

CREATING A BOLD, NEW FUTURE.

Stony Brook University is transforming lives through education, research and innovation. A world-class public research university, academic medical center and a flagship of the State University of New York system, SBU offers outstanding academic programs, a supportive learning and mentoring environment that provides access and a quality education to all students, and groundbreaking innovations that are changing the world.

ACADEMICS

Educating the Next Generation of Leaders

SBU's innovative programs and multidisciplinary curriculum — based on a series of learning outcomes — help students think differently about critical issues facing our society. Students have myriad opportunities to work along-side world-class faculty and scientists making discoveries in areas such as physics, photon sciences and nanomaterials, and climate change — experiences that prepare them for a lifetime of learning.

FOSTERING OPPORTUNITY

Removing Barriers to Success

SBU is steadfast in its commitment to first-generation college students and those who are economically disadvantaged through intensive mentoring, innovative programing and robust scholarship opportunities. SBU is the only public AAU university in which Pell grant recipients graduate at the same rate as those who do not receive Pell grants, and earn higher wages than those who did not receive Pell grants. Removing obstacles to a world-class education is how SBU sets up students for a lifetime of success.

LEADER IN HEALTHCARE

Taking Healthcare to New Heights

Stony Brook Medicine, SBU's academic medical center and healthcare system, seamlessly integrates education, cutting-edge research and patient care; trains the next generation of healthcare providers; and provides community access. It is where physicians and researchers work side by side in a state-of-the-art facility to deliver lifesaving treatments for patients. Stony Brook University Hospital is the region's only tertiary care center and Level I trauma center.

RESEARCH INNOVATION

Forging a Better Tomorrow

SBU researchers seek creative solutions to humanity's contemporary challenges, working across disciplines and collaborating with preeminent institutions around the world. They are leveraging engineering and medicine to effect transformative medical treatments, and taking a quantum leap with communications to develop a higher-capacity "Internet of the future." Our innovators of today are bringing forward the innovations of tomorrow.
