Opportunities Week of 10-9-20

Employee Testing Observer Position Available: In an initiative to help stop the spread of COVID19, the Employee Testing Observer Position was made to observe and help employees in the self-administration of COVID saliva swab testing. This position requires strong social skills and prior reception and office experience. The schedule for this position will be: Mondays through Fridays from 7am-4pm. While the schedule is from Mondays through Fridays, keep in mind students will only be required to work 2-3 days a week and the hourly rate is $17/hr. If you are interested, feel free to apply NOW!
Submit your applications here on Handshake!

Molecular Biophysics & Structural Biology Graduate Program: This program takes place at the University of Pittsburgh's School of Medicine. This is a joint program between the University of Pittsburgh and Carnegie Mellon University that trains students to conduct research at the interface of biology, chemistry and physics, and other traditional disciplines to unravel and explain biological phenomena in atomic and molecular detail.

Apply to the Gerstner Sloan Kettering PhD Program in Cancer Biology: At the Gerstner Sloan Kettering Graduate School, we are committed to training a new generation of scientists who will advance the frontiers of biomedical knowledge. Established in 2006, our graduate school provides an interactive environment in which PhD students get the full benefit of the close integration of basic science and clinical research for which Memorial Sloan Kettering Cancer Center is known. Our program offers students a wide range of learning and research opportunities with our internationally renowned faculty in a highly innovative and collegial scientific environment. If you are interested feel free to apply because applications are due by December 1, 2020.
Information Session: Wednesday, October 14 at 5:30 PM
Register for the upcoming session here!

LifeSci NYC Internship Program Info Session: The LifeSci NYC Internship Program places students in paid internships in the life sciences industry. Internships are in dozens of different companies, and include a wide range of roles encompassing science, business and tech. This year, in addition to summer internships, we are also placing students (and recent graduates) into internships throughout the school year as well as full- and part-time jobs. Note that Stony Brook students must be NYC residents in order to be eligible. There is some flexibility for graduate students who were previously NYC residents and have now moved to Stony Brook to do their graduate work. Program will be offering a virtual Info Session specifically for Stony Brook students (undergraduates through PhD’s & postdocs) to share information about our program.
Information Session: Monday, October 19 from 4:30 - 5:30 pm.
Register for the information Session via Handshake.
For students unable to make it on the 19th, we also have the following info sessions scheduled that are open to students from any university:

**Wednesday, October 14, 1-2 pm**

**Monday, October 26, 3-4 pm**

**Tuesday, November 10, 4-5 pm**

*Disclaimer: Undergraduate Biology does not endorse or take responsibility for any off-campus programs listed in Opportunities emails. While we do our best to vet any opportunity that is shared, please let us know immediately if you are suspicious of any employers/programs*
