Unmasking the Invisible: Rethinking Drug Use Stigma and Spoiled Identity in Medicine

Brandon Muncan, MD/MA Candidate 2024

This presentation explores the pervasive impact of drug use stigma on healthcare and individuals who use drugs, framing stigma as a "spoiled identity." Our primary objectives are threefold: to reveal the mechanisms by which stigma operates in healthcare settings, to elucidate its adverse effects on healthcare access and quality, and to provide actionable strategies for clinicians to deliver equitable and compassionate care, ultimately helping patients reclaim their dignity within the healthcare system.

Brandon Muncan is a four-year medical student at the Renaissance School of Medicine and master's degree candidate in the department of Medical Humanities, Compassionate Care, and Bioethics at Stony Brook University.

Award-winning poet, surgeon, hospital and health plan administrator, Maria A Basile, MD, MBA is clinical assistant professor in the Department of Family, Population and Preventive Medicine and Associate Director of the Center for Medical Humanities, Compassionate Care and Bioethics at the Renaissance School of Medicine (RSOM), Stony Brook University. Dr. Basile is the creator of the Special Topics in Medical Humanities Lecture Series, a student-driven space for presentations based on the research and lifestyle interests of RSOM students and their mentors.
