School of Nursing

The Doctor of Philosophy (PhD) represents the highest level of formal education for a career in nursing research and the scholarship of discovery. It prepares scholars for expression and communication of the knowledge base in the profession of nursing. PhD graduates develop the scientific foundation, steward the profession, define its uniqueness, maintain its professional integrity and educate the next generation of nurses. The PhD in Nursing program at Stony Brook University (SBU) School of Nursing (SON) will have a strong scientific emphasis within the discipline of nursing and an understanding of the science of related disciplines and translation science. The program is designed in a broad, cross-functional perspective to prepare nurse scientists to collaborate across disciplines to solve complex problems and address multiple issues facing individuals, families, communities and populations. Translational and innovative research, promoting interdisciplinary collaboration at the highest level, will be foundational to the program. To foster success and promote transformational, far-reaching opportunities, students will engage in a diversified curriculum.

The 54-credit curriculum is designed for Master’s-prepared nurses who aspire to research and academic roles within health care and educational settings. It will build on the foundation of research and scholarship gained at the master’s level. The full-time, cohort-based program, to be offered on-site (one day/week) with web-enhanced technologies, contains three phases: Coursework, Proposal Development and Dissertation. Coursework and proposal development will take two and one-half years to complete with an additional one year for dissertation completion. The PhD candidate will select an area of research congruent with interdisciplinary faculty expertise. The SBU intensive research environment provides opportunities for mentorship by faculty within and outside the SON. Our Office of Nursing Research assists faculty and doctoral students in meeting research goals by providing administrative support, grant preparation support and management, statistical consultation, and dissemination of research findings through poster/podium presentation and manuscript preparation.

Admission Requirements and Application Procedures

Application procedures and requirements as set forth in this Bulletin must be followed. Applications will be reviewed by PhD in Nursing program faculty and the Committee on Admissions and Academic Standards. All admissions for the PhD in Nursing will begin annually in June. The number of openings for the PhD in Nursing program is small and acceptance is competitive. Additionally, congruency of the applicant’s research interest with faculty expertise may impact admission decisions.

Requirements for admission include:

1. Applicants to the Ph.D. in Nursing Program must hold a Master's degree in nursing from a nationally accredited program or its international equivalent. Students with a master’s degree in a related discipline (i.e., MPH) and a Bachelor’s in Nursing may also be considered.
2. A current unencumbered license to practice as a registered professional nurse
3. One official copy of any transcript from any undergraduate college or university attended, from which a degree was conferred. Applicants must submit one official copy of any transcript relating to any graduate level work undertaken, regardless of whether or not a degree was earned. Note: Educational systems that cannot be compared to the United States must be evaluated by a US credentials evaluation service before admission can be finalized.
4. Minimum overall GPA of 3.0 on a 4.0 scale
5. Graduate Record Examination (GRE) General Test. Official score reports must be sent directly from ETS (photocopies are not acceptable).
6. Three letters of recommendation attesting to your academic ability and
7. Evidence of successful completion (grade C or better) of a graduate-level statistics course within the last five years
8. Curriculum Vitae including education and employment history; honors and awards; and publications and grantsmanship. Must demonstrate a progressive record of professional development in nursing
9. A personal interview with PhD program faculty
10. An exemplar of scholarly writing (e.g., publications)
11. A statement of professional goals and research interests including reference to Stony Brook University School of Nursing PhD faculty whose current research is aligned with your areas of interest and expertise.

Stony Brook University Graduate Bulletin: www.stonybrook.edu/gradbulletin
12. Documented proficiency in English for international student (see the English Proficiency Requirements for Non-Native Speakers of English in the Graduate Bulletin (http://www.stonybrook.edu/sb/graduatebulletin/current/degrees/phd/index.php)

13. International Applicants: Each person planning to study in the United States is required to have the appropriate immigration status. The immigration documents for F-1 and J-1 student status are issued by Visa and Immigration Services at Stony Brook University based on receipt of required supporting documentation, including evidence of admission, English language proficiency, and proof of financial support for the program of study. (see the International Students section in the Graduate Bulletin (http://www.stonybrook.edu/sb/graduatebulletin/current/degrees/phd/index.php)

These admission requirements constitute the minimum expectations for applicants. Applicants should be aware that students selected for admission generally exceed these requirements.

