Opportunities Week of 3-19-21

Michel Colbert Scholarship Application: The Michel Colbert Endowed Scholarship was established to honor the memory of Michel Colbert, a Biology graduate from the class of 1986 who was killed in the September 11, 2001 attack on the World Trade Center. The goal of this scholarship award is to enhance successful completion of a Bachelor's degree in the biological sciences for a student confronted with significant and unanticipated financial difficulties. Although there is no strict requirement for the year of study, students are typically selected as Michel Colbert Fellows prior to their senior year and receive a full tuition scholarship to support their studies through to graduation as long as they maintain good academic standing and full-time status.

Application deadline is March 26, 2021

Edward J. Mardovich '81 Memorial Scholarship Application: The Edward J. Mardovich ’81 Memorial Scholarship in Undergraduate Biology was established by family, friends and fellow alumni of Eddie to provide a permanent source of scholarship support to Stony Brook undergraduate students majoring in Biology. Eddie earned degrees at Stony Brook in Biology and Sociology. He was a former employee at Euro-Brokers, Inc. and was tragically killed in the terrorist attack on the World Trade Center on September 11, 2001. The scholarship is available to any Junior or Senior majoring in Biology with a GPA greater than 3.0. The scholarship is restricted to United States citizens. Selection will be based on both the academic record and a personal statement that addresses the importance of their studies to their long-term career plans and how receipt of the scholarship support will enhance these plans. Awards to cover $1,000 of educational expenses per semester will be given for a full academic year, with a possibility of renewal for students who receive the Scholarship as a Junior. Recipients will be expected to maintain continuous full-time enrollment with a minimum GPA of 3.0 for the entire scholarship period.

Application deadline is March 26, 2021

Athletic Training Program (AT): Interested in combining your love of Sports and Medicine? Learning the skills to prevent, care for, evaluate, manage, and rehabilitate injury and illness in athletic and active populations? The Athletic Training Program may be the program for you! The Master of Science degree in Athletic Training at Stony Brook University is offered through the School of Health Technology and Management within Stony Brook Medicine, and is accredited by the Commission on the Accreditation of Athletic Training Education (CAATE). This two year, full-time 77 credit program is designed for students who have successfully completed their baccalaureate degree and prepares students to be eligible to take the Board of Certification (BOC) exam. As students with a baccalaureate degree in biology you will have all of the necessary academic coursework to be eligible for admission into the program.

Application deadline is March 31, 2021

Virtual Information sessions: See the attachment below!

Biochemistry and Cell Biology (BCB) Masters Program 2021: The Department of Biochemistry and Cell Biology is currently accepting applications for admission to our Master of Science graduate program for Fall, 2021. This program is designed to prepare students for careers in research, teaching, biotechnology, or further advanced studies in health and life sciences. Both research-based and literature-based thesis options are available, and can be
completed by full-time students in three semesters. Students will have the opportunity to work with faculty of diverse research interests spanning biochemistry, genetics, cell biology, molecular biology, and structural biology, from within the Biochemistry and Cell Biology Department as well as interested faculty from other departments at Stony Brook.

**Application deadline is April 15, 2021**

**Molecular Interactions Virtual (MIV) REU Program:** MIV-REU is an NSF-funded program to engage students in ongoing, authentic molecular-interactions research during the 2021 summer. Small teams of remote students will work closely with mentors to develop a tailored research project with training in chemical principles, hypothesis generation and data analysis, as well as science communication, professional development, and community building. Please see the attached flyer for more information.

**Application deadline is April 15, 2021**
