Why SUNY Korea?

History Makers, We Change the World

SUNY Korea was established by the Korean Government in the first exchange agreement to create a branch campus and graduate degree program with the State University of New York. This program was designed to provide Korean students with a global perspective in a four-year academic program in Technology and Engineering. It is set to fulfill this educational goal by focusing on technology and its ability to apply those studies to social needs. SUNY Korea students have the opportunity to study in one of the top institutions in the USA, study in Korea, and become global leaders.
