Opportunities Week of 11-19-21

Masters of Science at Notre Dame: The University of Notre Dame’s Master of Science in Global Health (MSGH) program enables students to bridge classroom training with complex, real health needs of low-resource communities around the world through hands-on experience. Jointly offered by the Eck Institute for Global Health, College of Science, and Keough School of Global Affairs, the two-year MSGH program leverages diverse resources and strengthens students’ capacities to effectively address the complex nexus of global health, development, and poverty. Early action deadline is on December 3, 2021. Learn more about the program here.

Anonymous Survey to assess awareness of forest on campus: Our third Awareness Assessment survey is out! What do you think about your own university campus environment? How do you think the university should handle the forests on campus? Tell us about it and share your ideas! You can access the survey here.
