Scholars in BioMedical Sciences

The purpose of this track is to engage graduate students in translational medicine. Trainees enter this one year program during their second or third year of graduate studies (after their thesis project has been proposed) in one of Stony Brook University’s PhD granting programs and remain in the track beyond the program’s structured year and until graduation. Trainees will receive a certificate naming them Scholars in Biomedical Sciences (SBS) upon completion of the program.

Application Requirements

Application Form: https://docs.google.com/a/stonybrook.edu/forms/d/e/1FAIpQLSejkyTWvFFWSpVztAEpT1mSsx9fRZcYmNHSI1gdquZ3veA/viewform?formkey=dExab1p6TGVGazQ0RDgyLVZzY0owQE5M

- Student: CV and a 2-page description of their intended translational research project and career goals. Typically, this project will amount to at least one specific aim of the student’s Ph.D. research.
- Ph.D. Mentor: NIH Biosketch and support letter (up to 1-page) describing how the proposed project will prepare the student to interface with clinicians in their research and the mentor’s commitment to the requirements of the track.
- Clinical co-Mentor: NIH Biosketch and letter describing relationship to the Ph.D. mentor and the research project and commitment to provide the student with appropriate clinical exposure. A short (up to 1-page) description of the clinical experiences intended for the student must be described. The clinical co-Mentor is encouraged to remain as a member of the student’s research advisory committee for the duration of the student’s Ph.D. research.
- Letter of recommendation from the Graduate Program Director. Letter must assess student’s progress in their respective program.

Application Deadline: June 10th - Applications will be evaluated by the end of June, and the selected students/teams finalized by June 30th.

Please submit applications electronically to Ms Odalis Hernandez at odalis.hernandez@stonybrook.edu (link sends e-mail) (link sends e-mail).

Funding of the awarded proposals: For the 2016-2017 year, 5 proposals are expected to be funded at $15,000 each for one year. In addition to the five proposals, 1 to 3 proposals with a focus on Cancer Health Disparities will also be funded. The funds typically provide a 10% increase to the stipend of the graduate student, cover tuition and fees, and the cost of books and other training materials.

Degree Requirements

Students must be in academic good standing, preferably entering their second or third year in one of our PhD-granting programs and pursuing a dissertation project in translational research. A clinical co-mentor is required.

Course work:
- HBP 511: Pathobiology
- HBB 550: Statistics in the Life Sciences
- MCR 549: Module: Legal, Ethical and Regulatory Issues in Medical Research
- HPH 566: Clinical Trials
- MCR 684: Writing a Research Proposal (or equivalent qualifier/scientific writing course)
- MCR 692: Research in Progress (or equivalent research course in their PhD program)
- MST 501: Selected Topics in Translational Research
- MST 502: Monthly Clinical Seminar Series
- SBMS Lunch Presentations (Once a month)
- Clinical Exposure (in consultation with clinical mentor)
- Grand Rounds (in consultation with clinical mentor)
- Annual Translational Medicine Symposium

** Undertake a multi-year clinical exposure with their co-mentor that is relevant to their research project.
Faculty Mentors

This list is comprised of faculty that have expressed interest in participating as clinical mentors for the program, however, mentors may be added in the future.
