Industrial Management Program

Managers and knowledge workers face the challenges of rapid change, evolving technology and burgeoning information in today's global economy. This program's goals are to enable individuals to understand the integration of an enterprise's processes, as well as how to utilize modern tools, techniques and technologies to make their organization more competitive and profitable. The curriculum introduces the strategic fundamentals of the customer/value driven enterprise, the management concepts of organizational design and structure, and the basic business processes for running a successful enterprise.

The program is offered in conjunction with the Department of Technology and Society and articulates with its MS in Technological Systems Management as well as SPD's Master of Arts in Liberal Studies. Matriculation in either of these master's degree programs requires a separate application.

**Gainful Employment Regulation Disclosures**

**Educational Computing Admissions**

A. Personal statement.

B. A bachelor's degree, with a cumulative 3.0 grade point average.

C. In those cases where the departmental admissions committee deems it desirable, personal interviews with departmental representatives may be necessary.

**Certificate Requirements**

This certificate program consists of 6 three-credit courses, selected from the list below.

1. **Core Courses** - 9 credits
   - EMP 502 Engineering Economics
   - EMP 506 Engineering Enterprise Management
   - EMP 509 Management Information Systems

2. **Required Courses** - 6 credits
   
   Two of the following five courses must be taken:
   - EMP 501 Behavioral and Organizational Aspects of Management
   - EMP 503 Legal and Regulatory Aspects of Management
   - EMP 504 Quantitative Methods of Management
   - EMP 511 Starting the High Technology Venture
   - EMP 517 Quality Management

3. **Elective** - 3 credits
   
   Select one of the required courses or one course from the following list:
