

Global Engineering

How to Deliver **FAR BEYOND** Engineering

Presented by Office of Global Affairs, Institute for Global Studies

Join us at the Global Forum for the first step on the road toward a cooperative culture of engineering.

Some problems can be solved by good or better technology -- drones that fly medicine into remote areas, for example -- other problems, such as global climate change, require interventions that go far beyond the means of engineers.

Wed, April 11 | 1:00 - 2:30pm | Wang Theater

Panelists

Fotis Sotiropoulos

Dean
College of Engineering and
Applied Sciences

Petar Djurić

Chair & Distinguished Professor
Electrical and Computer Engineering

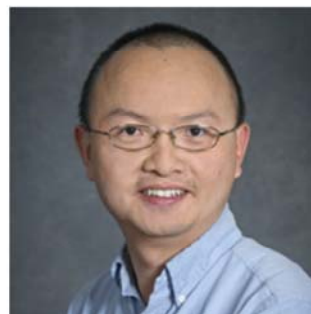

Wolf Schäfer

Interim Department Chair
Department of Technology & Society
Director, Institute for Global Studies

Acacia Leakey

Discovery Project Engineering
Coordinator
Be Local Group

Gang He

Assistant Professor
Department of Technology and
Society
