Opportunities Week of 5-7-21

Grow More Foundation Internship:
SUMMER: Grow More Foundation is seeking interns to join us in-person in the lab and remotely. Interns will assist in the development of the ENABLE program which seeks to empower laboratories across Africa with the means to improve native crops via biotechnology. A minimum of two credit hours (7-9h per week) is required. See flyer for more information. Apply here.
FALL: Grow More Foundation is seeking interns to join us in-person in the lab and remotely. Interns will assist in the development of the ENABLE program which seeks to empower laboratories across Africa with the means to improve native crops via biotechnology. A minimum of two credit hours (6-8h per week) is required.
Lab Interns (In-Person): will assist by following and testing protocols in the lab as well as constructing cloning kits. Lab interns will be expected to spend at least 6h per week in the lab and to attend weekly Zoom meetings. See flyer for more information. Apply here.
Communications Interns (Remote): will assist by developing outreach, communication and educational resources as well as organizing meetings and collaborative group work. Communications interns will be expected to spend at least 6h on general tasks and to attend weekly Zoom meetings. See flyer for more information. Apply here.

Where Foodie Meets Entrepreneur: Cultured Kids Cuisine is an international non-profit organization striving to foster cultural awareness through food. Our organization is run by 100+ women and non-binary high school and college students from all over the world. We offer a variety of free services to children, such as our virtual cooking workshops, food anthropology course, educational podcast, food blog, eCookbook, and much more. Since our founding in July 2020, we have made an impact on over 1,500 children around the world, educating them to be kinder, and more culturally appreciative human beings. We are recruiting college students for our third cohort. While no previous experience is necessary, all we ask is that applicants are passionate about building a future of love and tolerance through food. The internship is fully-funded and students will be paired with a mentor and have the opportunity to attend weekly workshops led by successful women founders and entrepreneurs, growing their network and skillset in the process. Furthermore, this program pushes students to think creatively about solving real-world problems, instills in them the initiative to be proactive in their communities, and empowers them to see their ability to do something bigger.
