The course examines the growth and differentiation of stratified squamous epithelia. Particular emphasis is placed on molecular events involved in the differentiation program. Consideration is also given to mechanisms involved in oral and cutaneous disorders. Prerequisites: Permission of instructor required; HBP 531 suggested; students must have had a background in cellular biochemistry molecular biology.

**Fall and Spring, 2 credits, Letter graded (A, A-, B+, etc.)**

### HDO 541: Principles of Mucosal Immunology

The mucosal immune system is essentially the primary site of interaction between invading pathogens and the immune system. The overall aim of this graduate course is to facilitate a deeper understanding of the fundamentals of the immune system at mucosal surfaces. It will provide a broad overview of several core mucosal immunology topics and has been designed for graduate students and post-docs who have recently entered the field. This class will provide in-depth analysis of the structural features that distinguish the mucosal immune system from the peripheral immune system. Features of innate and adaptive immunity as they relate to mucosal immune responses will also be covered. As well as delivering in depth lectures on relevant and emerging topics the course will engage participants in interactive discussions on topics in an informal setting. The course content is based on the "Principles of Mucosal Immunology" textbook.

**3 credits, Letter graded (A, A-, B+, etc.)**

### HDO 550: Oral Diagnostics and Therapeutic Technology, Lectures and Laboratory Techniques

Recent advances in oral and cutaneous disorders. Special attention is paid to the principles of technology transfer including patents and patenting; searching of on-line databases is a key component. The course includes relationships of dry mouth to salivary physiology, diabetes, and drug medications; salivary film measurements, wetting of oral surfaces, viscoelasticity and lubricity; the use of the Periotron and enzyme assays for the diagnosis of gingivitis and periodontal disease; instrumentation used in sensitive teeth measurement and evaluation of treatment effectiveness using oral compositions and iontophoresis; oral candidiasis and denture stomatitis and early detection and causes of dental caries; oral malodor measurements including use of the Halimeter and its use in the formulation of oral compositions.

**Application to clinical practice and clinical studies is covered. 3 credits, Letter graded (A, A-, B+, etc.)**

### HDO 560: Oral Biology and Pathology I

The first of four comprehensive courses on molecular structure, biochemical and physiological function, developmental anatomy and pathology of the various systems that constitute the oral apparatus. Covers the embryological development of the face and oral cavity and the biology and pathology of the oral mineralized tissues. Prerequisites: Undergraduate degree in basic science; permission of instructor. Fall and Spring

**3 credits, Letter graded (A, A-, B+, etc.)**

### HDO 561: Oral Biology and Pathology II

The second of four comprehensive courses on molecular structure, biochemical and physiological function, developmental anatomy and pathology of the various systems that constitute the oral apparatus. Covers the biology and pathology of the periodontal structures and the microbiology of the oral cavity. Prerequisites: Undergraduate degree in basic science; permission of instructor. Fall and Spring

**3 credits, Letter graded (A, A-, B+, etc.)**

### HDO 562: Oral Biology and Pathology III

This course is the third of four comprehensive courses on molecular structure, biochemical and physiological function, developmental anatomy, and pathology of the various systems that constitute the oral apparatus. The course consists of the following two units of instruction; (1) the biology and pathology of the salivary glands and their products and (2) the biology and pathology of the periodontal structures. Prerequisites: Undergraduate degree in basic science and permission of instructor

**Fall and Spring**

**3 credits, Letter graded (A, A-, B+, etc.)**

### HDO 563: Oral Biology and Pathology IV

This course is the last of four comprehensive courses on molecular structure, biochemical and physiological function, developmental anatomy and pathology of the various systems that constitute the oral apparatus. Covers the biology and pathology of the oral sensory systems and the biology and pathology of oral motor systems. Prerequisites: Undergraduate degree in basic science and permission of instructor. Admission to Graduate Health Sciences Center Program.

**3 credits, Letter graded (A, A-, B+, etc.)**
HDO 590: Research Projects in Oral Biology and Pathology
Individual laboratory projects closely supervised by faculty members to be carried out in their research laboratories.
3 credits, Letter graded (A, A-, B+, etc.)
May be repeated 2 times FOR credit.

HDO 599: Graduate Research
Original investigations undertaken with supervision of a faculty member.
1-12 credits, Letter graded (A, A-, B+, etc.)
May be repeated for credit.

HDO 690: Oral Biology and Pathology Seminar
Research seminars by students, staff, and visiting scientists which may include review of current literature and presentation of student research. Prerequisite: Enrollment in the MS or PhD program in Oral Biology and Pathology. Fall and Spring. 1 credit, Letter graded (S/U)
May be repeated for credit.

HDO 695: Oral Biology and Pathology Teaching Practicum
Practice instruction in the teaching of oral biology and pathology at the undergraduate level carried out under faculty orientation and supervision.
3 credits, Letter graded (A, A-, B+, etc.)

HDO 699: Thesis Research Oral Biology and Pathology
Dissertation Research. Prerequisite: Advancement to Candidacy Passing.
Fall, Spring, and Summer. 1-9 credits, Letter graded (A, A-, B+, etc.)
May be repeated for credit.

HDO 702: Oral Pathology
Covers the clinical and histopathologic manifestations of acquired, inherited and neoplastic diseases of the human oral cavity. Includes benign and malignant tumors of bone, odontogenic and non-odontogenic cysts and tumors, mucosal and salivary gland diseases, and oral manifestations of systemic diseases.
Letter graded (A, A-, B+, etc.)

HDO 704: Translational Oral Biology
Covers the biochemical, physiological, microbiological and electronic principles involved in a variety of techniques used as aids in the diagnosis of oral diseases.
Letter graded (A, A-, B+, etc.)

HDO 705: Oral Medicine
Introduces the principles of patient care related to stomatologic and dermatologic disease, neurologic abnormalities, hematologic disturbances, and the medically compromised patient.16 course hours Prerequisites: HDO 701
Letter graded (A, A-, B+, etc.)

HDO 706: Oral Facial Genetics
Focuses on the utilization, preparation and analysis of basic human genetics in clinical situations. Covers genetic disorders of the craniofacial complex and dentistry for the multiple handicapped patient. 30 course hours Prerequisite: HD 501 or permission of instructor
Letter graded (A, A-, B+, etc.)

HDO 707: Clinical Pharmacology
Covers pharmacology in dental practice emphasizing clinical usage of antibiotics, sedatives, tranquilizers and analgesics. Drug interactions and side effects are discussed. 18 course hours Prerequisite: HD 608
Letter graded (A, A-, B+, etc.)

HDO 803: Oral Pathology Conference II
Clinicopathologic case presentations and development of differential diagnosis skills. 11 course hours Prerequisites: HDO 702, HDO 703
Letter graded (A, A-, B+, etc.)

HDO 805: Summer Research
SUMMER RESEARCH
S/U grading
May be repeated for credit.

HDO 821: Year IV Clinic: Oral Diagnostics
The clinical continuation of HDO 704 in which the principals of oral diagnostics are applied to patient care.
Letter graded (A, A-, B+, etc.)
