MAT 125, 126, 127
   - AMS 151, 161
   - MAT 141, 142

2. **Natural Sciences**
   - a. PHY 131/133, 132/134 Classical Physics I, II and Laboratories
   - b. PHY 251 Modern Physics and PHY 252 Modern Physics Laboratory or ESG 281 Engineering Introduction to the Solid State
   - c. CHE 198 Chemistry for Engineers

   **Notes:** The following alternate physics course sequences may be substituted for PHY 131/133, 132/134:
   - PHY 125, 126, 127 Classical Physics A, B, C or PHY 141, 142 Classical Physics I, II: Honors

   The following chemistry courses may be substituted for CHE 198:
   - CHE 131 General Chemistry I or CHE 141 Honors Chemistry I

3. **Laboratories**
   - MEC 316 Mechanical Engineering Laboratory I
   - MEC 317 Mechanical Engineering Laboratory II

4. **Mechanical Engineering**
   - MEC 101 Engineering Computing and Problem Solving I
   - MEC 102 Engineering Computing and Problem Solving II
   - MEC 202 Engineering Drawing and CAD I
   - MEC 203 Engineering Drawing and CAD II
   - MEC 260 Engineering Statics
   - MEC 262 Engineering Dynamics
   - MEC 301 Thermodynamics
   - MEC 305 Heat and Mass Transfer
   - MEC 326 Manufacturing Processes and Machining
   - MEC 363 Mechanics of Solids
   - MEC 364 Introduction to Fluid Mechanics
   - MEC 410 Design and Analysis of Machine Elements
   - MEC 411 System Dynamics and Controls
   - MEC 422 Thermal System Design

5. **Materials Science**
   - ESG 332 Materials Science I: Structure and Properties of Materials

6. **Engineering Design**
   - MEC 310 Introduction to Machine Design
   - MEC 320 Engineering Design Methodology and Optimization
   - MEC 410 Design and Analysis of Machine Elements
   - MEC 411 System Dynamics and Controls
   - MEC 422 Thermal System Design

---

http://www.stonybrook.edu/ugbulletin
MEC 440 Mechanical Engineering Design I
MEC 441 Mechanical Engineering Design II

7. Engineering Economics
   EST 392 Engineering and Manufacturing Economics
   or ECO 108 Introduction to Economics

8. Technical Electives
   Three technical elective courses are required, two mechanical engineering (MEC) courses and one selected from courses offered by any department of the College of Engineering and Applied Sciences, including MEC. A list of approved technical elective courses may be found in the Department’s Undergraduate Guide.

9. Writing and Oral Communication Requirement
   MEC 200 Technical Communication in Mechanical Engineering I
   MEC 300 Technical Communication in Mechanical Engineering II

**Grading**

All courses taken to satisfy requirements 1 through 8 above must be taken for a letter grade. The grade point average for the courses MEC 260, 262, 301, 305, 310, 316, 317, 320, 326, 363, 364, 410, 411, 422, 440, 441, and all technical electives (with the exception of MEC 488) must be at least 2.00. When a course is repeated, the higher grade will be used in calculating this average.

---

**The Minor in Mechanical Engineering**

The minor in Mechanical Engineering is offered for students who want the record of their University studies to show a significant amount of upper-division work in the discipline. Entry into this minor presupposes a background in mathematics and physics, represented by the prerequisite requirements for the courses listed below.

**Requirements for the Minor in Mechanical Engineering (MEC)**

Completion of the minor requires 18-20 credits, of which 12-13 are from required courses and 6-7 from electives.

A student who wishes to pursue this minor should consult with the undergraduate program director in the Department of Mechanical Engineering before registering for the elective courses. All courses must be taken for a letter grade and a g.p.a. of 2.00 or higher is required for the six courses that constitute the minor.

1. Four required courses:
   - MEC 260 Engineering Statics
   - MEC 262 Engineering Dynamics
   - MEC 301 Thermodynamics
   or ESG 302 Thermodynamics of Materials
   - MEC 363 Mechanics of Solids

2. Two elective courses chosen from either group A or group B
   - MEC 305 Heat and Mass Transfer
   - MEC 310 Introduction to Machine Design
   - MEC 320 Engineering Design Methodology and Optimization
   - MEC 326 Manufacturing Processes and Machining
   - MEC 364 Introduction to Fluid Mechanics
   - MEC 393 Engineering Fluid Mechanics
   - MEC 398 Thermodynamics II
   - MEC 402 Mechanical Vibrations
   - MEC 411 System Dynamics and Control

Note: Other electives require the approval of the undergraduate program director.
