Biology B.S.
Interdisciplinary Studies Specialization

Cultivate scientific inquiry in the fields of biochemistry, molecular and cellular biology, neurobiology, organismal studies, ecology and evolution, marine biology, and environmental studies.

Course options include:
- BIO 310 Cell Biology
- BIO 314 Cancer Biology
- BIO 315 Microbiology
- BIO 320 General Genetics
- BIO 325 Animal Development
- BIO 328 Mammalian Physiology
- BIO 351 Ecology
- BIO 361 Biochemistry I

Resources & Support:
Undergraduate Biology Advising:
Rooms 107-110 CMM/BLL
