

Coming Back Safe and Strong

By working together and following these tips to prevent coronavirus infection, we can keep each other safe in the workplace:

- Wash hands frequently with soap and water
- Use hand sanitizer containing at least 60% alcohol if soap and water is not available
- Cover coughs and sneezes
- Avoid touching eyes, nose or mouth
- Monitor health daily; stay home if sick
- Call the COVID-19 information line, (631) 632-5000, if symptomatic
- Disinfect frequently touched workspace surfaces
- Refrain from using co-workers' offices, phones, desks or equipment
- Wear a mask in public if you are:
 - within, or unable to maintain, six feet of distance from others
 - in a hallway, elevator or bathroom
 - in an office used by more than one person or when there is inadequate separation between individuals
 - in laboratories and support areas
 - in a public or private transportation carrier or for-hire vehicle
- Practice physical distancing (keep about two arms' length from one another)
- Avoid large gatherings or meetings
