</tbody>
</table>

Retention rates are measured from fall semester to fall semester as of the official census date; graduation rates are measured based upon degree completion between Sept. 1 and Aug. 31 of the following year. Original Cohort data source is OIR student extract (STEX) files through fall 2010; SBU data warehouse for fall 2011 and later; subsequent retention matched against STEX and Warehouse.

Adjusted Cohort removes students due to death or military service as allowed for graduation rate reporting to IPEDS through the sixth year. The university makes no adjustments to this cohort after year six. The adjusted cohort for most recent two years should be considered preliminary and may change. Data source for completions through year six is the IPEDS Data Center.

**Note:** Data for retention to the third year and beyond may differ slightly from previously released reports due to administrative updates.
