

Opportunities Week of May 15, 2020

Biomedical Research and Healthcare Marketing Remote Summer Internships Information Session:

Mentoring in Medicine is hosting an information session, as an opportunity for you to learn more about the remote summer internship positions they have open this summer. As part of the Biomedical Research internship, teams of students will conduct a population study on wellness intervention strategies during the era of COVID-19 and assisting healthcare researchers. Student in the Healthcare Marketing internship will work on developing social-media driven public health campaigns and offering marketing assistance to healthcare professionals.

Information Session is Saturday, May 16, 2020, 10:00AM – 12:00PM EST

To register for the info session, visit <http://medicalmentor.org/internships/>

Pre-Health Workshop for 2021 Applicants: For students applying to Medical, Dental, Optometry, Podiatry, and Veterinary Schools for the 2021 academic year. Attendance is required in order to schedule a committee letter interview in 2020.

Event is May 21, 2020, 2:00PM – 3:00PM EST

To attend the workshop via Zoom, visit

New Fall 2020 English Course for STEM students:

EGL 250.01 HUM, GLO Introduction to English Studies for STEM Majors

STEM and Health Sciences majors at Stony Brook University will become leaders in their fields, steering advancements in knowledge in countless fields. Students in this first course in a new proposed minor-- Literature, Humanities, and STEM--will leave it better prepared to explain their work to non-specialists and better prepared to understand ethical, social, economic, and even emotional ramifications of technological advancements.

Are you a major in Science, Technology, Engineering, Math, or Health Sciences who appreciates reading literature and discussing films? Are you one of many future STEM workers who wants to understand the roles that the humanities play in imagining, enhancing, and improving science and technology? Have you been inspired by *Star Trek*, *Star Wars*, *West World*, *The Matrix* or other popular films and television shows that feature science and technology? Are you concerned about the ethical ramifications of technology, health care, automation, and artificial intelligence? Then this course is for you.

EGL 250 will focus on literature and films that showcase issues related to STEM. We'll read classic texts (such as *Frankenstein*), contemporary texts (such as *Scythe*), fascinating nonfiction (such as *Gulp: Adventures on the Alimentary Canal*) and explore the ways in which they raise problems and insights about our understandings of science and technology for solving contemporary problems. We will also explore scenes from a number of well-known films that inspired and/or raised alarms about ethical approaches to advancements in human understandings.

NO ADDS AFTER THE FIRST WEEK

Prerequisite: WRT 102 or equivalent

LEC 01 TUTH 4:00-5:20 PM K. LINDBLOM
