Opportunities Week of 11-13-20

Grow More Foundation Spring 2021 Remote Internship Opportunity: Grow More is currently seeking students with an interest in applying biotechnology to solve real-world agricultural problems. Your aim will be to independently design experiments in gene editing or RNAi with the goal of contributing to Grow More’s ENABLE program. You will research and defend plant genetic traits that could have a significant impact in developing countries. This internship will focus heavily on reading, discussing and presenting scientific literature with a team of like-minded peers. Though you will work independently, you are expected to be an active, communicative and contributing member of the team. Applicants must have a demonstrated history and experience in biotechnology and/or molecular biology. If you have any questions or would like to apply for this internship, please email Matthew Venezia (mvenezia@growmorefoundation.org). Application deadline is November 30th. You will be notified if selected for an interview in December.

Undergraduate APAMSA Initiation: The Asian Pacific American Medical Students Association (APAMSA) is a national organization of medical and pre-medical students committed to addressing the unique health challenges of Asian and Pacific Islander American (APIA) communities. The Stony Brook School of Medicine's branch of APAMSA is looking to establish an undergraduate division in order to generate a space for students to exchange information/experiences as well as develop initiatives to address the needs of their local APIA communities. *This club is NOT limited to only those of Asian or Pacific Islander descent, but is rather an opportunity for anyone who is interested in helping to address the health issues faced by these populations. You can access the interest form here!

SBU Go Club Game Night: Stony Brook Go Club would like to invite you to game night! The game night will be in collaboration with other clubs and organizations so don’t miss out! A little bit about Go Club: Go Club is a game that can train students' brains, and is played world-wide also with main recognition in the Tech, Math, and the AI field. The club meets every Tuesday and Thursday from 8 to 10 pm to practice, learn or discuss about Go. If you are interested in learning more about Go Club please join the weekly meetings on Tuesday and Thursday from 8 to 10 pm via zoom. If you would like to join the collaborative game night click here!

Additional Section of SOC 105 Available: We have been able to open up an additional section of SOC 105 - Introduction to Sociology - for Winter 2021. It is SOC 105.31. If you are a BIO BA student who has chosen the MHS minor, this class is required, so make sure you register!

Open Position for a Research Support Specialist: There is an open position for a research support specialist at the Cancer Center. This lab is looking for a soon-to-be graduate (individuals graduating in December) to support their research project. The Research Support Specialist will be responsible for supporting critical laboratory activities including but not limited to chemical synthesis, mammalian cell culture and handling of mice for imaging procedures and therapy studies. Support will be provided by performing research activities as well as the analysis and presentation of the resultant data. Additionally, the RSS will be responsible for managing laboratory inventory, placing orders for equipment/supplies.
In order to apply and learn more about the position, access the job application [here](#).

**UB’s Graduate Fair:** The University at Buffalo is a leader in graduate education, and it is a top choice for scholars, researchers, leaders, thinkers and lifelong learners seeking professional advancement and meaningful growth.
