Opportunities Week of 11-05-21

Graduate program for Medical Laboratory Scientist: Graduate Program for Medical Laboratory Scientists The Medical Molecular Biology part-time programs (Master of Science and Advanced Certificate) at the School of Health Technology & Management prepares you to work in the fastest growing areas of the lab; molecular diagnostics, flow Cytometry and cytogenetics. Accepting applications for Spring and Summer 2022!
Visit our website for more information here
You can get in touch with the program director at gloria.viboud@stonybrook.edu

Biochemistry, Microbiology, and Molecular Biology (BMMB) PhD program at Penn State: The Biochemistry, Microbiology and Molecular Biology (BMMB) doctoral program is now accepting applications for our Fall 2022 cohort. BMMB evaluates every application holistically, meaning we review your entire application to learn your whole story. GREs are no longer accepted as part of your application.
Applications are due December 10, 2021
For more information and access to the application click here

Pandemic Narratives Project Spring 2022: We are pleased to report that with the continued support of the College of Arts and Sciences, we will be continuing the "Pandemic Narratives" project in Spring 2022, including talks, outside speakers, workshops and other events. We will be reflecting on the impact that the COVID-19 pandemic has had on Stony Brook University, Long Island, and the rest of the world. As part of the Pandemic Narratives project, we have created an array of options for undergraduate student engagement through enrolling in internships and other credit-bearing courses. We've had some great work done in the fall that we hope to continue into the spring, including blogging and podcasting. We continue to work with WUSB and other campus groups to build on existing initiatives as well as to start some of our own. We welcome students looking for interesting experiential learning opportunities.
Please see the flyer attached to this email for more information

Careers in Healthcare: Clinical or Nonclinical, happening on November 11 from 7 pm to 8:30pm, will allow students to hear about prospective careers and employment opportunities, and get the chance to network with recruiters and professionals who are in the healthcare industry, in both the clinical and nonclinical sectors! A few companies represented on the panel include: Center for Healthcare Innovation, Stony Brook Hospital, YAI, CVS Health, Northwell Health.
Event: November 11, 2021 from 7pm to 8:30pm
For more information click here

Healthcare Internships and Research Opportunities: The second event would be, Healthcare Internships and Research Opportunities for Summer 2022, happening on Thursday, November 18 from 7 pm to 8 pm, and helps students explore various clinical or research experiences, such as becoming a volunteer EMT, or research assistant. This event will also feature ways to get involved in summer healthcare programs such as: Summer patient-related programs at: Columbia Medical, Memorial Sloan Kettering, Northwell Health, Mount Sinai and Albert Einstein and Research programs at: LifeSci, Genetic Departments, Memorial Sloan and Health Career Connection
Event: Thursday, November 18 from 7 pm to 8 pm

Earn upper-division credits (EGL 488) and satisfy EXP+ through one of the following:
Health-justice related internships: Health Justice and Healing in a Time of Pandemic--Mondays 6:30-8:30pm (via ZOOM): The Humanities Institute at Stony Brook, in collaboration with Herstory Writers Workshop, invites student interns to join health care providers, first responders, medical and nursing students, and those most impacted by healthcare disparities to join an inter-generational Zoom writing circle. Learn how story-based strategies for change can be mobilized to address health-related challenges, injustices and inequities that have become even more pronounced in the wake of COVID-19. Workshop participants will be invited to contribute to the "Pandemic Narratives Initiative," which brings together SBU students, faculty and community members to reflect upon the impact of the COVID-19 pandemic and create an archive for the future.

Making Our Voices Heard: Memoirs to (Re)Imagine Mental Healthcare--Thursdays 4:30-6:30pm (via ZOOM): This workshop invites people who have been affected by the mental healthcare system, who may identify as mad, psychiatric survivors, psychiatric consumers, or neurodivergent, to write their memoir in a mad-affirming, human rights-driven, supportive environment. In this workshop, we will combat stigma and discrimination through the power of storytelling to change hearts, minds, and policies. We invite you to join us to use the power of your voice to (re)shape our mental healthcare system and (re)imagine care.

Shaping Spaces: Disability Stories to Create a Movement--Saturdays 3-5 PM EST (via ZOOM): This intergenerational workshop creates a space for disabled people and disabled activists to shape their stories in community with other people with disabilities. This group is open to anyone who identifies as having a disability, be it physical, cognitive, neurodiversity, madness, mental illness, chronic illness, or any other disability experience. Join us in crafting stories and pushing toward a more just world for disabled people.
