

# Sei Sujishi

Professor of Chemistry

1959-1986

Chair of Chemistry 1972-1975

Scientist and Administrator

Vibrational Spectra and Structures of Digermyl Ether and Digermyl Sulfide, *Journal of the American Chemical Society*, **86**, 1679 (1964).

Professor Sujishi's research centered on the synthetic and structural chemistry of silicon and germanium, including spectroscopic studies. He served as Dean of Physical Sciences and Mathematics for four years.
