Psychology

Activities: International Student Alliance, Psychology Student Alliance, research assistant and summer peer assistant leader

"Every single person I've met here is really warm and welcoming. I feel **so safe on campus**. As an international student, I get homesick a lot but the supportive community here really helps me. I now call this my second home, which I'm really happy about.

"I was here for the summer program, which helped me get acclimated to the area. We went to New York City and it was such a great experience. We visited the Museum of Modern Art. I love museums,

so it was really a great treat for me. I made a lot of friends before school even started. And with so many clubs, international students have many ways to get involved in student life."

New York City is a favorite destination.

Learn by Doing

Undergraduate students can gain experience as early as their first year. By connecting with our Career Center, students can find support searching for on-campus student employment or off-campus opportunities based on professional interests, not only academic majors. After graduation, 94% of our recent bachelor's recipients are either employed or enrolled in graduate/professional school and have life-long access to our career services.

Students can learn through experiences such as research, internships, study abroad, service learning and community service.

"The professors here are so interesting. For one of my classes the professor was so energetic and passionate about teaching a very complex subject. He did all he could to help us learn while making the class enjoyable.

"The people here are really nice, too. I immediately made a lot of friends when I first came here. Even if you aren't actively looking for friends or activities they just come to you because there is so much to do on campus. And there's so much support, from resident assistants to tutoring services. I've used the Career Center multiple times for help with resume building and learning about job searching strategies. The Center also hosts workshops and events where you can meet potential employers."

Intensive English Center

Students with excellent academic backgrounds can be conditionally admitted to Stony Brook University's Intensive English Center University Preparation (UP) Program. The UP Program offers students the opportunity to jumpstart their studies at Stony Brook by taking a combination of academic English courses and credit courses.

Top Teachers

Our award-winning faculty include Nobel Prize and Pulitzer Prize winners, MacArthur Fellows and Fields Medalists.

The MRI technology that won the Nobel Prize for Medicine was invented at Stony Brook. Here, you will learn from those who are generating the knowledge that is transforming the world.

Students can work on research projects with our faculty as early as their first year.

Africana Studies

Activities: African Student Union,
Mu Delta Chapter of Phi Beta Sigma Fraternity

"Stony Brook is the place where **dreams can be found. Even though you may come in with a dream, it may not be THE dream. Stony Brook is the place and has the people to help you achieve it."**

"My first major was marine biology and even though I still have a very deep passion for it, I realized it wasn't a fit for me. By taking a few Africana studies courses and opening my eyes to the other part of the story, I started thinking deeper about what I wanted to do with my life and how I could help my community. It was clear to me that this was something that I had to pursue.

"It's very important to have representation of your culture; to feel like these are my people, and to come from similar backgrounds, sharing experiences. And not only that, putting out those experiences for the rest of the campus community so they can get a taste. That's really important to my fraternity — giving back to your campus and just doing what you can to make your community a better place."

Mahambe stops by the Staller Steps, THE place on campus to meet up with friends, play frisbee, enjoy a movie night or watch student performances.

Majors and Degrees

College of Arts and Sciences

Africana Studies, BA
Anthropology, BA
Art History & Criticism, BA
Art, Studio, BA