Requirements for the PhD in Nursing Program

A. Curriculum Requirements

The full-time, cohort-based program, to be offered on-site (one day/week) with web-enhanced technologies, contains three phases: Coursework, Proposal Development and Dissertation. Coursework and proposal development will take two and one-half years to complete with an additional one year for dissertation completion. All students will follow an approved program of courses, called the Academic Program Plan, determined to meet his or her needs and to satisfy program requirements. The Academic Program Plan, developed by the student in consultation with the faculty advisor, should provide sufficient depth and breadth for the chosen area of research, including specific content areas, methodological and analytic approaches. Any changes to the plan must be approved by the faculty advisor and submitted to the Director of the PhD in Nursing Program for final review. The following includes minimum curriculum requirements:

Stony Brook University Graduate Bulletin: www.stonybrook.edu/gradbulletin
E. Qualifying Examination

The purpose of the Qualifying Examination is to ascertain the breadth and depth of the student’s preparation and to appraise readiness to undertake significant original investigation. Successful completion of the examination signifies the student’s advancement to candidacy and potential to complete continuing coursework and the dissertation. It also represents the faculty’s commitment to provide scholarly resources to assist the student in meeting these benchmarks. The advancement to candidacy is achieved by satisfactory completion of the Qualifying Examination, which is taken prior to the dissertation phase (NUR 690 Dissertation Seminar I). At the discretion of the program, the Qualifying Examination may be oral, written, or both. The Examination Committee is appointed by the Program Director. The Committee must include at least two faculty members from the program and may include one or more members from outside the University or program. Results of the examination will be communicated to the student as soon as possible and to the Graduate School within one week of the completion of the examination.

B. Cognates

Students will select a minimum of three cognate courses (9 credits) to support the dissertation. They individually and collectively enhance the depth of understanding of the student’s chosen area of research. Cognate courses are taken after the first year of coursework when a student’s chosen research area has become more clearly defined. Cognates are typically in specific content areas (i.e., self-management, biomarkers, biomedical informatics) or in specific methodological or analytical approaches (i.e., research design methodologies or data analytical methods).

These courses must be at the graduate level and taught by doctorally-prepared faculty either from within the School of Nursing or the University community at large. Students should consult with their faculty advisor regarding possible content and methodological areas that will support the chosen area of research.

C. Teaching Practicum Requirement

All doctoral students in the PhD in Nursing Program at Stony Brook University must complete at least one semester of practicum in teaching under supervision. Students in the PhD in Nursing Program will register for NUR 698 Seminar Series: Academic Role and Teaching Practicum to enhance their expertise in the role of an academician. The practicum will be individualized according to the student’s prior experiences in the academic role. The practicum will provide students with expertise in course development, teaching pedagogies and strategies for curriculum delivery, test construction and evaluation methodologies for didactic and clinical learning, approaches to teaching diverse learners and difficult student situations, and professional role development among others.

The practicum may include making seminar or class presentations, assisting in laboratories, or leading discussion sessions. Grading experience by itself will not be considered sufficient for satisfaction of this requirement. Faculty are responsible for providing informal feedback and formal evaluation. Following (or in some cases, concurrent with) proper training through a teaching practicum and after having fulfilled other requirements for teaching (e.g., demonstration of spoken English proficiency for non-native speakers of English), a graduate student may serve as a teaching assistant (TA) in courses at Stony Brook University, where the instructor of record is a faculty member. An advanced graduate student may act as the instructor of record for an undergraduate course offered at Stony Brook University only if he or she is appointed to an adjunct faculty position as a lecturer. No student shall be appointed to such a position until he or she has been advanced to candidacy (G5 only). It is not required that such students be enrolled in full time status, although this is recommended. Appointment procedures follow the same process as regular faculty appointments. Graduate students at G4 level or below cannot be designated as the Instructor of Record for any course offered at Stony Brook University. They may be appointed as Teaching Assistants. In addition, there must be a designated faculty supervisor who serves as the Instructor of Record for the course.

Each student, with the help of their faculty advisor, will identify the semester during which they will complete the teaching practicum, develop individualized student learning outcomes based on prior experiences in the academic role and identify a faculty preceptor. The faculty advisor, faculty preceptor and student will develop the structure of the practicum and plan activities to accomplish the student learning outcomes.

