

Dear WolfMart 360 Users:

As part of our promise for continuous improvement, WolfMart 360 is getting a new look and feel on April 9, 2021 that is designed to improve users overall shopping experience. Until then you will be able to toggle your screen from the existing 'classic' experience to the 'new shopping experience'! The new user interface is a redesign of the shopping pages that streamlines, simplifies, and modernizes the user experience from beginning to end. Please watch the [New Experience Intro](#) video for an overview of the changes.

You can begin using the new user interface now by clicking on the toggle button, which can be found on the bottom right corner of the shopping home page:

From there, users can select the shopping experience desired: New or Classic. By clicking on the radio button for 'new shopping experience' and then clicking Save, you will be defaulted to the new experience. All users are currently defaulted to the classic experience. On April 9th the new experience will be in effect for everyone, as the classic experience will no longer be an option. **We encourage users to use the toggle and try out the experience before it is live on April 9th.**

Click [HERE](#) to view our user friendly Icon Dictionary that includes a brief description found next to each new icon. Please feel free to reach out to Procurement with any questions. Contact our WolfMart 360 help desk at WolfMart_Help@stonybrook.edu or call (631) 632-4573.

Thank you.
