HPA

Health Administration

HPA 507: Health Systems Performance
This course introduces students to the system that we have developed to deliver health care in the United States, with international comparisons. The topics include the organization and financing of health care systems, access to health care including health insurance, regulation and policy issues, and the health care workforce.
3 credits, Letter graded (A, A-, B+, etc.)

HPA 508: Human Resources Management in the Health Sector
Explores the key and active role played by human resources in health services organizations. Introduces students to the role of the human resources function and to the challenges that health care managers and leaders will face. Emphasizes strategic human resources, talent management, performance management, the role of the regulatory environment in human resources and making the connection between financial and non-financial rewards and workforce management. The course also identifies issues between management and the labor force.
3 credits, Letter graded (A, A-, B+, etc.)

HPA 510: Health Finance and Accounting
Provides broad but significant immersion into the requisite core knowledge and skills of financial management and accounting in the healthcare sector. Emphasis will include but not be limited to managerial and financial accounting. Fiscal analysis, fiscal planning, and fiscal reporting. Decision making with regard to capital budgets and expenditures are reviewed.
3 credits, Letter graded (A, A-, B+, etc.)

HPA 520: Health Governance and Organizational Analysis
Provides students with immersion into the study of organizational behavior, integrated with the study of organizational theory, to develop evidence-based approaches to analyze, manage, and lead change within healthcare organizations. Emphasis on groups and teams, diversity and cultural competence, individual attitudes and perceptions, communication, organizational change, cognitive processes, leadership, power and influence, stress and well-being, conflict management, decision making and negotiation skills, motivation, and strategies to improve employee and organizational success.
3 credits, Letter graded (A, A-, B+, etc.)

HPA 523: Social & Behavioral Determinants of Health
This course introduces students to the social determinants of health as one of the drivers of population health. Consistent with public health tradition, health is discussed from an ecological perspective, and the course presents current knowledge about the multiple determinants of population health including socioeconomic status, the physical environment, medical care, individual behavior, and genetics and the interaction of these factors. Also covered is the measurement of population health, sources of data, and methods for assessing population health improvements.
3 credits, Letter graded (A, A-, B+, etc.)

HPA 527: Health Economics and Policy
This course will provide students with a comprehensive view of the reasons behind the rapid rise in medical expenditures in the United States over nearly four decades, and the measures that have been proposed to address this problem. This course will cover the following topics: the demand and supply of medical care; the dynamics of competition in the health care industry; the role of government in medical care; general understanding of health care institutions, including Medicare, Medicaid, managed care, hospital and physician behavior, and pharmaceutical markets; and health care reform.
3 credits, Letter graded (A, A-, B+, etc.)

HPA 541: Health Strategic Planning and Management
Explores the fundamentals of strategic planning and leadership in the health sector. Emphasizes vision, values, creating business plans and conducting strengths, weaknesses, opportunities and threats (SWOT) analyses. Explores the impact of leadership style on the strategic planning process.
3 credits, Letter graded (A, A-, B+, etc.)

HPA 542: Capstone
Explores the key characteristics of successful health leaders, including the values that guide personal and professional behavior through the lens of an interactive capstone research project. Prerequisite: Permission of the department.
3 credits, Letter graded (A, A-, B+, etc.)

HPA 564: Health Quality and Information Systems Management
Explores two critical components of healthcare administration through a split module format, dedicating seven weeks per topic and one week exploring the synergies between both topics. The first module will explore information systems management and the second module will explore healthcare quality and performance improvement concepts. The Information Systems Management module will discuss how healthcare decision-making and management are increasingly driven and dependent upon information. The sheer diversity of the information required by the healthcare enterprise surpasses the information needs of almost any other type
of organization. Healthcare managers at every level of the organization are forced to be information managers. The Quality and Performance Improvement module will explore healthcare quality management methodologies and examine the impact on healthcare productivity, quality and patient safety. Students will understand and utilize the concepts of performance improvement and continuous process improvement to improve product and service quality and competitiveness. Students will understand the history of quality improvement in healthcare and how quality concepts may be applied to improve clinical outcomes, patient safety, patient satisfaction, financial outcomes and employee and physician satisfaction. An emphasis will be placed on the critical importance of data analytics to monitor performance improvement activities. CQI and lean strategies are introduced to students as well.

3 credits, Letter graded (A, A-, B+, etc.)

HPA 575: Long-Term Care in the Health Sector
Explores management techniques and standard practices in long-term care in the health sector. Emphasizes skilled nursing, home care, assisted living, adult day care, home health care and senior retirement communities. Provides direction and insight for understanding industry certification.

3 credits, Letter graded (A, A-, B+, etc.)

HPA 576: Aging and Health
An overview of topics relevant to the physical and psycho-social health of older adults and the policy and structural systems that affect aging/older adults in the United States. Specific topics include demographics of aging in the US, attitudes towards older adults and aging, physiological and pathological changes as humans age, health promotion/disease prevention, health care delivery settings and structures, health insurance (including Medicare and Medicaid), aging in place, home health care, innovative models in healthy aging (US and internationally), and ethical/legal issues relevant to older adults.

3 credits, Letter graded (A, A-, B+, etc.)

HPA 580: Integrative Experience
This course provides a 100-hour field placement that provides students with opportunities to gain practical health management experience in the health services field. Field placements strive to integrate real-world experience in administration and management of health services by enhancing health administrative skills under the direction, mentorship or supervision of a knowledgeable preceptor in an environment that promotes learning. Students will complete aspects of the health management integrative experience on site in individual practicum placement settings. In addition to the field placement and under supervision of a faculty member, students will maintain and submit weekly logs of their activity and attend three synchronous sessions that will allow reflection, synthesis, and professional development based upon the individual experiences of students.

Prerequisite: Permission of the department.

3 credits, Letter graded (A, A-, B+, etc.)

HPA 585: Introduction to Biostatistics & Epidemiology
This course is an introduction to biostatistics and epidemiology. In the first half of the course students will be introduced to the principles and methods of epidemiology. The second half focuses on the statistical methods used throughout the health sciences. At the end of the course students will be able to interpret epidemiological studies and have a basic understanding of the statistical methods these studies employ.

HPA 586: Health Management Professionalism and Ethics
Explores professionalism and ethics in the field of health management. Facilitates the application and integration of health management competencies gained in year one of coursework to realistic case studies using interdisciplinary team based methods. Students will continue to enhance communication skills, skills that encourage functional interdisciplinary teamwork and will develop presentation skills, problem solving skills, networking strategies, professional etiquette and have the opportunity to engage in professional development activities.

3 credits, Letter graded (A, A-, B+, etc.)

HPA 599: Physician Practice Management
Explores the essential components of physician practice management including the structure and organization of solo practice and group practices. Includes operating and administrative issues, information management, health informatics, patient care systems, corporate compliance, physician credentialing, finance and management reporting, risk management, operations, practice valuation, marketing and planning, leadership, compensation, governance, billing, coding, medical malpractice, collections, reimbursement mechanisms, human resource management, physician compensation and quality of care. Explores the factors influencing physician practices, physician-hospital relationships, leadership and governance.

3 credits, Letter graded (A, A-, B+, etc.)
