Advanced Course Requirements for the Specialization in Interdisciplinary Biology & CLS Double Major

The list of Advanced BIO Courses and Accepted Electives for the Biology Major can be found on the back of this page. All courses must be passed with a letter grade of C or higher. The Specialization requires:

1. At least five advanced lecture courses; one lecture course in each of the four Areas from the list of Advanced BIO Courses and Accepted Electives, plus a second lecture course in the Area of your choice (depth requirement). The CLS courses (**HAD 403 and HAS 355**) listed in the table below are accepted towards the BIO Major for students in this double major program.
2. Two advanced laboratory courses (**HAD 414 and 416**) plus at least ONE Advanced BIO Lab course chosen from ONE OF the four different areas of advanced courses or advanced courses from other Departments and accepted for BIO major credit in these four areas. Note, the advanced BIO laboratory course can be replaced by two semesters of independent research for a total of at least 4 credits in a BIO research course.
3. The Depth Requirements for this double major can be satisfied by **HAD 425 and 493**. This requirement can also be satisfied by completing a second advanced BIO lecture course in one of the four areas of advanced biology courses or from the list of advanced courses offered by other Departments and accepted for BIO major credit.
4. Additional advanced BIO lecture, laboratory, reading, or independent research courses, as needed, for a minimum of 33 credits of core and advanced biology coursework. A minimum of 23 BIO Major Credits must be completed for this double major.

Upper-Division Writing Requirement

The advanced writing component of the major in Biology requires registration in the 0-credit BIO 459 and approval of either a term paper or a laboratory report written for an advanced course in the biological sciences at Stony Brook.

Upper-Division Writing Requirement	
------------------------------------	--

Transfer students must take at least 15 credits of required core and advanced biology at Stony Brook in courses for majors at the 200 level or higher. Both of the two advanced laboratory experiences must be taken at Stony Brook.