D. Research Practicum Requirement

All doctoral students in the PhD in Nursing Program at Stony Brook University must complete at least one semester of practicum in research under supervision. Students in the PhD in Nursing Program will register for NUR 697 Seminar Series: Investigator Role and Research Practicum to enhance their expertise in the role of an investigator. The practicum will be individualized according to the student’s prior experiences in the investigator role. The practicum will provide students with expertise in selected aspects of the research process, including development of the conceptual/theoretical foundation of the study, study implementation (e.g. start-up activities, consent, intervention, fidelity management), data collection, data management, data analysis, participate in preparation of grant proposal and dissemination of findings. Each student, with the help of their faculty advisor, will identify the semester during which they will complete the research practicum, develop individualized student learning outcomes based on prior experiences in the investigator role and identify a faculty preceptor. The faculty advisor, faculty preceptor and student will develop the structure of the practicum and plan activities to accomplish the student learning outcomes.
examination. A repetition of the preliminary examination, upon failure, may be scheduled at the discretion of the Program Director. The dean of the Graduate School must approve a request for repeat examination.

F. Dissertation Proposal
The dissertation proposal is prepared under the guidance of a faculty advisor. The proposal will be defended orally at a seminar, announced two (2) weeks in advance, and is open to PhD in Nursing faculty and students and to the larger academic community. The dissertation proposal defense committee must include at least two faculty members from the program and may include one or more members from outside the University or program. The dissertation proposal defense will be scheduled after successful completion of NUR 691 Dissertation Seminar II. Upon successful defense of the proposal, the student may register for NUR 699/700/701 PhD Dissertation Research.

G. Dissertation
The three requirements for the Ph.D. are assessed in the final defense of a dissertation.

1. The dissertation should demonstrate significant original work.
2. The final dissertation should be presented with clarity of thought and excellence of exposition that make it suitable for publication as a book or a series of papers in learned journals.
3. The dissertation should demonstrate a breadth and depth of the candidate’s knowledge beyond the confines of his or her own research and is also critically assessed in the defense and at various examinations during the student’s studies.

Successful oral defense of the dissertation to the candidate’s dissertation committee and the University community at large is required. The dissertation committee will include the candidate’s dissertation advisor, at least two faculty members from the program and may include one or more members from outside the University or program.

H. Program Time Limit
The time limit for a doctoral degree, including coursework, examinations, practicums, and dissertation is seven (7) years from date of matriculation in the PhD in Nursing Program. In exceptional cases where the program cannot be completed within these periods, students may petition for an extension of the time limit. The Request for Waiver of Graduate Time Limit form can be found by selecting the forms link from the Graduate School Web site. These petitions require the approval of the student’s faculty advisor and Director of the PhD in Nursing Program. Requests for a time limit extension must be filed before the limit is exceeded and must contain a significant justification. The final decision rests with the Dean of the Graduate School, who may impose additional requirements.

PhD in Nursing Faculty

Professors
Buhse, Marijean (1), Ph.D., 1997, Adelphi University: multiple sclerosis; caregiver burden.
Shurpin, Kathleen (1), Ph.D., 1989, Adelphi University: symptom distress: family support; cancer prevention and screening.

Associate Professors
Bruckenthal, Patricia (1), Ph.D., 2004, University of Massachusetts, Amherst: health behavior change; pain management; health screening and health promotion; novel health promoting technologies.
Cannella, Dolores (2), Ph.D., 2007, Stony Brook University: chronic illness adaptation; stress and coping; promotion of health behaviors.
Della Ratta, Carol (1), Ph.D., 2015, Adelphi University: intra-professional educational strategies; active learning strategies; qualitative methods.
Friedberg, Fred (3), Ph.D., 1979, City University of New York: chronic fatigue syndrome; fibromyalgia; behavioral self-management.
Rohan, Annie (1), Ph.D., 2013, Columbia University: biomedical innovations; maternal child health.
Shoenfeld, Elinor (4), Ph.D., 1987, University at Buffalo: community engaged research; health disparities; sensor data for health; cancer epidemiology; data management and informatics.

1. School of Nursing
2. School of Dental Medicine
3. School of Medicine, Department of Psychiatry
4. School of Medicine, Department of Family, Population and Preventive Medicine

NOTE: The course descriptions for this program can be found in the corresponding program PDF or at COURSE SEARCH.
