Heat Pumps in Non-Residential Buildings

Specialists in Energy Ecosystems
Competitive Advantages of Heat Pumps

Oil Boiler: 1.0 ton CO₂
Gas Boiler: 0.7 ton CO₂
Steam: 0.6 ton CO₂

Electric Heat Pump: 0.2 ton CO₂
Emerging Technologies and Applications

Heat Recovery

Ground-Source

Air-Source
Integrating Heat Pump Technology

Modifications to the Building Energy Ecosystems
Business Model Innovations

Enables Deep Retrofits, Integrated Projects
Business Model Innovations

Alignment of Interests

True Commitment to Delivering Results
Business Model Innovations

Alignment of Interests

True Commitment to Delivering Results

Integrated Energy Performance Contracting
